

PLAN TO PUT ALL INEBRIATES TO WORK ON FARM

State Board of Control Proposes To Use Napa Ranch

MORE FOR THE STATE As Well as Health For the State's Drunkards Would Be Gained

SACRAMENTO, Cal., Sept. 27.—The board of control is planning to have all the drunkards and drug fiends now confined in state hospitals transferred to Napa hospital and from there detailed to work the Fry ranch of 2,000 acres near Yountville, which is a reform school for first offenders. Dr. F. W. Hatch, state superintendent of insane asylums, Clyde Seavey of the board of control and Dr. A. W. Holsholt, head of the Napa asylum are at the state today investigating the practicability of the plan.

LOOKING FOR WOMAN IN THE SULZER CASE

Assembly Managers Declare Mysterious Person Mixed Up In Speculations

ALBANY, N. Y., Sept. 27.—A mysterious woman, believed by the board of managers of the impeachment trial of Governor Sulzer to be conversant with many of his Wall street transactions, has been sought by detectives here. It was learned tonight that she had been seen in New York for weeks. Her testimony is desired to be introduced next week along with that regarding the governor's deals in stocks. None of the transactions was made directly through her as the governor's agent, it is said, but she is believed to know much of the nature in which the deals between him and his agent or agents, were consummated.

Frederick L. Colwell, alleged to have been the "governor's dummy" in certain Wall street ventures, was not produced by attorneys for the defense today, and tonight it appears more unlikely than ever that he will testify. Friends of the governor said today that Colwell might prevent Colwell from taking the stand. They were still firm in their assertion, however, that he was not attempting to conceal himself.

Changes that the governor's political information will be taken up early next week, it developed today. Two witnesses, Chester C. Platt, the governor's secretary, and John A. Waldron, a recorder of superior courts, have been ordered to produce the reports of John N. Cutler, state highway commissioner, in connection with certain projected "road improvements." These reports were made while Colwell was a member of a committee of inquiry appointed by the governor. The report opposed approval of the bill for improvement in Greene county. Waldron must produce the bills. According to a charge made by Eugene Lamb Richards in his opening address on behalf of the assembly managers, \$100,000 was expended from the general fund of the state for the Greene highway. It is alleged that the governor signed the bill in exchange for the vote of Assemblyman J. Lewis Parlin for his direct primary bill.

CLAYTON TO RUN EVEN AGAINST UNDERWOOD

Plaintive In. Protesting Candidacy of House of Representatives Leader

WASHINGTON, Sept. 27.—Representative Henry Clayton of Alabama will remain in the field as a candidate for the Senate from that state, even if he has to contest with Oscar W. Underwood, the House leader, for the nomination. In a statement today Mr. Clayton said he would join neither Mr. Underwood nor Mr. Underwood entered the field or not.

MEXICANS FIRE ON AMERICAN TROOPS ACROSS THE BORDER

Huerta's Cavalry Within 200 Yards of U. S. Soldiers; None Wounded

EL PASO, Texas, Sept. 27.—A detachment of United States troops from Troop H, second cavalry, were fired upon late this afternoon by Mexican federal cavalrymen, the Americans being on duty patrolling the international boundary about fifteen miles east of El Paso. None of the Americans was wounded. Army officers stated tonight that the soldiers did not return the fire, although there were about forty shots fired at them.

ELEVEN THOUSAND ULSTER VOLUNTEERS PARADE AT BELFAST

BELFAST, Ire., Sept. 27.—Fourteen battalions of Ulster Volunteers, comprising 11,000 men, took part in a parade of the review ground where the army was drawn up for inspection under the command of General Sir George Richardson. When an order was given for three cheers for the union, the largest Union Jack in the world was broken from the flagstaff in the center of the ground and the volunteers and the crowds joined in the singing of "God Save the King."

QUARREL RENDS GERMAN ROYALTY

Cumberland and Hohenzollerns Quarrel Over Ceremonials

BELLEVILLE, Sept. 27.—The more of the serious differences between the houses of Hohenzollern and Cumberland, which have been in circulation for some time, received fresh impetus tonight from the report that Princess Victoria Louise, the German Empress's daughter, who recently married Prince Ernest August of Cumberland, would take an extended trip to the United States for her health, probably to the Riviera. She will be accompanied by the empress.

WOMAN MURDERED BY GASPIPE FIEND

Bloody Collar Only Clue to Slayer of Mrs. Rebecca P. Gay

LOS ANGELES, Cal., Sept. 27.—With a piece of gas pipe a foot and a half long, someone a man or a woman, battered the life out of Mrs. Rebecca P. Gay, a religious worker, practicing in her office sometime yesterday evening, and after a futile attempt to throw the body from the fifth story of the office building, left the dead woman covered with evidence of a religious newspaper. The body was found early today in Mrs. Gay's consultation room, lying under a window. The window through which the slayer had evidently intended to hurl it, but failed on account of the victim's weight.

STRIKERS RENEW CALUMET RIOTS

CALUMET, Mich., Sept. 27.—Rioting broke out at the Dodgeville location tonight when two men going home from work in the Isle Royal mine were surrounded by a large number of strikers who attacked and beat them. Several shots were fired but no one was hurt. A number of mounted troops from the Isle Royal hurried to the scene and restored order.

GAMBOA STARTS ACTIVE FIGHT FOR MEXICAN PRESIDENCY

Campaign of Spellbinding Is Planned By Catholic Nominee

LIBERALS MAY HELP DIAZ FREE TO COME HOME Now and Resume His Contest

MEXICO CITY, Sept. 27.—Federico Gamboa is losing no time in getting his campaign for the presidency under way. Already he has laid plans for a campaign of spell binding which probably will draw him personally into the field as a political orator. Hundreds of telegrams were sent today from the temporary headquarters of the Catholic party to the heads of the party divisions in various parts of the country. Arrangements already have been made for twenty-five public speakers to take the field. Gamboa himself, it was said today, doubtless would visit a number of cities on a speech making tour.

BUBONIC PLAGUE AT GUAYMAS?

DOUGLAS, Sept. 27.—Mexicans arriving in Douglas tonight reported that a plague, pronounced bubonic by some, had broken out at Guaymas and that many Americans were leaving that port because of it.

PORFIRIO DIAZ CALLED BACK FOR SERVICE

MEXICO CITY, Sept. 27.—General Porfirio Diaz, ex-President, has been summoned by the Department to return to Mexico for active service. A telegram sent to General Diaz today brought a non-committal reply from the ex-President asking that the war minister arrange the arrival of a letter which he would send him.

OPPOSE REQUIREMENT OF HEALTH CERTIFICATES

JACKSON, Mo., Sept. 27.—The St. Louis conference of the M. E. Church, South, today rejected a proposed memorial to the general conference of the church asking that Methodist preachers be required to demand health certificates from candidates for matrimony.

WANT DELAY TO GET COAL BOOKS

SAN FRANCISCO, Sept. 27.—Attorney Matt L. Sullivan, special prosecutor for the government in the Western Fuel case, will ask Monday in the United States district court, for extension of time until the November session of court. In the meantime the government attorneys will endeavor to evolve a plan whereby they may gain access to the Western Fuel company's books. The chief reason advanced for the delay will be that it is necessary for the government to wait the disposition of the Norcross contempt case by the appellate court before going into the merits of the fraud cases.

425,000 CITIZENS MUST KEEP TRACK OF INCOMES

Government Expects to Get \$82,250,000 From New Tax

APPLIES THIS YEAR Burden of Accounts Rests Largely On Those Who Must Pay

WASHINGTON, Sept. 27.—According to estimates today by Treasury experts, 425,000 American citizens must keep such accurate account of their incomes this year that they will be able to report to the income tax collector next spring exactly how much they owe the government under the new income tax law.

NEW PROPOSAL FOR COTTON FUTURES

All Other Features of Tariff Bill Have Been Settled

WANT DELAY TO GET COAL BOOKS

SAN FRANCISCO, Sept. 27.—Attorney Matt L. Sullivan, special prosecutor for the government in the Western Fuel case, will ask Monday in the United States district court, for extension of time until the November session of court. TAMMANY MENACE CHIEF N. Y. ISSUE, SAYS ROOSEVELT

State Progressives Nominate Judges — Murphy and Sulzer As Factors In Campaign

ROCHESTER, N. Y., Sept. 27.—In an address before the state committee of the Progressive party here today, Colonel Roosevelt declared that in the election in New York state this fall, "the dominant concern of the people should be to prevent Tammany from obtaining complete control of the state," and that to this the latter issue argued that "the predicament in which the state finds its public affairs is due to the failure of the people to elect last fall a governor and legislature pledged to the carrying out of progressive policies." In voting against Tammany, moreover, Colonel Roosevelt urged the voters to support the Progressive party candidates to the end that they might "defeat Tammany without ennobling the Barthes Republican machine in its place."

JUDGES NAMED

ROCHESTER, N. Y., Sept. 27.—United States District Judge Learned Hand, a Progressive, and Supreme Court Justice Samuel Brandeis, a Progressive Democrat, were today named for chief judge and associate judge of the court of appeals, respectively by the Progressive state committee here upon recommendation of the state Progressive conference. Both are residents of New York City.

VALLEY B. P. O. E. VOTE FOR STATE ORGANIZATION

Will Send Representatives
To Convention In S. F.

October 23
High Jinks At Riverview
Park Today; 300 Elks
To Go In Autos

A united San Joaquin Valley to be represented in San Francisco October 23, as in favor of a state organization of the Benevolent and Protective Order of Elks, was determined upon last evening in a meeting at the lodge rooms of Fresno Lodge No. 433. Over three hundred representatives from valley lodges were in attendance. The Elks pledged themselves to back a state organization to the limit at the convention in the Bay City.

Today the local Elks and their hundreds of visitors will migrate to Riverview Park where an all-day high jinks will be enjoyed as a conclusion to the gathering in this city.

At the smoker last evening, George Coagrove presided as toastmaster. George H. Noel, past exalted ruler of Fresno Lodge, was first called upon for a talk on state organization. He was followed by James Egan of Bakersfield, George H. Bortram of Modesto, N. C. Ray of Merced, W. C. MacFarlane of Hanford, J. H. Carter of Bakersfield, and Roy Hall of Fresno. Of the speakers, J. H. Carter probably gave the most interesting presentation of the working of a state organization, being past exalted ruler of Tacoma Lodge, and for two years president of the Washington state association.

At the conclusion of the speeches, the following resolution was introduced by James M. Burke of Visalia Lodge No. 1232, seconded by J. M. Peck of Hanford Lodge No. 1259, and unanimously carried:

"Be It Resolved, That it is the sense of this assemblage of members from all the lodges of the San Joaquin Valley at a 'get together' meeting in Fresno, California, to act within the limits prescribed by the statutes of the Grand Lodge should be founded, and

"Be It further resolved, that each lodge in the San Joaquin Valley should send a suitable number of delegates to the convention, called to meet in San Francisco October 23, 1913, with instructions to vote and work for the formation of such an association."

Some sixty automobiles will leave Elks hall at 5:30 this morning with local Elks and their many guests, parade about town, club out Kearney boulevard and then to Riverview where at noon the tempting barbecue will be served under the direction of L. Q. Brackett and Pete Lohias. Twenty policemen and special detectives will follow the procession in special machines, announce the Elks, headed by "Chief of Police" Ed Shannon.

At Riverview many stunts will be staged that will range from mere funniness to extreme humor. Sports of all kinds will be indulged in, from basketball to boxing and swimming. An impromptu program of music and song will be given by leading members and a formal program also followed out to some degree. The official program is printed in Japanese, but an official interpreter will be furnished on the grounds. The stunts are veiled in dark mystery, but promise excitement.

One of the features of the day, it is announced, will be the beauty show in which the policemen from the various lodges will compete. A prize of \$10.00 is offered for the most handsome officer.

Th. Elks will return to this city early in the evening.

James Romano, who resides at D and Twelfth streets, sustained a broken collar bone yesterday afternoon when he collided with an automobile truck owned by Jacob Richter. Romano was removed to the emergency hospital and treated by Dr. William Savage and later taken to a local sanitarium.

Aunt Sally's Advice to Beauty-Seekers

C. M. P.: The neck should receive similar attention to that given the complexion, so color and texture of the skin will be the same. A yellow neck and a white face give a discordant effect. I advise washing for both neck and complexion, the treatment recommended to "Monica."

F. M.: First, stop scowling. If you would get rid of the lines between the eyes. The best application for such lines, and all wrinkles is a solution of witch hazel, 1 cc. dissolved in water in which daily until entirely relieved.

Monica: You hardly need such a list of cosmetics as you mention. Ordinary mercerized wax will help you more than any or all of them. It will gradually absorb the wrinkles, discoloration and you will soon have a new, youthful and healthy-looking skin. You needn't get more than an ounce of the wax, which will cost you little at any drugstore. Apply nightly, like cold cream, washing it off mornings.—Woman's Realm.—Advertisement

Worth Listening To—
Peerless Player Piano
and worth imitating, too. When you hear a Haines Player Piano in operation you will be pleased, but you ought also to be jealous—and get one for your own home. It is easy enough on our monthly payment plan, and a Player Piano is a great attraction to any home where music is loved. It enables you to reproduce yourself the works of the best masters.

THE RICHER THE LESS HIS TAXES

Curious Twist Is Found in
New German Revenue
Law

BERLIN, Sept. 27.—A German tax expert has found a curious and amusing loophole in the new armament taxation bills, by which a taxpayer, by reporting a greater amount of property for taxation than he possesses, may pay less taxes than if assessed on the correct amount. The paradox is due to the fact that the new measures combine a direct property tax with a higher increment tax and can be taken advantage of only by a taxpayer who has reason to expect a steady increase in the value of his property. If he discounts this and returns his property next January at the figure which he expects it will reach in 1917, when the increment tax becomes effective, he will in fact, pay a higher direct tax but save the amount of the increment tax, which on moderate properties is 15 per cent of the increase as against the direct tax rate of from 15 to 35 per cent.

The government, faced with the possibility of this peculiar form of tax dodging, has been forced to announce semi-officially that persons returning their property for assessment at an excessive figure will be subjected to the same penalties of imprisonment and fine as those returning a small figure.

Dr. Helms, director of Düsseldorf, who found this important loophole in the law, illustrates it with the following example: A has property valued at \$7,500, which he increases each year through savings and labor by \$1,250. If he is assessed in 1914 for \$7,500 and in 1917 for \$11,250, his taxes will amount to 15 per cent of \$7,500 and 75 per cent of the increase of \$3,750, amounting together to \$39.37. If, however, A gives his property valuation in 1914 as \$11,250, he will have to pay only 15 per cent of this during the next three years, amounting to \$14.37, and no tax for the succeeding period, since there is no increment. He therefore saves \$25 by giving the higher valuation.

The saving is relatively smaller in the case of large properties. If A has property worth \$37,500, which he increases each year by \$2,500, his taxes for the six years under a proper valuation would amount to \$112.50. If he found his property valued at the beginning of \$42,500, his taxes will amount to only \$150, showing a saving of \$37.50.

PITTYABLE MISERY IN BATTLE AREAS

Efforts Being Made To Re-
establish People of
the Balkans

SOFIA, Sept. 27.—The agents sent out by the Balkan Committee from London to relieve the destitution prevailing in Macedonia have found the refugees from the fringes of the late Greek conquests in a pitiable state of misery. The worst state of things is found just south of this city, which is crowded with refugees, who are still pouring in from the new Greek territory in Macedonia.

Efforts are being made to repatriate them, but without much success. As they still are in a state of panic, the Greek and Bulgarian refugees are finding shelter in schoolhouses, stables and other outhouses. All of them are destitute, without clothes, and many are in a wretched condition of health. The people of these places naturally are anxious to see their own people again, but the Greek government has practically all of the villages have been burned and the rebuilding of the villages before winter sets in is impossible.

The Greeks in the vicinity of Drama, where all of the villages have been burned, are doing admirable work in feeding the people, many of whom are lodged in convents. Fifteen thousand refugees are said to be in the vicinity of Drama. When the cold weather sets in shortly there is certain to be terrible suffering.

BOY BABIES CANNOT ENDURE THE HEAT

BERLIN, Sept. 27.—Statistics showing the great increase in infant mortality during periods of extreme heat, published by Dr. Liefmann, chief bacteriologist at one of the great municipal hospitals, in the latest number of the German Medical Week, disclose the proverbial reference to women as the "weaker sex," so far at least as their early life is concerned. Dr. Liefmann found that when the death rate for nursing babies suddenly jumped during a typical heat wave early this summer, the same was not equally affected, the death rate for boys being almost double that for girls. The figures were 182 deaths of boys to every 100 of girl babies. Dr. Liefmann states that this percentage is maintained in deaths from other causes and that boy babies are more susceptible to ailments of all sorts more readily than girls.

The same ration has been noted in other heated periods and there is no doubt, according to Dr. Liefmann, that on scorching days boy babies are taken ill more acutely and in greater numbers than girls. Long continued heat waves, however, gradually increase the mortality percentages among female babies and equalize the proportionate mortality of the sexes.

The sword, the soldier's proverbial weapon since the early days of history, seems on the way to disappearance in the German army. The six cavalry regiments provided for by the army increase law, passed this year, will be without sabres, being armed instead with carbines equipped with the short-infantry bayonet. The change is made experimentally, but caused much headbanging among cavalry officers, for it is recognized that the experiment if successful may lead to its general adoption in the cavalry. With infantry officers now dispensing with the sword in actual warfare, to make themselves less conspicuous to opposing sharpshooters, and cavalrymen going into action with rifle and bayonet, poetical references to the sword of battle may have to be revised.

TARIFF ILLOGIC

The evening Democratic contemporary undertakes to make a political sensation out of a tardy discovery that a motion to abolish the Zante current tariff was made in the lower house of Congress by a Republican Congressman, and that the motion to retain a portion of that tariff was made by Oscar Underwood, the Democratic leader. The whole political point attempted to be made is that the Democratic party favors a protective tariff on California industries, and that the Republican party is opposed to it. If this is not the point then there is no point.

The trouble is that the evening contemporary so little understood its own logic as to make the mistake of printing the debate on which this alleged conclusion is based. This debate unfortunately leads to exactly the contrary conclusion. It brings out, in the first place, the fact that both the Republican Congressman and the Democratic leader were agreed upon only one thing and that was that the Zante current tariff is entirely non-competitive and that there is no industry in the United States which could be affected by this tariff either way. In other words, the one thing on which Democratic and Republican leaders agreed was in their total ignorance of the only aspect of the subject in which Fresno is interested at all. Congressman Willis, Republican, moved to take off the tariff on the ground that there was no American industry in existence to be protected by it, and Congressman Underwood moved to keep a part of it on the same ground. Congressman Underwood's whole argument was that if the tariff were actually protective and if there were any American industry to be protected by it, he would be opposed to that protection, and his only reason for favoring the current tariff was the absence of any possible protective feature. Therefore, by ignorant inadvertence, we get a tariff which the Herald welcomes because it is protective, but which the Democratic leader says he would not have given us if he had known that we had any such industry to protect.

Carrying Congressman Underwood's argument out to its logical conclusion, this means that as rapidly as the Democratic party dares it will abolish the tariff on all palms except Zante currants, and on lemons and citrus fruits, and that it will retain the tariff on Zante currants, if at all, only upon the conclusive demonstration that these currants do not come in competition with our product, and that the tariff on them cannot possibly protect us, even incidentally. It is in showing that this tariff will do us any good or that we in Fresno have any reason for caring whether there is any such tariff or not, then the Democratic party will take away from us the Zante current tariff also.

Is it not passing strange that absolutely the only argument made by any Democrat in California in favor of any Democratic representative in Washington is that he has succeeded with respect to the industries of his district, in inducing a Democratic Congress to postpone the application of Democratic doctrines to those industries? If these achievements are really a credit to our Democratic representatives, they are a discredit to the Democratic party. If they constitute any palliation for the actions of the present Democratic Congress, they thereby constitute a warning against electing any future Democratic Congress. For every protective schedule in this tariff bill is expressly announced by the authors to be a temporary concession to expediency, and they expressly assert that it retained in power they will, as soon as possible, take away these remaining protective schedules until they are all gone, and their places are taken by revenue schedules levied on products not produced in the United States and therefore not capable of being protected by a tariff.

If this doctrine and this intention are not right then the Democratic party is wrong. If our Democratic representatives are right in opposing the application of this principle to our industries, then the Democratic party is wrong. And it is a triumph for our representatives to keep Democratic doctrine temporarily away from us, then the only way to continue that triumph is to do our part towards seeing to it that there are no more Democratic Congresses against which they will have to protect us.

INCOME TAX

Some of the figures given out as estimates on the income tax are extremely interesting as showing both the distribution of incomes in the United States and the distribution of the burdens of this income tax. According to the estimates, some 425,000 citizens of the United States will be subject to the income tax, by reason of the possession of an income of \$2000 a year, or above. At a rough estimate, then perhaps one in forty of the heads of families in the United States will pay an income tax. Thirty-nine per cent of our population belongs to families whose income is less than \$2000 a year. Of the 425,000 fortunate ones, 126,000 belong to the first class, with incomes of from \$3000 to \$5000 a year. But these will pay an insignificant part of the tax, since the total amount estimated from them is only \$620,000. Of the next class, however, of the well-to-do, with incomes of from \$5000 to \$10,000 a year, 178,000 persons will pay to the government the very large revenue of \$3,840,000. No other class pays so much until we reach the "25,000 to \$50,000 class," which will pay over \$5,000,000 a year. A still more interesting estimate, however, of the burdens of the tax is found by dividing the taxpayers into two classes at the \$25,000 line. Over nine-tenths of the income-tax payers or 392,000 in all, have incomes of less than \$25,000 a year, and these nine-tenths will pay less than one-fifth of the entire revenue collected, or \$15,608,000. There are only 31,000 persons having incomes of over \$25,000 a year and these 31,000 constituting less than one-tenth of the whole, will pay more than four-fifths of the entire tax, or \$36,793,000 in all. In fact, over one-fourth of the entire amount, or \$22,864,000 will be paid by the 450 persons who have incomes of more than \$100,000 a year. The whole income tax, then comes out of less than one-fifth of the population of the United States; four-fifths of it comes out of one-tenth of these; and one-fourth of it comes out of less than one one-thousandth of them, or less than one forty-thousandth of the whole people.

to \$5000 a year. But these will pay an insignificant part of the tax, since the total amount estimated from them is only \$620,000. Of the next class, however, of the well-to-do, with incomes of from \$5000 to \$10,000 a year, 178,000 persons will pay to the government the very large revenue of \$3,840,000. No other class pays so much until we reach the "25,000 to \$50,000 class," which will pay over \$5,000,000 a year. A still more interesting estimate, however, of the burdens of the tax is found by dividing the taxpayers into two classes at the \$25,000 line. Over nine-tenths of the income-tax payers or 392,000 in all, have incomes of less than \$25,000 a year, and these nine-tenths will pay less than one-fifth of the entire revenue collected, or \$15,608,000. There are only 31,000 persons having incomes of over \$25,000 a year and these 31,000 constituting less than one-tenth of the whole, will pay more than four-fifths of the entire tax, or \$36,793,000 in all. In fact, over one-fourth of the entire amount, or \$22,864,000 will be paid by the 450 persons who have incomes of more than \$100,000 a year. The whole income tax, then comes out of less than one-fifth of the population of the United States; four-fifths of it comes out of one-tenth of these; and one-fourth of it comes out of less than one one-thousandth of them, or less than one forty-thousandth of the whole people.

The tax is avowedly a discriminatory tax on wealth, rapidly and highly graded on the largest fortunes, and is at the same time not burdensome to any member of any class. On those whose incomes are from \$5,000 to \$50,000 a year, for instance, the average tax will only be \$5 a year apiece, which is, of course, negligible. At the other extreme, the 100 persons whose incomes are over \$100,000 a year apiece, and whose combined income is therefore over \$10,000,000, will pay out of it less than \$10,000,000 in tax. The total revenue to the government, or over \$52,000,000, will be collected without imposing any personal hardship on any person, and will establish a principle of taxation which may ultimately solve many other problems in addition to those of revenue.

SUNDAY SCHOOLS

The meetings in the Fresno churches today under the form of the Sunday School Rally Day are a part of the larger movement which is gradually bringing the Sunday schools of the evangelical churches in the United States more fully up to the task which they have undertaken for themselves. With the disestablishment of the churches from the state and of the schools from the churches, a new educational problem was presented to the churches of the United States, towards the solution of which they have been slowly feeling their way. Under the older conditions, in which either the schools were under the control of the churches, or both the schools and the churches were under the custody of the government, the problem of religious education was merely but one branch of the problem of education in general. Religion was taught, and in those countries which have established churches is still taught, in the schools, like any other branch. Even in this country those churches which in other countries are established by government still maintain a form of religious education leading toward "confirmation," more or less analogous to the training given in the religious classes of the schools of Europe.

The evangelical churches, with their goal of conversion rather than confirmation, for a long time under-rated the strictly instructional function of the Sunday school, with the result that the religious education which had been disestablished from the public schools was not re-established anywhere, and that the juvenile evangelization which took its place did not accomplish even the purpose to which it was directed. In the last few years a decided transformation has taken place. Without minimizing the evangelizing purpose of the Sunday school, the evangelical churches have gone intelligently to work to restore its instructional function, with the result that graded courses of study have taken the place to a large extent of the old international lessons, and that there is a rapid development in the direction of getting trained and competent teachers in the Sunday schools who shall give real instruction, to the increase of knowledge, and not merely a more or less doubtful moral and religious inspiration. With the transformation of the character of the Sunday school there has come a great increase in its importance. If religion is worth anything, it is certainly worth knowing something about, and if it is worth knowing, it is worth intelligent teaching. The rally toward the support of Sunday schools, therefore, becomes now a rally toward something which is increasingly worth while.

TYPHOID FROM WATERCRESS

Any attempt to trace typhoid infection to the use of uncoked vegetables such as lettuce, watercress and celery is likely to succeed only under rather peculiar conditions. Ordinarily, the distribution of such articles of food to a large circle of consumers, and the difficulty of discovering, several weeks afterward, that such things were eaten, and by whom, are facts that conspire to render us ignorant of the real frequency of such sources of infection. A remarkable typhoid outbreak apparently due to polluted watercress has recently been reported from Philadelphia to "The Journal of the American Medical Association." At a dining breakfast, June 24, with forty-three guests in attendance, nineteen persons were watercress sandwiches, eighteen of whom later developed typhoid fever. Investigation by the Philadelphia Bureau of Health showed strong reasons for suspecting watercress to be the vehicle of infection.

B. B. BALM

Is highly recommended for all skin eruptions. Price 25c. At Smith Bros. Drug Store.

PICTORIAL SERMONETTE.

On the Questionable Taste of Kissing the Hand that Feeds.

By John T. McCutcheon.

(Copyright, 1913, by John T. McCutcheon.)

Mrs. Bixby: "Dear me! A dinner invitation from Mrs. Packerton; I delight that woman, but she has such interesting people at her house that I'm always crazy to go there."

Mrs. Bixby: "I wonder what Mrs. Packerton is saying; she's so dreadfully common."

Mrs. Bixby (to her neighbor on the left): "Did you ever in your life see such wretched taste and vulgarity as Mrs. Packerton always exhibits? I wonder that people ever come to her house." (To the waiter): "Yes; some more bread, please."

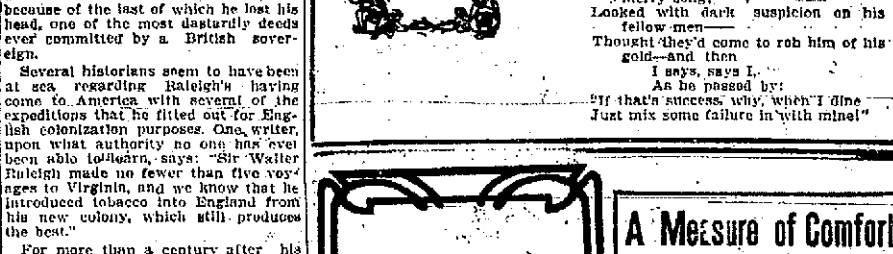

Mrs. Bixby (to Mrs. Packerton): "My dear Mrs. Packerton, I've had just the loveliest time this evening. So good of you to ask me. I enjoyed the dinner so much. Good night, dear."

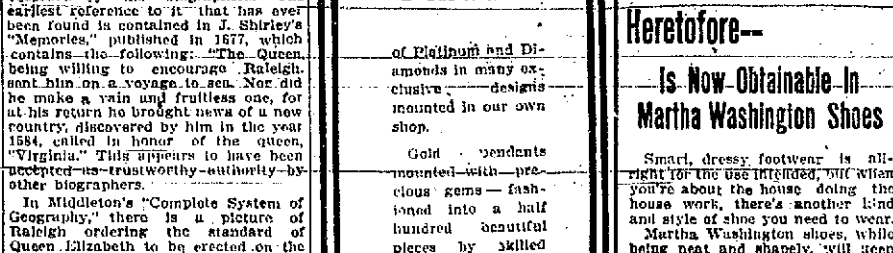

Mrs. Bixby (to Mrs. Packerton): "My dear Mrs. Packerton, I've had just the loveliest time this evening. So good of you to ask me. I enjoyed the dinner so much. Good night, dear."

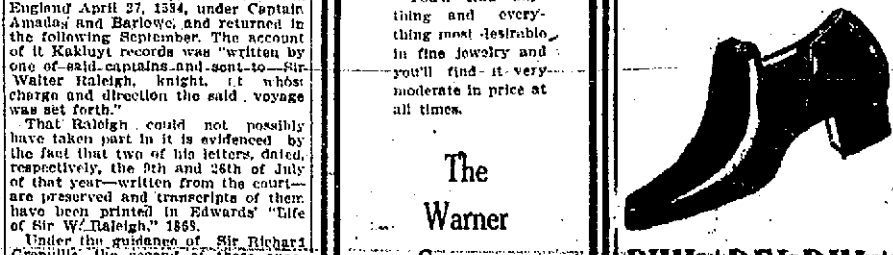

Mrs. Bixby (to Mrs. Packerton): "My dear Mrs. Packerton, I've had just the loveliest time this evening. So good of you to ask me. I enjoyed the dinner so much. Good night, dear."

A Musical Evening
With the
Victor-Victrola

Nothing could please your guests more than to be entertained by the music of the Victrola.

This wonderful instrument places at your command the services of the world's greatest singers and musicians—an array of talent that will win the admiration of your guests, and give them an evening of entertainment that will linger long in their memory.

We will be glad to demonstrate the Victrola to you whenever you find it convenient to stop in—we'll play any music you wish to hear.

There are Victrolas from \$15 to \$200, and Victors from \$10 to \$100—and we'll arrange terms to suit you.

At the request of the defendant, Judge Austin postponed yesterday until November 11 the trial for murder of Pasquale Parrella, who was extradited from Montreal.

Report was made to the police yesterday that some time Friday night room 1 at 1456 Kern street was burglarized and jewelry and \$12 stolen and the laundry at Mono and F streets robbed of \$20.
Dr. Channesian was cited yesterday by the town clerk to appear in court Monday and answer to a charge of malicious mischief. He is alleged to have taken fruit out of wagon and thrown it about the streets.

The \$10,000 bond issue of the Sanger Union High School district was forwarded yesterday to C. W. Bacon, head clerk of the Woodmen of the World, Pacific Jurisdiction, at Denver. The Woodmen purchased the issue. County Auditor Barnum was the last official to sign up the bonds yesterday before mailing.
James Cosgrove was cited yesterday to appear before Judge Clark on Monday, October 6, for contempt for failure to make payments in the divorce case of Mrs. R. M. Cosgrove under an order of court of September 2. The order was to pay on the 10th, \$45 as an attorney's fee, \$10 for costs and \$15 a month as alimony.

Suit was brought yesterday by Burrell Jones of Coalinga to recover a balance of \$2098 claimed to be due from the Lost Hills Development Company for services rendered in development work in Kern county, also for money advanced between November 8, 1910, and March 1, 1912. The original claim was \$3497 with \$1401 paid thereon.
Peter Beyer tried yesterday before a jury for shooting at Jacob Lowenthal on August 11, 1913, was found guilty of assault and sentenced by Judge Austin to pay a fine of \$150 and if not paid within one hour to be imprisoned for seventy-five days. Exception of sentence was stayed for five days. Beyer wounded Lowenthal in the right foot. The district attorney read a record against Beyer of half a dozen arrests for insubordination, disturbance of the peace and cruelty to an animal.

Mrs. Clifford Chavez yesterday asked that J. M. Bullis be ousted from the administration of the estate of her mother, Margaret McDaniel, and that she be substituted because he has neglected it. She says he has not refunded to her the \$8 filing fee advanced for the petition for letters, has not paid the allowed claim of \$25 for money loaned by Samuel Chavez, neglected to pay 1912 taxes but permitted the lot in city block 44 to be sold for delinquency, has not caused an inventory to be filed and neglected to repair the shack buildings on the lot. Bullis was appointed administrator on August 26 1912.

Premium Stamps FREE With Every Purchase. New Fall Standard Patterns On Second Floor.

WILSON'S POLICY NOT APPLICABLE TO MEXICO SAYS BUSINESS MAN OF REPUBLIC IN RECENT COMMUNICATION

A criticism of President Wilson's Mexican policy by one thoroughly familiar with conditions in that republic, having lived there for several years during which he was engaged in profitable business, is contained in a recent communication received by W. J. Downing, of Reedley, from General Manager J. W. Graham of the American Land and Cattle Company of Cruz, Tamaulipas, Mexico.

Mr. Graham is of the opinion that Wilson has no reliable information about the situation in the south and that his policy is too easy for one dealing with the Mexican situation, owing to the radical difference between the morals of Anglo-Saxon and Latin.

The murder of Madero, declares Graham, is not viewed as a crime there, but rather as a good thing for the country, as he was a weak man and could not control his army.

To back his statements Mr. Graham has not had a single shipment out of twelve molested and sees no reason why he should take Wilson's advice and live from Mexico when affairs are very peaceful in this section of the country.

The letter follows in full:

September 17, 1913.
Mr. W. J. Downing, Reedley, Cal.

Dear Mr. Downing: Your favor of August 31 received yesterday. Although this country is supposed to be all torn up by a terrible war, if you were here you would not know there was such a thing. I have been engaged in harvesting and shipping corn ever since the day I arrived, and have not been molested in any way, and the cars I have loaded have all reached their destination without molestation. Trains are running on time both on this branch and between Monterey and Laredo. Up to date I have shipped twelve cars of corn in thirty-eight days. Not so bad. And from the looks of things I can ship my whole crop without any trouble whatever.

What President Wilson says does not interest me—at least I would not take any such a warning as he gave, because I am convinced that he is without reliable information. My opinion is that he is all wrong in his policy. His policy might be good where the Anglo-Saxon race is to be dealt with, but with these people, whose customs are different and who don't think as we do at all, he will have to take a different attitude. For instance, none of them think the way we do about the taking of a life; they look upon it as a good thing for the country, and even Madero sympathizers don't look upon it as a horrible crime—as we view a crime. One thing is certain, under Madero the country would have continued in war as long as it is now, or possibly worse, because the army were against him almost to a man, he never could win their regard. While on the contrary, they will be sorry when his term is over. I got this straight from the Federal soldiers who were camped here for ten days. They like a strong man, and Madero to them was anything but a strong man.

We are all quite well and have had a splendid season, crops in are looking finer than ever.

With kindest regards from us all, I am, yours very truly,

J. W. GRAHAM.

MOTORCYCLIST HURT IN AUTO COLLISION

James Romano, who resides at D and Tuolumne streets, sustained a broken collar bone yesterday afternoon when he collided with an automobile truck owned by Jacob Richter. Romano was removed to the emergency hospital and later taken to a local sanitarium.

59 BABIES ENTERED IN CONTEST AT COUNTY FAIR

More Entries Expected Today; City To Compete Against Country

Decisions Will Be Made On Physical Development Not Beauty

Up to the present time fifty-nine babies have been received by the committee in charge of the Baby Contest to be held at the county fair this year and promises have been made for the entry of about fifteen more before the contest closes. There has been a great deal of interest aroused in the contest, as every mother is of the opinion that her child is the best there is and after an interview with the physician of the city, one is of the belief that they will not have an easy time of it in selecting the winning baby from Fresno and the surrounding country.

The show will be held on three days during the fair, Wednesday, Thursday and Friday, in three special buildings, under one large tent, near where all these interested babies in the contest can easily get to it.

On the day following, Saturday, the doctors will award the sweepstakes or grand prize. It is at this time that they will be called upon to decide which is the better, the country or the city boy and girl baby.

The decisions will be made along lines of physical measurement and development. Mental development will also be considered by the judges.

The doctors from this city will judge the babies from the surrounding country and the doctors who hail from the country will inspect the city babies. Dr. G. A. Haro, president of the county medical society, has chosen the following doctors to act as judges for the babies' contest at the fair: C. P. H. Kjaerbo, Mrs. Jessie E. Haro, George Allen, Harry J. Grayson, of this city and Charles O. Mitchell, of Fowler, A. St. Leger of Dinuba, and O. W. Steinwang of Selma.

WHAT THE CONTEST IS

The babies' contest consists of a competitive examination of children three years of age and under, by physicians, with prizes for the high scoring babies. The entries are made up in a book and measured by practically the same standards of physical perfection, with added tests for mental development. Mere beauty does not count, but the intrinsic value of the baby as a human machine, well proportioned, properly nourished and developed, does.

The baby is to be standardized by means of physical examination or scoring similar to that used in standardizing livestock. Entries are put through the strain are put through careful tests by physicians of recognized standing, and awarded prizes for good records. Babies who fail to qualify have a chance at the next contest, for their parents are told just what is wrong with "The baby" and the trouble can be relieved or cured by hygienic living and simple medical care.

Parents are given prizes for healthy offspring, and also score cards showing the child's exact physical condition. This record can be kept from year to year and not only the parental pride aroused and an interest in child-study created, but the child itself, seeing how its body and mind are respected by its parents, soon learns to care for both and to study itself intelligently. What the parent card is a stimulant to the student, this score card is to the growing child as an impetus to right living.

FIRE BURNS OVER TRACT NEAR CITY

A tract of land owned by W. F. Chandler about half a mile northeast of the city limits was burned over last night, but as far as could be learned no damage was done. There was a small house on the tract that was occupied. It is not known whether this was destroyed or not. The land was covered over with brush, and Chandler said, when informed of the fire, that as far as he was concerned there would be but very little damage. Neighbors were not at all alarmed about its spread. The glare was seen in the city and also out in the country for several miles.

ATLANTA POST NO. 82 G. A. R. ATTENTION COMRADES

In conformity with a vote of the Post, you are hereby ordered to assemble at the post headquarters on Sunday next, September 29th, at 1:45 p. m., and be ready to take car for Mountain View cemetery promptly at 2 p. m., to participate in the flag presentation exercises by the Spanish McKinley Tent No. 8 Daughters of Veterans. The United Spanish War Veterans are hereby invited to join with and act as escort to Atlanta Post G. A. R.

By order of J. D. STONE, Commander.
J. E. BURNS, Adjutant.

REPORT FAVORS ABOLISHING COURT

Sub-Committee of Senate
Disagrees With Attorney
General McReynolds

WASHINGTON, Sept. 27.—A sub-committee of the Senate appropriation committee, decided today to recommend the abolishment of the United States commerce court in practically the same terms as were contained in the deficiency appropriation bill recently passed by the house. Hearings held by the sub-committee brought many protests against the proposed action, Attorney General McReynolds being among those in advocacy continuing the court.

The future of the court will depend on the action of the full appropriations committee of the Senate when it takes up the report of the sub-committee.

LOSS OF TWO FINGERS HOLDS UP A SHIP

SAN DIEGO, Cal., Sept. 27.—Lashed for the sum of \$10,000, the British steamship *Arctico*, now lying at the La Playa wharf, may be compelled to remain here for several weeks. Oscar Olsen, a stevedore in the employ of the Golden Gate Stevedoring Company of San Francisco, suffered the loss of two fingers and a part of the hand, September 18. Olsen filed suit for damages.

CONVICTED OF ATTEMPT TO DYNAMITE A STORE

BEDDING, Cal., Sept. 27.—George Milotte, one of a gang of dynamiters who attempted the destruction of the home of Leo Grimonte, storekeeper for the Wood Lumber Company at Wood, on May 3, was convicted today of conspiracy by a jury at Yreka that had listened to testimony for two weeks.

Milotte and one of his companions, accused by a grievance against the lumber company, went to Grimonte's house to dynamite it. Through information received from one of the band officers learned of the plot and were at Grimonte's home when the dynamiters arrived. A gun fight resulted and four of the conspirators were captured. Two of them pleaded guilty and were sentenced to fifteen years in San Quentin.

The trial of C. Vigna, another of the gang, begins Monday.

MIGHT BE WORSE

Conversation turned to the Balkan scrap a few days ago when Congressman Bryan T. Mahan of Connecticut was reminded of a little incident that recently happened in one of the metropolitan cities.

A young man was going along the street with a newspaper in his hand, so related the Congressman, when he overtook an acquaintance.

"I have just been reading about the Balkan war," the man remarked. "Did you ever try to pronounce them blounts?"

"No, it's too much trouble," answered the Congressman. "They look as if they were cooked in a baked bakery. It's a mighty poor job to have to do."

"That's so," admitted the other. "But it's a whole lot better to have a war than a baseball league."—Boston Advertiser.

LOS ANGELES, Sept. 27.—The automobile will have no place among the possessions of wealthy J. P. Hopperstead until he is 21 years of age. This was the substance of an order of the probate department of the Superior Court filed today in sustaining a provision of the will of the boy's father, the late E. W. Hopperstead.

BRIEF EDITORIAL FANCIES SELECTED

Woman of the Future

Under the above absorbing title the London "Pall Mall Gazette" has stirred up a hornet's nest of vigorous letters. The original article took a rather gloomy view of present feminine tendencies. The writer spoke respectfully of the Victorian type of woman now vanished from the British Isles. The new independence and vigor seemed to him poor substitutes for the fine feminine virtues of a half century ago.

Since then every angle of the subject has been discussed. Women are going to the dogs. Women were never so glorious. Woman has not budged an inch. And so on. The one clear fact seems to be that England is very much excited about her woman and not all sure whether she is drifting.

For a sample of the optimistic view let us quote from the letter of an actress:

"I have a profound and growing admiration for women; they seem to me to be becoming finer, with a great strength and self-reliance, a splendid sense of humor, and a knowledge of things as they really are, which cannot but be a help to them in their making."

Equally in love with the modern female is a man who feels that to pass from the 1830 girl to the girl of 1913 is like passing from a stuffy room into the fresh air. He continues:

"The fainting, mincing lady of the early Victorian era simply cannot be compared with the girl of this day, acquainted with cold water, fresh air and sunlight, any more than an over-ripe orchid can be compared with the freshly blooming flower. The modern girl, unlike her granny, does not swoon at the sight of the curate. The curate is most likely to swoon at the sight of the modern girl. She does not avert her body with garments so that she cannot move freely or decently. She does not fill her mind with saccharine, nor spend hours in sighing for him, nor waste cotton and thread in manufacturing inanities in her leisure moments. Nor allow in her intellect, nor rigidly close her mind to the things that matter."

At the other extreme are the Victorians, who have it that the modern

ALBANIANS INVADE SERVIAN TERRITORY

BELGRADE, Serbia, Sept. 27.—A force of 50,000 Mohammedan Albanians, equipped with modern arms and machine guns, advanced today on the towns of Kitchovo, Philip, Pristina and Lelava. The Servians did not offer any resistance to the advance of the invaders here, declaring that several days must elapse before the Servian commanders are able to mobilize a force of troops sufficiently strong to deal with the Albanians.

Woman cannot compare with her mother or grandmother in health, courtesy, ability or morals. One elderly correspondent especially resents the charge that the Victorian lady "fainted" and "minded." The buxom, rosy cheeked girl in Leech's drawings she puts forward as the true type of the past. As for the present, this writer complains of the "brusque" manners of the young girl of the period, and thinks that cheap emotions and cheap feelings have taken the place of the old-fashioned, cheap virtues and cheap graces. He worked a feigning of feminine character.

From these extreme views we may turn to another Victorian, who offers a middle course. This letter writer, a man, like the older generation and the younger as well. Restlessness, he concedes. But he sees "no evidence of the fatal dry rot which the women of the past suffered from. The women of the Second Empire in France," he concludes:

"The old, invincible Mutterdrang will keep the majority of women true to their compass. If men will only permit them to fill themselves."

This seems excellent sense with which to close this symposium on the most interesting subject in the world. New York Tribune.

Fighting Linotype Machine Trust

The fighting of a trust is a hard game. The Mergenthaler Linotype Co., which has been supplying the printing trade with the only successful type casting machine for the past twenty years, has been met with a competitor in the person of the Linotype, a machine patented after the Linotype. Many of the patents of the Linotype have been expiring and the new company has already spent \$1,000,000 in perfecting their competing machine. Recently the Mergenthaler people filed three suits against the Linotype people on the infringement of patents. This is all interesting to the printing craft because of the vital relation it bears to the same, and the fact that the multi-millionaire company is determined to throttle the new concern is being watched with interest.

The Linotype has been a God-send to the printing industry, and with the coming of the competing machine there is likely to be some decided changes and revolutions in the business in the next few years.—Dinuba Sentinel.

Dooming a Million To Poverty

When the schools of the country opened this morning, the other morning, to receive the children's army there were 1,000,000 boys and girls missing. They failed to answer the call of the school bell at 8:30 because they had answered the call of the factory whistle at 7. One million children under 16, who should have been in school when they were 10, have been swallowed up by industry. According to Owen R. Lovejoy, secretary of the National Child Labor Committee, nearly all these 1,000,000 boys and girls are doomed to a life of poverty, wretchedness or crime. All the girls and nine tenths of the boys are doing no work, Mr. Lovejoy asserts, and cites statistics to prove his assertion, and enters low-wage industries. Their lack of education combined with tender constitutions such as they must have at so young a period, makes them fit for "child labor" and unfit for anything else. They grow up into manhood without trades and with poor physical health. Much has been said about the deficiency of our school system. Nothing, however, condemns it so strongly as the 1,000,000 handicapped boys and girls who are allowed to drift into the cupboards, to drift into the streets, and, unaided, with a miserable education and no advice, in face of these 1,000,000 children what argument can prevail against the insistent call for vocational training and vocational guidance in public schools? The schools of the country must extend their influence and activity so as to give children not merely a book education, but also practical help in determining on the vocation they are to follow, or else stand condemned as backward and inefficient.—Chicago Tribune.

Was Sir Walter Raleigh Ever Visit America?

(Continued from page four)

signs in the Bulletin library is dated October 5 of that year, and is printed in full in the second volume of Edwards' biography. It is addressed to the Earl of Leicester from Winster, and shows that Raleigh was not in the United States when he was in the country. The fifth voyage took place in 1590, when Raleigh was most probably in Ireland in the company of Spenser.

These statements would indicate that the early historians and illustrators of Raleigh's life were not correct in their assumption that he was in the country in 1585. There is no reason to doubt the accuracy of the declaration made by Prof. J. K. Laughton and Sidney Lee, the authors of the memoir of Raleigh, that "he had no personal share in the actual expedition to Roanoke and never in his whole life near the coast of Virginia."

How the tradition arose is a matter of conjecture. The circumstances of the new land having been discovered by ships sent out by and belonging to Raleigh, and the name of Raleigh being in the mind of the public with his name as that of the actual discoverer. The tradition would seem to be the natural outcome of such a belief.

In his "Life of Raleigh," prefixed to the edition of the "History of the World" written by Sir Walter, published in 1738, W. Oldys seems to have been the earliest biographer of Raleigh who pointed out that the statements generally prevalent as to the discovery of Virginia by Raleigh himself were "all fancy and fiction." Since then most writers appear to have abandoned the early tradition. Therefore, it had been pretty generally accepted that Raleigh never visited any portion of the present United States, although his name is most closely connected in many ways with our early colonization.

TOMORROW—WHAT WAS THE PALATINE LIGHT?

CHARGES AGAINST JUDGE AND DISTRICT ATTORNEY

BELLINGHAM, Sept. 27.—Charges were filed with the Whatcom County Bar Association today against Superior Judge E. B. Harkin and Prosecuting Attorney Frank W. Bly and referred to a committee. The officials are accused of violating their oath of office.

EDITORIAL

Are you prepared for an accident? This may be an unpleasant suggestion, but it is a vitally important question for every housekeeper to ask herself.

No telling when a slight or even a serious accident may occur and when bandages, absorbent cotton, antiseptics, etc., may be an instant requirement.

It might be well to take an inventory of your drug supply—you take a list of your kitchen requirements every day or so. Are you as careful to keep up your stock of household necessities, especially emergency drugs?

And when your list is made out, bring it here to be filled. For we have all sorts of supplies that are needed for such cases. We have suggestions to offer that you will find very helpful.

You know that our prices on such articles are always reasonable and that the quality is the very best.

Ask the Girl What Candy She Prefers—She'll Probably Answer You, "Lenhardt's"

Just ask the girl what kind of candy she prefers. "Lenhardt's."

Ton to one she'll say, "Lenhardt's."

This is the candy that we introduced into Fresno. And it has certainly found favor.

It is preferred to any other candy. There's a good reason for this, too. We won't tell you what the reason is. You will discover it the first time you try Lenhardt's.

It is not surpassed by any candy at any price. And it is only 50c a pound.

These extracts we have now will give you better satisfaction than any you can get elsewhere. In fact, during our vacation sales, in offering them at special prices, we succeeded in introducing both extracts in a number of our households. The result has been that several ladies have

THOSE DAINTY LUNCHEONS

That Are Served At Bowman's Have Become Immensely Popular

AT THE SODA FOUNTAIN

Are you going to be in Fresno during Fair Week? Here is a suggestion that has occurred to us. You will probably be up town at noon and wonder where you can get a light, dainty, appetizing lunch.

We haven't called attention to our lunch department for so long that you may have allowed it to slip your mind. So we are going to tell you about it.

It is run in connection to our soda department. The lunches are dainty, and nicely served but are substantial enough to be entirely satisfying.

Bowman's has become a regular lunching place for many persons. You'd be surprised at the number who come in each day.

Of course you'll want ice cream, ices, and all sorts of refreshments.

We have a deserved reputation for having the best. The service is prompt and satisfactory, too.

This Week Is Fair Week. Be Sure to Visit Bowman's.

FILMS DEVELOPED AT BOWMAN'S RECEIVE PERSONAL ATTENTION.

There is a Good Reason Why We Do Such a Wonderful Business in This Department.

Even if you had the time and the experience and the right apparatus you probably could not develop your own films as well as you can get them developed at Bowman's.

Every film receives personal attention from an expert. They are not all piled into a tank in a batch and all taken out in a heap, but each film is handled individually and developed to its complete possibilities under the direct supervision of a man who makes a profession of film development.

This is the reason why the work turned out by Bowman's is always so satisfactory.

spoken to us of their exceptional quality. A two ounce bottle for 25c.

HAVE YOU A THERMOMETER FOR FEVER HANDY?

A Positive Necessity To Every Household Where There Are Children.

Every family should have a fever thermometer in that it can be used at all out of doors.

Immediately determine upon the advisability of sending for your physician—thus often preventing serious illness.

They're so simple, and easy to use that even a child can understand how to take a reading and by having one at hand you can be eased much anxiety.

Of course, a fever thermometer must be scientifically accurate and certified by the United States National Standard.

The difference in time necessary to take the temperature makes the difference in price—75c, \$1.00 and \$2.00. For family use we suggest the dollar one.

BOWMAN'S FLAVORING EXTRACTS

You want the best flavoring extracts you can get—don't you?

You use no little and so much depends upon them that the very best seems almost essential.

We make Vanilla and Lemon Extracts in our own laboratory following the exacting requirements of the United States Pharmacopoeia.

These extracts we have now will give you better satisfaction than any you can get elsewhere. In fact, during our vacation sales, in offering them at special prices, we succeeded in introducing both extracts in a number of our households. The result has been that several ladies have

Exhibit of
"Universal Stoves"
At the Fresno District
Fair.

We Are Now Showing A Complete Line Of Universal Stoves And Ranges

In order to keep our line of Universal Stoves and Ranges complete we have had to order 2 carloads already this year. This is the strongest indication of the demand for these famous stoves and ranges. They have made a lasting reputation.

This is a line of stoves and ranges that is known all over the country. Everywhere you go you will find that this stove is the favorite. The strongest recommendation of all is that it has been a favorite for so many years. The makers have been manufacturing this stove for 60 years.

Every Stove or Range Is Guaranteed to Give Satisfaction. We Have Sold Them for 12 Years.

We have sold Universal Stoves and Ranges for the last 12 years.

People who bought the first that we sold are still using them, entirely suited with the service that they give, absolutely satisfied in every way.

The new stoves and ranges are better than ever before. They have every merit that can be asked for. They have all of the improvements and conveniences that give better service and make work easier for the user.

We want you to see Universal Stoves and Ranges. We want to be allowed to demonstrate their many superior qualities. We want to show you how complete they are.

Here is a feature that will appeal to every housewife. That is the fact that the oven bakes so perfectly.

Every woman will appreciate this fact. Every woman will appreciate the advantages of having a range that will bake bread and pies and cakes without burning them on either top or bottom.

This is due to the construction of the Universal. The heat of the oven can be regulated.

It saves fuel. It secures the utmost heat value from the fuel used.

SEE OUR BIG EXHIBIT AT THE FRESNO DISTRICT FAIR

H. GRAFF & CO.

FRESNO, CAL.

2 Carloads
Received

We have already received two carloads of Universal Stoves and Ranges this year.

No fact can be more significant than this one. The Universal gives satisfaction.

So we sell these stoves and ranges in tremendous quantities.

But although the second car has already arrived, there is reason to believe that even it will be inadequate to supply the demand.

More may be needed.

Each year the demand for Universal Stoves and Ranges grows greater.

Ask any woman who uses a Universal.

Y. M. C. A. Gives Splendid Musical Program Tomorrow

One of the best balanced and most attractive musical programs that has been presented in Fresno for many months will be given at the opening reception of the Young Men's Christian association tomorrow evening. Final arrangements for this excellent entertainment were made last evening at a meeting of the social committee at the Y. M. C. A.

Previous to the musical program, which will be given in the social hall at 8:15, will be a reception of visitors and acquaintances in the Y. M. C. A. plunge. Gynasium seats will follow the music.

The final program for the music follows in full:

PROGRAM

Piano solo: "Minuet" Tour, Mr. and Mrs. Earl Towner.

CHEESMAN PLACED ON PAROLE FOR 4 YEARS

Judge Church overruled yesterday Probation Officer Sessions' recommendation that Bert Cheesman of Tallhause be not paroled, and released him on probation for four years. Cheesman is required during that period to abstain from the use of intoxicants, to conduct himself as a good citizen and to report monthly to the probation officer. In admitting

Vocal solo: "Oh Heart of Mine" (Galloway), Mrs. Shirley Shaw. String quartet: "Melody in F" (Rubenstein); Raymond Bouthal, first violin; Timothee Dion, second violin; Walter Bouthal, viola; Clarence Gellert, cello.

Recitation (Selected), Miss Christina Ellithorpe.

Vocal solo: "I Hear a Thrill at Eve" (Charles), Harold Cadan? (B) "A Little Thief," Leo Stern—Miss Julia Harris, Miss Martha Harris, accompanist.

"Movement Musical" (Shubert), string quartet.

Vocal duet: "The Rosary" (Nevin), Mrs. Shirley Shaw and John Shishman.

Cello solo (Selected), Edward Leopold.

MUSICAL

Cheesman to parole, the court also overruled the protest of District Attorney McCormick. The plea for suspension of sentence was fortified by a written request of residents of the Tallhause and in Fresno city who had known the accused for periods ranging from five to twenty years and who vouched for his industry and as a good provider for his family.

Bell T. Ritchie lately returned from a season study under Wallace Babbin of San Francisco, opens her studio October 1st, at 1647 T street. Phone 3320. —Advertisement.

WILL TAKE LABOR DELEGATES ON AUTO TRIP

Nineteen Machines Promised Commercial Club for October 9

More Autos Needed to Care for About 250 Labor Men

Arrangements are now being made by the Commercial club of Fresno for the taking of delegates to the State Labor convention, which will be held in this city next week, on an automobile sightseeing tour on Thursday afternoon, October 9.

In order to do this the Commercial Club has issued requests to 100 people and firms about the city who own automobiles, asking them to contribute their cars for the use of the delegates on that afternoon.

There will be about 250 labor men for whom provision will have to be made on this trip, which will take, on an average, of four to a machine, about sixty automobiles.

Up to the present time nineteen automobiles owners to whom requests were sent have written to the club stating that they would donate their machines on that day for the use of the delegates.

It is believed that sufficient other automobile owners in this city will notify the Commercial Club that their machines will be contributed to the use of entertaining the delegates to insure them all a chance to see Fresno and the resources of the surrounding country.

Among those who have offered their machines for the use of the labor delegates are the following: J. C. Forger, L. W. Wilson, J. D. Wirt, J. D. Elbert, A. Butcher, J. G. Martin, H. H. Holland, M. H. Whipple, C. S. Pierce, W. A. White, Ewing-McDonald Co., Fresno Republican, W. E. Toomey, C. W. Musick, Levy Bros., Ben Epstein, J. F. Grier, W. W. Eden and J. B. Daly.

The cards which are being sent to the Commercial Club are as follows: Dear Sir: The undersigned will donate the use of his automobile for the use of the delegates to the State Federation of Labor convention on Thursday afternoon, October 9, 1913, at 2 p. m., and can accommodate passengers. Very truly yours,

(Name of donor.)

FINAL PARK SERVICE

OF Y. M. C. A. TODAY

Dr. G. C. Butterfield of Los Angeles Speaks On "Why Read Bible?"

The final park service to be held this season by the Young Men's Christian association will take place at courthouse park this afternoon when Dr. George C. Butterfield of Los Angeles will speak upon "Why Read the Bible?" Dr. Butterfield is a well known Bible student and is one of the state secretaries of the Presbyterian church engaged in Bible school work. He is also to take part in the big Sunday school rally at the Presbyterian church in the afternoon and will occupy other pulpits in the city morning and evening.

The Y. M. C. A. quartet will sing at this service and Dr. G. Dahlinger contribute a cornet solo.

Prof. F. M. Cobb will begin a series of lectures on travelogues at the Y. M. C. A. the first Sunday in October.

RECORDED DEEDS

JAIL MADERAN ON STATUTORY CHARGE

E. H. Caswell, aged 34, and Wilma Omer, aged 12, were arrested yesterday by Detectives Enos and Goehring and Caswell was lodged in jail on a statutory charge while the girl was taken to the parental school and is being held as a delinquent child. The man and child were returned there for trial. Caswell admitted taking the girl to a lodging house and registering as father and daughter. According to the police Caswell is engaged to marry the mother of the little girl. Mrs. Omer is now in a local sanitarium and Caswell brought the child to Fresno Friday night to see her mother.

DIRECTORS TO FILE REPORTS TUESDAY

Directors of the Fresno-Hanford and Summit Lake Railway Company did not file any completed papers before the railroad commissioners in San Francisco Friday because Commissioner Loveland, who has heard all of the previous hearings, was in Los Angeles. Attorney H. P. Brown, one of the legal advisers for the interurban directors, returned from San Francisco yesterday. The directors will appear before the commissioners next Tuesday.

MORRIS GETS HEARING BEFORE COMMISSIONER

W. A. Morris, charged with having concealed assets of a bankrupt, was given a hearing before United States Commissioner Campbell yesterday and the case was taken under advisement. Morris was represented in court by Attorney Beaumont. Morris took the stand in his own behalf and said he did not know he had to declare the property which he had held out. Morris recently conducted a store in the mountains and was adjudged bankrupt last year when he was arrested in Bakernfield when he tried to dispose of gloves and it was found he had violated a federal law.

Assets of Bankrupt; Case Pending

On the promise of the Fair Association to furnish all the postoffice employees with complimentary tickets to the county fair, Postmaster Earle Hughes wired Washington, asking that a half holiday be granted Thursday afternoon, "Fresno Day" at the fair, in conjunction with the closing of the stores of the city. He yesterday received permission from the government to do so.

POSTOFFICE WILL CLOSE HALF DAY

Thursday afternoon there will be no windows open at the postoffice and but one delivery of mail will be made and that in the morning.

See the Wall Paper Here That You'll be Glad to Have in Your Own Home

"A Secret That Makes Hair Grow Wonderfully"

SOME of the most remarkably effective Beauty Secrets Ever Revealed. Formulated by Valeska Suratt, the Famous Self-Made Beauty Actress.

By Miss Valeska Suratt.

I HAVE been through the mill of weary waiting, long struggling and exhausted patience in the use of the ordinary hair tonics recommended. I know how many months it takes to produce with them even a slight result. So much greater was my astonishment after using the following formula, which I perfected myself, in seeing a marvelous difference at the end of a few weeks in the length of hair—the fullness of its growth and its life-revealing sheen and gloss. All who have tried it, express the same astonishment.

You take a half a pint of water and mix it with half a pint of alcohol (or plain take a full pint of imported dry gin) and add to it one ounce of beta-quinol, which you can get at any good drug store for not more than fifty cents. After mixing thoroughly, it is

ready to apply. In a week or so you will admit the wonderful efficacy. The hair stops falling, thin spots fill out, and the hair grows in a most decided manner. As a result of this formula, I never have to wear any switches, wool rolls or other hair makings, and am known as the only woman on the American stage who does not have to do so.

The prices are far less than you ordinarily pay for such good qualities.

Patterson-Dick Co.
1937 Fresno Street

CLARA R. G.—I have known many women past 45 who have used this wrinkle secret with the most astounding results. I am not exaggerating when I say that they have been able to make themselves look like 35 in the prime of womanhood. In a half pint of water add two ounces of alcohol and two teaspoonfuls of glycerine. Keep stirring until cold. Use very little. Rub it in and rub it in. It is a most wonderful and effective. You can get it at any good drug store for not more than fifty cents at the drug store.

DETERMINED—Twelve ounces of granulated sugar, one ounce of vanilla (which you should get by the ounce in the drug store) all dissolved thoroughly in a pint of water, and taken in doses of one teaspoonful of sugar in half a cup of hot water and apply. You can get enough sugar at the drug store for twenty-five cents to last several months. You will never use any other head wash again.

THANKFUL—It sounds very remarkable to be able to get rid of big and little blackheads in a few minutes. Nevertheless you can do it easily by sprinkling some borax on a sponge, wet with cold water, and rubbing it on the blackheads. The borax can be obtained at any drug store for fifty cents. You will quickly get rid of every blackhead.

BLANCHE N.—I know of only one shampoo which will leave the hair in a condition that it will remain "done up" after washing, such as at the same time get every particle of grease and dirt out of the scalp which soap and water can never do. Dissolve one teaspoonful of egg in half a cup of hot water and apply. You can get enough egg at the drug store for twenty-five cents to last several months. You will never use any other head wash again.

LUCINDA, L. R.—If more young and middle-aged women would use this for development of the bust, pads would soon be out of date. I wish this formula were more generally known, being so simple, safe and effective. Put mix one pint of cold water, two ounces of custard (which will cost a dollar at the drug store) and half a cup of sugar. When thoroughly dissolved take two tablespoonfuls three or four times a day in a little water.

The Lockwood System of Dentistry Without Pain

LECTURE No. 81.

Bridgework

There are doubtless many people that realize they are in need of bridgework and appreciate the advantages of having it done. The reason they do not have it done is the fear of pain. The prevailing idea is that the operations necessary to prepare the mouth for bridgework is accompanied by the infliction of considerable pain.

With MY SYSTEM it is not necessary for the patient to endure any pain at all. In a measure this accounts for the great amount of bridgework that I do. I have made a specialty of bridgework for fifteen years and have gained an enviable reputation for doing this work in a manner that ensures satisfaction and permanency of the work. My prices are moderate.

SENATOR BRISTOW OF KANSAS ON FREE TRADE IN SUGAR

"I cannot understand how anyone can believe that it is for the best interests of our country to destroy our home production of sugar. First, it will lessen the amount of the sugar supply of the world and result in an increased price everywhere. This is clearly demonstrated in the great advance in the price of sugar in 1911. The world produces about 18,000,000 tons of sugar per year; we consume approximately one-fifth of the entire world's production. In the sugar year 1911-12 there was a shortage in the world's production of about 10 million tons, and the price of sugar in the United States went up as high as \$7.50 per 100 pounds, an advance of about 25 per cent."

"The enactment of free sugar legislation would reduce our production at least a half million tons. A shortage of a half million tons in our own production would inevitably have a corresponding influence upon the world's price, and the benefit expected by the advocates of this bill in sweeping reductions in prices would not be realized."

WOULD GIVE REFINERS MONOPOLY

"The greatest objection to the destruction of the American industry, however, is that it would give the sugar refiners a monopoly of our sugar market. Tropical sugar is produced in a raw state, shipped to the United States and there refined, and then put upon the market as refined or granulated sugar. The refining business is controlled by three concerns, with headquarters in New York. They cooperate in fixing prices. Their only competitor in our market is the American beet sugar producer. When the refiners control the market they fix the price as high as the market will stand regardless of the cost of production to them. Their resources are so tremendous and their financial strength so great that no cane sugar producer in any country could have the hardihood to fight them in a commercial warfare for the control of the American market. So with the beet sugar producer eliminated they would be supreme in the sugar market of this country. A few years ago, when they learned of the

possibility of beet sugar production in our country under the protective duties that existed, they started this campaign for free sugar. Their purpose is to destroy the beet sugar industry. It is their only competitor in this market. The legislation proposed in this bill will destroy that industry in the United States, and the refiners are for it. And it should not be forgotten that it was the cane refiners that robbed the United States treasury a few years ago of millions by a system of false weights. They will profit more by the legislation than all others, for it will put out of the way their only competitor in our market, and then they will raise the price as high as they can. In fact, up to this time the greatest advantage which the beet sugar producers have been to the people is in beating down the excessive prices which the refiners charge when they control the market. This is illustrated by the rise in the price of refined cane sugar when the beet product is exhausted and the decline in the price when the beet sugar is being put upon the market in large quantities."

VOTE FOR FREE SUGAR A VOTE FOR THE TRUST

"When you place sugar on the free list you place it in the hands of the sugar refiners the weapon with which to destroy their competitor; and, having destroyed their competitor, they will exploit this market to their heart's content. However worthy may be the motives of those who vote for free sugar, they are, in fact, voting directly the interests of the Sugar Refining Trust and handing over to it, for exploitation and pillage, the greatest market for refined sugar on the earth."

"I believe that the duty of \$1.50 per 100 pounds, when it was imposed in 1897, was justified. Since that time we have developed the saccharine methods of extraction so that now the cost of producing 100 pounds of beet sugar in the United States has been reduced, and a large duty as was necessary in 1897 is not now needed."

PROPOSES GRADUAL REDUCTION

"Believing that the present duties should be lowered, I have submitted an amendment which reduces the general duty on the refined sugar from \$1.50 per hundred, as now provided for in the law, to \$1.52 1/2. It then provides for additional reductions in periods of three and six years until the duty is finally reduced to \$1.25. It leaves the Cuban 50 per cent preferential duty unchanged, and I do not think it wise at this time to disturb the reciprocal relations we have with Cuba; and under this amendment, the duty on Cuban 50, which is the real protective duty the American producer receives, will be reduced immediately to \$1.25 and ultimately to \$1.25 cents. I believe these reductions can be made with absolute safety to our sugar industry and that it would continue to grow and prosper. If this should prove to be true, then we will have developed a domestic sugar supply at a less burden upon our people than has any other country in the world's history."

"The amazing thing to me is that men who know that this bill is wrong are not only willing to acquiesce in its passage, but are actually supporting it. If every senator in this body should vote his honest judgment on this schedule, it would be defeated. There are many senators here who believe free sugar is wrong and not for the best interests of their country, yet they will vote for it. They say that they do this for the sake of party harmony and regularity. They are obeying the dictate of a party caucus against their conscience, the interests of their constituents, and what they believe to be the welfare of their country."

CAUCUS DOMINATION DENOUNCED.
"This leads me to suggest that while I believe the bill itself to be imperfect and unjust, I regard the manner of its preparation as infamous. Four years ago, with all the vehemence of which I was capable, I denounced the stiff-necked and arbitrary methods of the Republican leaders then in control of the national legislature, and I hold the same views now. But Mr. Aldrich, at the very apex of his political power, when he dominated the proceedings of this chamber as few men have in the history of this country, used the hardihood to propose such outrageous and unwarranted methods in the making of his tariff bill as have been followed by the majority in control of this Congress. Bold as Mr. Aldrich was in the execution of his desire, he never undertook to perfect legislation in the secret sessions of a partisan caucus, where debate was stifled and wily statesmen with im-

munity could conceal their attitude on vital questions from their constituents. The public knows nothing of the positions taken by its representatives in the star-chamber proceedings of a secret caucus except as information leaks out through the keyholes. By the caucus process less than 20 per cent of the members of this body can control its action, and I have been informed that in the making of this bill that has actually occurred. Not fallacious self-interest, but a great big like this, affecting thousands of industries and the welfare of millions, in a recent party caucus, where the people of the country are not permitted to know the position taken on such measure in detail by the men sent here to represent them, is a menace to free government, and the party or administration that is responsible for the establishment of such a system of legislation merits the unmeasured condemnation of the American people."—Senator of Kansas in Address to Senate.

CLASSIFICATION OF DEPOSITS OF COAL

Range From Anthracite On
the One Hand to
Lignite

The classification of coal into various grades, such as bituminous, semi-bituminous, and lignite, is arbitrary and unsatisfactory, but it is in common use in the United States, and in the absence of anything better it is published by the United States Geological Survey. The classes generally used in the United States are as follows: Anthracite, semianthracite, semibituminous, bituminous, subbituminous, lignite.

Anthracite coal is generally well known, but in a systematic classification it is generally defined as a hard coal having a fuel ratio (fixed carbon divided by volatile matter) of not less than 10. Most of this coal comes from the anthracite fields of eastern Pennsylvania, but small areas are known in some of the western States where the coal has been changed to anthracite by the heat and pressure of masses of igneous rock.

Semianthracite coal has a fuel ratio ranging from 6 to 10. There is only a small amount of this coal in the United States, found in local areas or in close proximity to igneous rocks. Semibituminous coal is of great commercial importance but is not widely distributed. Its fuel ranges from 3 to 6. It is the best steam coal in the country, and it is the coal that is utilized in the manufacture of coke. The centers of production are the Pocahontas and New River fields of Virginia, the Georges Creek field of Maryland, the Clearfield field of Pennsylvania, and the west-end-of-the-Arkansas field in the vicinity of Fort Smith. Though small areas containing coal of this grade have been found in Washington and Colorado, the amount of coal in these fields is small.

BITUMINOUS; SUBBITUMINOUS.
Bituminous coal is the most important grade of coal in the country and includes most of the coals east of the Rocky Mountains. In the western States there are large areas of bituminous coal found in the Trinidad-Raton field of Colorado and New Mexico; the Grand Hogback field of Colorado; the Book Cliffs of Utah; Rock Springs, Kemmerer, and Black Hills fields of Wyoming; the Great Falls field of Montana; and many districts in Washington. This grade furnishes most of the coking coal of the country, and it is largely sold for steam raising and domestic use.

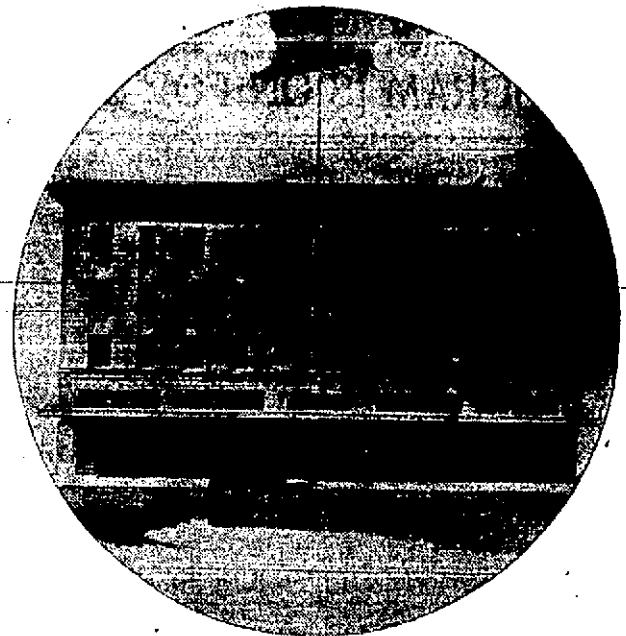

The term "subbituminous" has been adopted by the Geological Survey for what has generally been called "black lignite." The latter term is objectionable, for the reason that the coal is not lignite in the sense of being woody, and the use of the term implies that the coal is little better than the brown woody lignite. North Dakota, whereas many of the coals of this class closely approach the lowest grade of bituminous coal. In fact, it is extremely difficult to separate this class from the one below and the one above. It is generally distinguished from the lignite by its color and freedom from apparent woody texture and from bituminous coal by the slacking it undergoes when exposed to the weather. As the latter is an important difference in its domestic use, it has been adopted by the Geological Survey as a criterion for the separation of subbituminous and bituminous coals.

Subbituminous coal is found in most of the western fields, being well known in the field about Boulder and Denver and in North Park, Colo.; Gallup, N. Mex.; Hanna, Douglas, Sheridan and the Bighorn Basin, Wyo.; Red Lodge and Musselshell, Mont.; and in many of the districts of Washington and Oregon.

As used by the Geological Survey lignite is restricted to the coals that are distinctly brown and generally woody. They are subbituminous coal. Lignite is abundant in the North in eastern Montana and North Dakota and in the northwest corner of South Dakota. In the South it is present in all of the Gulf states, but it has been developed commercially only in Texas.

ON HIS JOB.
"The directors of the company, all being young, decided to have some fun at the expense of an old man to whom they had recently given employment at their timber office. One day, therefore, they left the new hand in charge, with the instructions to take all orders which might come in during their absence, and repaired to a neighboring postoffice whence they proceeded to call up the company's office on the telephone. The following conversation took place:—
"Hello! Is that the John Doe Timber Company?"
"Yes, sir. And what is he havin'?"
"Take an order, will you?"
"Sure, that's what we're here for."
"Please send up a thousand knot holes immediately."
"A thousand what?"
"Well, now, ah, ain't that a shame? I'm sorry, but the just old-hand cut last to the new brewer's this morning."
"To the brewer? What do they want with them?"
"By the powers!" replied the Irishman. "An' they use them for bungs in barrels."—The Wash.

IT WAS A PUZZLE TO HIM.
A man, who went away from home some time ago to attend a convention of church people, was struck with the beauty of the little town in which the anniversary was held. He had plenty of time while waiting about waiting for the village cemetery. It was a beautiful place, and he walked around among the graves. He saw a monument, one of the largest in the cemetery, and read with surprise the inscription on it:
"The Lawyer, and an Honest Man."
"This is his head," he looked at the monument and read the inscription over and over. Then he walked all around the monu-

Sequoia Hotel

No Hotel Can Offer Better Accommodations Than the Sequoia

EVERYTHING that can make the guests of the Sequoia comfortable, everything that can make them feel more at home, everything that can please them is done. The reputation of the Sequoia as a hotel where the welfare of the guests is given consideration by the complete service as well as the up-to-date appointments is becoming known everywhere.

Traveling men prefer it because of its central location.

People from out of town like the Sequoia because they feel at home there. They are made to feel as welcome as though they were regular guests.

These things have united in making the Sequoia the hostelry that is preferred. Although the equipment and service is so essentially high class, the rates are very moderate. Let the Sequoia entertain you.

Much Rivalry in Auto Races

CHOICE PROGRAM IS ON FOR SATURDAY

FAMOUS FIAT RACES "4" WITH FELIX MAGONE AT THE WHEEL. THIS CAR WILL BE DRIVEN BY FRANK VERBECK. MAGONE WILL PILOT A STUTZ.

When the starter's flag falls on the opening event of next Saturday's automobile races, it will signal the beginning of the greatest speed carnival ever held in the San Joaquin valley. Never in the history of the sport has such a classy field been gathered together in this vicinity. Practically every driver is a champion in some recognized department. Probably the most prominent of these at the present time is Earl Cooper of Fresno.

Cooper is the present holder of the world's 200-mile dirt track record. He is also the winner of the 1912 Golden Pollack and Monte-marathon races at Tacoma, the 1913 Santa Monica classic and the 1913 heavy car and free-for-all events at Corona.

Second in importance is Teddy Tetzlaff, holder of the world's road racing record, winner of the 1910 Santa Monica, the 1912 Santa Monica, the 1912 Golden Pollack and Monte-marathon events and hero of many road and track battles.

In third place will be found Edward S. Waterman of Fresno, who is the

Earl Cooper

present holder of the world's light car road racing record, which was made at Corona on the 5th day of this month. Winner of second place in the Los Angeles-Sacramento road race of last Fourth of July and the holder of many local road records.

Another man who is prominent in the motor world is Frank Verbeck of

BEGIN TO SEED NEW RAISINS NEXT WEDNESDAY

First Car of New Goods Is Received At Big Plant of Associated

Payne to Operate It to Capacity for First Time In History

Seeding of new raisins will start at the big plant of the Pacific Coast Seed Raisin Company next Wednesday. The first carload of new raisins arrived at the plant yesterday but is being stored until Wednesday. The Pacific Coast plant is now operated by the Associated Raisin Company.

A large crew has been at work continuously for a long time on old raisins and will continue on old raisins right up to the time that the new raisins will be processed. At the present time six tables are being operated, putting out about eight cars of seeded raisins a day.

As soon as the seeding of new raisins gets well under way, Manager Payne will work the Pacific Coast plant to capacity for the first time in its history. In order to work it to capacity he will have to operate twelve tables, which are capable of putting out about fifteen cars or 300 tons of seeded raisins a day.

A policy of concentration that is to be adopted in the immediate future will make possible the operation of the Pacific Coast plant to capacity. In the past it has been impossible to do this because there has not been enough labor available, but it is said now that the policy of concentration to be adopted by the Associated in connection with its plants, will make this possible.

Payne hopes to be able to be working twelve tables within another week or ten days.

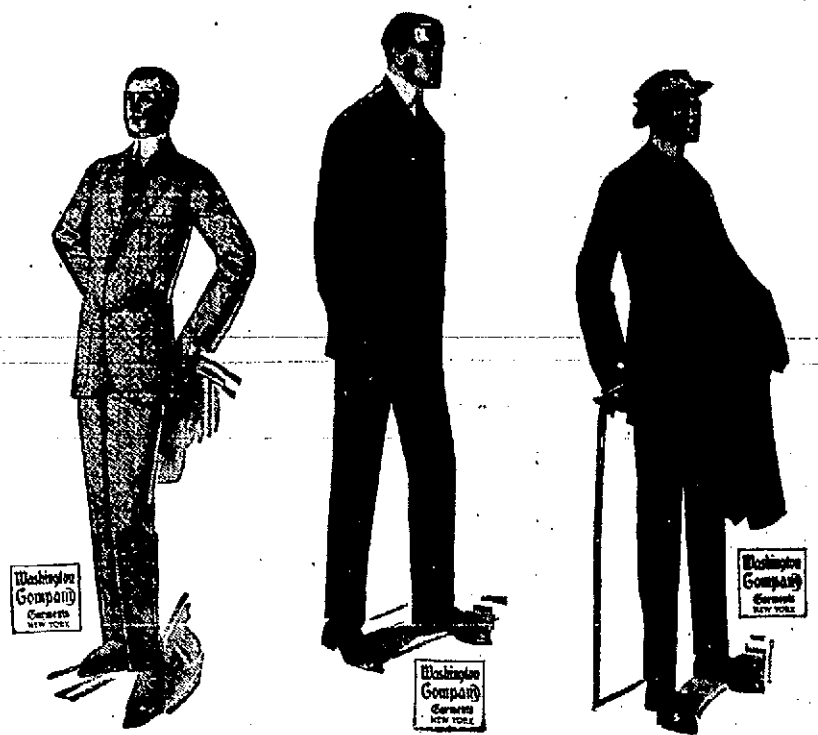

Los Angeles, winner of the Los Angeles-Sacramento road race of this year, and second in the free-for-all event at Corona on the 9th of this month.

RAIVALRY EXPECTED

Tony Jeannette, who will be at the wheel of the National entry, has been the racing partner of "Wild Bob" Burman for the past two seasons and is rated as one of the most fearless drivers in the world. He has many foreign records to his credit, which were made before he began his speed work in this country. Jeannette will either win his events here or force the other drivers to their greatest efforts to defeat him.

W. C. Campbell, who will be another contender in the larger car events, is the winner of the Visalia road race of July 4th and is rated along with Cooper as a consistent driver. His car is capable of eighty miles an hour and should enable him to give a good account of himself here.

Felix Magone, who will pilot the second Stutz entry, was formerly the racing partner of Teddy Tetzlaff and has seen the miles slip by at a greater rate than one hundred to the hour throughout many a hard contest both in America and abroad. Magone is a spectacular driver and has a speedy mount. At the present time there is a great deal of feeling between him and Tetzlaff and his one ambition is to defeat the latter. As a result he

Three of the New Fall Styles Which We Are Now Showing

ABOVE we have illustrated three of the new Fall styles. Examine them closely. You'll find new lines of grace and style in them. They are Washington suits, famous for the perfection with which they fit. It is right in line with the reputation of this store that we should handle suits known above all others for the perfectness of the fit. It is a reputation that we have gained during years of handling only the best. It is a reputation that we have built and maintained.

If you want a suit that follows your every movement, that sets comfortably, yet with the snugness of the new styles, if you want a suit that is correct in every way, that is comfortable, too, and allows the utmost freedom of movement—if you want all of these qualities and more you will find them here.

The dependable correctness of styles, the absolute certainty of the highest quality, the assured values are features that have given McAfee's this reputation.

Arthur McAfee

The Clothier of Fresno

Hotel Accommodations That will make your stay enjoyable.

If you're planning to spend the week in Fresno, or only a few days, you will want hotel accommodations that are conducive to comfort, convenience and happiness; you'll want a room in the hostelry that is recognized as the most cheerful, conveniently appointed inn, in the San Joaquin Valley.

Hughes Hotel rooms are light, large and airy and the spacious reception rooms, with deeply cushioned chairs, make this an ideal place to rest after recreation.

Auto meets all trains.

The only hotel in Fresno that is passed by all Fair Ground cars

Fair visitors are asked to avail themselves of

Hughes Hotel

Hospitality. "Comfort and good cheer await you here"

On Tulare Street Corner of "T"

PLUMBING

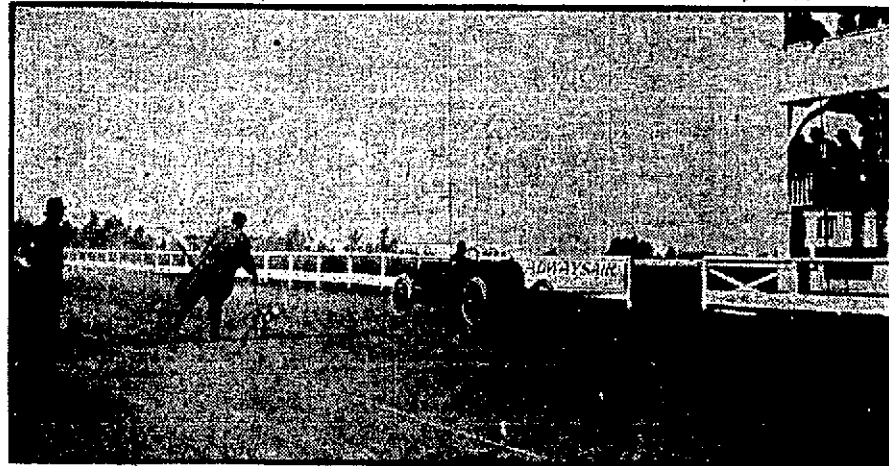

THAT COSTS ENOUGH TO MAKE IT CHEAPEST.

While we charge the lowest prices good plumbing can be executed for, we charge enough to insure absolute sanitary security in every plumbing system we install.

We eliminate the after cost entirely, and make the first cost reasonable.

C. J. BETTERIDGE

The Progressive Plumber. 1141 "H" STREET. PHONE 222

EARL JACKSON CROSSING THE LINE AS WINNER OF RACE ON LOCAL TRACK. JACKSON WILL ALSO PILOT A REO HERE NEXT SATURDAY.

will force his famous rival at every turn.

While less spectacular than some of the other drivers, Harvey Kennedy of San Francisco has a record for consistent and steady driving and will be a serious contender every mile of the quarter century in which he is entered.

COOPER VS. TETZLAFF

It is expected that the real contest will be between Cooper and Tetzlaff, with the advantage so much in favor of the latter that even Cooper is far from sanguine. In fact, he has the opinion that he will be defeated, for in a telegram to his brother, Secretary Cooper of the Fair Association, Earl Tetzlaff is going to use the "flat" cyclone, the latest thing on wheels for truck work. Looks like I was due for the beating of my life in my home town.

Cooper and Tetzlaff have met many times in road race battles, but this is the first time they have come together

on a mile dirt track. In the road duels Cooper has a bit the better of the argument, for he has taken from Tetzlaff, this year, the Golden Pollack, Monte-marathon and Santa Monica trophies, all of which were held by the latter up to this season.

FRESNO AGAINST FRESNO

Many people in Fresno have been anxious to see a race between Cooper and Waterman and this desire will be gratified in the 450 cubic inch race next Saturday. Both Cooper and Waterman are Fresno boys, but it has so happened that they have never been entered in the same contest before. Both of them have all the speed they can use on a mile track and the winner will be the victor because of the better judgment used or the more fortunate alignment of position. In any event it is doubtful whether either of them will be satisfied with the result of one race and it is probable that the winner will be the recipient of a challenge from the loser for a future date.

TEACHERS COOPERATE IN JEFFERSON SCHOOL

Field Deputy Balch Finds Modern Surroundings In Nees District

Field Deputy Superintendent Balch said yesterday that the visit made by him to Jefferson district school on Friday impressed on him as never before what the spirit of cooperation can accomplish with 3 teachers in charge of 8 pupils graded in 8 classes. The intermediate teacher gives her

attention to classes 1, 2 and 3, the principal to 7 and 8, the assistant teacher to 4 and 5 and class 6 is disposed of between them, one in charge during the forenoon and the other in the afternoon. The school is such a large one that the grounds are cramped.

In the Nees district, Mr. Balch says he found one of the most modernized and attractive of newly erected school houses, a brick one story structure provided with 3 class rooms, though only two are used at present with the attendance of 39 pupils. The district built however looking to the future, has equipped the grounds and has set out some playground apparatus. Windmill and tankhouse has been erected with separate wash-rooms for boys and girls, the tank house connected with separate washhouses for boys and school building by a roofed shed used by the children as a place for lounging and as a protection in rainy weather.

TWENTY-ONE Y. M. C. A. JUNIORS CAPTURE SILVER BUTTONS IN SWIMMING TESTS; LIFE-SAVING WORK PROMINENT FEATURE

Twenty-one boys of the Junior class of the Young Men's Christian association won silver buttons for their aquatic skill in the interesting meet held in the plunge at the association building last evening. Diving, endurance swimming and life-saving tests were required of the lads. The medals will be awarded during the symposium hour of the reception at the Y. M. C. A. tomorrow evening by General Secretary Walter D. Eastman.

When the interest of the spectators was at its highest which last evening Irving Toomey, fully dressed and watching the tests leaped from the railing on the second floor into the pool, as if he were about to fall. With a single splash, James Bouma and Al Rasmussen dove in, reaching Toomey in a moment and bringing him to the side. Apparently lifeless Toomey had to be resuscitated, during which, operation Physical Director

Charles H. Toomey explained the reasons for the different motions by which the subject had air forced into his lungs. So vivid were the instructions as worked out by the boys that the lesson will doubtless be remembered. Incidentally, the training in life-saving was so well instilled in the minds of the younger boys that when Toomey fell in, two of the youngsters who did not know that the affair was pre-arranged, bravely leaped into the water to save him though they were distressed by the two other boys who were waiting for the leap. A crowd that could scarcely be accommodated in the plunge, witnessed the contests last evening. The principal idea of the training of the boys by Toomey is to gradually instill the principles of life-saving into the youngsters in order that many tragedies at the seashore that occur from

lack of knowledge of how to save a drowning person may be averted. The tests consisted of a fair dive, swimming two lengths of the tank on the back using only the legs, swimming two lengths with the breast stroke, two lengths with the overhand and two lengths with a side stroke, without a rest. There followed a swim across the tank under water, and the breathing of two holds of an apparently drowning person, and the towing of an unconscious body two lengths of the tank.

The best time for the continued swimming was made by J. McIntosh in 1:50. The best time for the under water swim was 3 seconds, made by A. Lockwood. McIntosh also scored the best dive.

The winners in order were as follows: 1. James McIntosh; 2. E. C. Cuchrane; 3. C. R. Edger; 4. Donald Chaney; 5. Harold Duncan; 6. Harold Hatfield; 7. K. Pratt; 8. Matthew Haler; 9. Robert Elder; 10. A. Lockwood; 11. Riley Staples; 12. M. Clark; 13. W. Daniels; 14. Ray Fellows; 15. S. Knadlian; 16. W. Chapman; 17. C. Hays; 18. C. Johnson; 19. C. Conroy; 20. C. Churchill; and 21. A. Bennett.

The seniors will be given a chance to show their skill in swimming within a short time.

DENATURED ALCOHOL DISPLACES A POISON

Deodorized Wood Alcohol
Cause of Much Injury
and Even Death

What is denatured alcohol? Frequent references to it are seen in the daily papers and magazines, but few know very much about it. Everyone knows what ordinary alcohol is. It is also called grain or ethyl alcohol.

Most governments derive a large revenue from the sale of ordinary alcohol, and its retail price is very high. In the United States it sells for about \$2.40 a gallon. It can be made from corn for less than 20 cents a gallon. The difference between cost and selling price represents the internal revenue tax and the profit of the wholesaler and the retailer.

Apart from its use in making whisky and other beverages, grain alcohol is a most useful liquid, and in most countries is widely employed for industrial purposes—as a fuel, in hat and whip factories, in making varnishes, for cleaning metals, paint, woodwork, in color, chemical and dye works, etc. That grain alcohol may be sold as cheaply as possible for domestic and other purposes, most countries have an untaxed grain alcohol, mixed with wood spirit, benzine or other agents that render it unfit for drinking purposes, and yet permit of its use in the various industries. This is denatured alcohol, a specially prepared grain alcohol, selling for about 50¢ a gallon; cheap because untaxed. Before the introduction of denatured alcohol, people had to choose between paying \$2.40 a gallon for domestic alcohol, or using the poisonous, vile-smelling wood (methyle) alcohol, or they could use the equally poisonous "deodorized" form, which sells at about the same price as denatured alcohol.

About 1890 a comparatively cheap method of "deodorizing" the ill-smelling and vile-tasting wood alcohol was discovered, and under various names, such as "Columbian Spirits," "Purified Wood Alcohol," "Colonial Spirits," "Standard Wood Spirits," "Cologne Spirits," "Union Spirits," "Eagle Spirits," "Green Wood Spirits," etc., this violent poison was put on sale. It was widely and shamelessly advertised and all sorts of virtues were claimed for it, the chief being that it was a cheap and comparatively harmless substitute for ordinary ethyl or grain alcohol. It could be used instead of grain alcohol in making varnishes, liniments, tinctures, hair-dyes, etc., and as a fuel in lamps and stoves. At first its poisonous character was denied in toto. This led to its use in the manufacture of Jamaica ginger, essence of lemon, liniments, alcohol

HUNDRED BANKERS GATHER TO GET ACQUAINTED

Meet At Beefsteak Dinner
In Hotel Fresno;
Enjoy Repast

Discussion of Benefits of
Organization Held
After Dinner

One hundred bankers from Fresno, Madera, Kings, Tulare and Kern counties gathered at the hotel Fresno last night for the purpose of getting acquainted in a beefsteak dinner followed by a general discussion of the benefits of the group system of bank organization, were the processes by which the officers of the banks of a score or more cities, became acquainted.

The meeting in Fresno was the first that has been held by group two of the California Bankers' Association, since its organization in Visalia on June 30 but it will not be the last for at a meeting of the executive committee, following the dinner, it was decided to meet again in Bakersfield on the first Saturday in February 1914. Another meeting following the Bakersfield meeting, will be held just prior to the annual meeting of the California Bankers' Association. The program for the Bakersfield meeting will be arranged by the executive committee.

There was some discussion of the Glass currency measure last night but it was decided best not to pass any resolutions regarding the bill, but rather to await the action of the currency commission of the American Bankers Association which meets on October 6 to take up the bill.

Charles H. Colburn of San Francisco, secretary of the California Bankers' Association, opened the discussion by delivering a short talk on the benefits of the group system and pointed out that it enabled the bankers to become better acquainted and to work for common good. He also showed, by the meeting last night, that the group system enabled the junior officers of banks to attend meetings, whereas at state or national meetings the presidents and the cashiers generally alternated.

Charles M. Griffith, cashier of the First National Bank of Visalia and president of the Second District Association, called the bankers to order and presided as toastmaster. Short talks on the benefits of the association of bankers were given by H. S. Carr of the First National Bank of Porterville, Clinton E. Worden of the First National Bank of Bakersfield, A. W. Quinn of the First National Bank of Exeter, George P. Edwards, publisher of the "Coast Banker," W. E. Heng of the First National Bank of Bakersfield and E. E. Mannheim, vice-president of the Farmers' National Bank of Fresno.

Saturday closing came in for quite a good deal of consideration and it was shown that the movement is spreading rapidly throughout the district. It was also shown that by closing on Saturday afternoons the banks are not sacrificing anything.

The elegant dinner was one of the features of the evening. The menu card represented a safe and it was necessary to unlock this before reaching the menu. The tables were decorated to resemble the surroundings of a fine hotel and a solid bank of money being placed in the center to give a rustic appearance.

extracts, cheap whisky and proprietary "remedies."

Soon stories of sudden death as well as of total and incurable blindness, following the use of this horrible poison, began to appear. It was not until a wholesale drug firm in Baltimore had been mulcted in heavy damages for using "deodorized" wood spirit as a substitute for the four-times-as-expensive grain alcohol in the manufacture of Jamaica ginger that the trade began to sit up and take notice.

Later, examples of wholesale poisoning began to be reported. Parties of people—workmen, picnicers, bar-room habitués, Indians, etc.—indulging in cheap whisky and its substitutes died or became blind. Still later, it was found that unscrupulous painters, especially shellackers of beer-vats, working in confined and unventilated places, were stricken with illness, and on investigation it was proved that the deluded, rebreathed and methylated atmosphere was responsible for the result. About the time twenty persons were poisoned in Kentucky, an equal number of wood-alcohol victims were, within twenty-four hours, killed and blinded in Dorchester, Texas. As a result of these "accidents" agitation against the unscrupulous sale of this poison was begun.

Denatured alcohol is as cheap as or cheaper than Columbian Spirits or any other kind of "deodorized" wood alcohol and can be bought at drug stores

Making Over The Home Is A Simple Matter

Making over the home is a popular idea these days. You grow tired of a certain room—bedroom, dining-room or living-room—would like to see it finished in some other color. STAINING the wood is the answer. Possibly you can do the work yourself—and we will be pleased to furnish full information—but we recommend that you engage a painter. A beautiful and artistic effect can be obtained by staining woods; the prettier the wood the handsomer the finish. But you would be surprised to see how inexpensive woods can be made most beautiful with the right stain.

We recommend to you or your painter that you use

Bass-Hueter Oilwood Stains

for we know that this means a satisfactory result. First of all, Bass-Hueter Stains hold their color—do not fade even when exposed to sunlight. They bring out the grain of the wood, developing the high-lights and shadows into a veritable picture. You can have your room finished in any of eight colors: Flemish Oak, Cherry, Oak, Mahogany, Weathered Oak, Rosewood, Walnut and Forest Green.

If you are planning a new home, we will be glad to offer suggestions in the painting, staining or varnishing of the woodwork; remember—permanency of finish depends on the brand you use. Bass-Hueter Products are guaranteed by us and the makers.

CONTRACTOR SUES WOMAN FOR DAMAGES

L. C. Brinkmeyer as contractor yesterday through Attorney Robert McClellan brought suit against Mrs. Elizabeth J. Tipper to recover \$7,711 damages alleged to have been suffered by the plaintiff through the failure of the defendant to comply with her contract and erect a theater at K and Kern streets to cost \$47,000. He set forth that under his contract of May 30, 1913, that he has gone ahead with his preparations, engaged architect and had plans drawn, expended time and money and has incurred an indebtedness totaling \$201. On August 8, 1913, he says she refused to permit the work to proceed and he was further damaged in the sum of \$4700, the profit that he would have realized on the contract.

COULDN'T SEE THE JOKE

"My wife and I came near having a quarrel on where we should spend our honeymoon," said the young man who had just returned from the trip, "but it was settled by amicable compromise, just as I hope all our trifling disagreements will be settled."

"You see, I could only get a month off. She wanted to go to the shore and I suggested that we spend two weeks at the shore and two in the mountains. She thought it over for a minute and then gave in very sweetly. And now she says it was a positive inspiration. She was having a bully time at the shore, but she refused to stay a single day after our time was up."

"How many new dresses did she have in her wardrobe?" asked an interested listener.

"Why—er—fourteen, I think. But what's that got to do with it? Why didn't you follow what she was thinking?" asked the Cleveland Plain Dealer.

If learned savants are seeking the origin of gossamer skirts and cobweb waists, they need not stop with Scotch professor and a petty two centuries of antiquity.

Shufu, who was king of Egypt more than 4,000 years ago, before the great pyramid was built, had his royal barge on the Nile rowed by girls instead of men. These chosen ones were dressed in linen so fine and lustrous that it was no more than a filmy mist, accentuating rather than hiding the brown young bodies underneath. In short, the rowing costume designed by Shufu was much like the lancing costume worn by some of the few who have managed to kick their way into the good graces of Pittsburg millionaires.

Solomon had considerable experience with the fair sex, and he wrote that here is "nothing new under the sun." Perhaps he was thinking of the new "creations" of some modiste in Jerusalem.—Chicago Tribune.

KERMAN CREAMERY

Makers of Pure, Delicious BUTTER that costs you less per roll. If you, Mrs. Housewife, want to make your most humble meal seem a feast in the eyes of the entire household, get in the habit of serving KERMAN CREAMERY BUTTER. Sunday Morning Deliveries

Orders for Fresh Ranch Eggs, Pasteurized Cream, Ice Cream and "K-C" Butter Will Be received 'Till Noon Today.

Phone 111

The drunkard will have none of me.
The heavy drinker says "no" when my name is mentioned.
The man who craves rough—strong—whiskey passes me by.
All this is as it should be—as I myself would wish it. I am not for them.

Cyrus Noble

Society

Miss Lulu Mayamith, lyric soprano, who will appear in concert in Fresno, some time in November.

With Indian summer upon us, there is a hesitancy in the social atmosphere upon full embarkation on the tide of gaiety, until the certainty of cool weather, and its complement of invigorated spirits, and so while ambitious play see-saw with the mercury, functions of however small proportion stand out upon the social calendar with the decided prominence of a silhouette. Hardly in such Cimmerian hues though, can the party to be given by the Sunnyside Country Club on Wednesday evening be heralded. It is planned as a sort of a big reunion of the club members, and will mark the

commencement of the season's activities in the club life. The members are to gather at dinner early in the evening, and later dancing will be enjoyed. Should the warm weather continue, it is anticipated that the out-of-door platform, will make its farewell appearance for the season on this occasion. This is the first of many such delightful affairs which are planned by the recently appointed committee that includes Mrs. Thomas Patterson as chairman, Guyton Hunt, Mrs. Dewitt Gray and Mrs. F. M. Roman.

Yesterday was a gala day on the golf links despite the increased tempera-

ture. The "putting up" of two handsome trophy cups for the ladies and gentlemen golf players of the club, recently by George C. Roeding and Thomas W. Patterson is possibly a secret incentive for the temporary sacrifice of personal comfort and increased interest in the game, as it is understood that the journey which should determine who is to claim the cups will be an event of importance.

Among those who were on the links yesterday afternoon were Mrs. Thomas W. Patterson, Mrs. Frank Roman, Mr. and Mrs. Arthur Goodfellow, Mr. and Mrs. Charles Bonner, Mr. and Mrs. Scott-McKay, L. A. Nares, Herbert Miles, Frank Warner, Frank Short, E. E. Manheim, J. P. Bernhardt.

One of the interesting musical attractions of the fall season is the concert which is to be given in Fresno the first week in November by Miss Lulu Mayamith, a charming young society girl of Oakland, whose lyric soprano has been recognized in the bay cities with flattering press notices. She was featured by the Native Sons in their recent celebration in Oakland, and at their Court of Honor she sang the selection, "Land of the Golden West," which was written especially for the occasion by Lionel Dalton and James Goodhart of this city. Miss Mayamith is to make a concert tour of the West coast, with Fresno booked among her earliest engagements.

The announcement of the date of the marriage of Miss Hazel Cartwright, daughter of Senator and Mrs. George W. Cartwright to Theron Henry Walker of Sacramento on October 8, will be of much interest to the local social set. The ceremony is to be solemnized in the capital city, where the Cartwrights have made their residence during the past year. Miss Dorothy Burdick and the bride's cousin, Miss Gertrude Noble of Visalia, will leave next Friday for Sacramento, where they will participate in the pre-nuptial excitement. Miss Beulah Miller is expected home tonight from a week-end visit with the popular bride to be, who claims hosts of friends in her girlhood home of Fresno.

St. Agnes' Guild of the Episcopal church is to hold its meeting tomorrow afternoon at the home of Miss Eva Clark on K street.

Mrs. F. M. Miller and her daughter, Miss Eugenia Miller, have returned from an extended summer outing in San Francisco and Carmel-by-the-Sea.

Mrs. Lou Harpster is enjoying a visit from her niece, Miss Hazel Maltlock, of Portland, Oregon.

Miss Louise Spratt, of Porterville will arrive today to be the guest of Mrs. Phillip Harwood for a time.

Mr. and Mrs. J. E. Hughes leave on Monday for San Francisco, where they are to spend the winter. They are joined in Fresno during the past week.

The arrival of a little daughter in the household of Dr. and Mrs. C. L. Williams in Whittier yesterday is of much interest to many Fresnoans. Mrs. Williams having been Miss Hazel Hughes of this city. Dr. Williams left last night for Whittier to become acquainted with her little granddaughter.

The first meeting of the Ladies' Alliance of the First Unitarian church will be held on Tuesday afternoon in the church parlors. Mrs. L. C. Sabin, as president of the society, will entertain in celebration of "Pecan Day." A delightful program of musical numbers is being prepared for the afternoon session, which will conclude pleasantly with the serving of delicacies.

The Eschscholtz Embroidery club will be entertained at its first sewing session of the season on Wednesday afternoon, September 25th, by Mrs. Fred Ashley at her home on Mariposa street.

Miss Norma Cobb was a birthday celebrant yesterday at the home of her parents, Mr. and Mrs. J. Cobb, on Forehampton avenue. The eleventh milestone having been planned with much justification. Games suitable to the event were indulged in and musical selections for the pleasure of the guests were contributed by Misses Caroline King, Irene Mayner, Ruby Sutter, Margaret Ellithorpe, and the hostess. Refreshments were served in the dining room, where pink roses and pink shaded candles made the table most attractive. Mrs. Cobb was assisted in entertaining the young guests by Misses Agnes Strlebeck, Olive Carey and Mrs. Jennison.

The list of guests included Misses Margaret Ellithorpe, Pearl Ellithorpe, Caroline King, Irene Mayner, Maria Madison, Ruby Sutter, Roberta Sutter, Fernie Stout, Maria Stout, Martha Brewster, Mildred Spence.

DON'T FEAR SUNBURN

CUTICURA SOAP

And Cuticura Ointment will care for your skin. They do so much to clear the skin of sunburn, heat rashes, redness and roughness, and do it so quickly and economically.

Zoe Pitts, Alma Cobb, Norma Cobb.

The Ladies' Social Chain of the First Congregational church will hold its meeting this week on Tuesday afternoon at the home of Mrs. N. G. Johnson at 213 Illinois street. Mrs. Johnson and Mrs. W. G. Harris will be the joint hostesses on this occasion.

Miss Iona Pearl Champlin of Dos Palos and Charles Herbert, Blackwell of Tranquility, were the principals in a high noon marriage which was performed at the Calvary Presbyterian Manse by Rev. Durcar Wallace. In the presence of several relatives of the young couple. They are to make their home at Tranquility.

Miss Elizabeth Hugon has returned from a two months' vacation spent in Enunclaw and Seattle, Wash.

Mr. and Mrs. J. L. Harris of Fresno Colony are rejoicing over the arrival of a son born September 25th.

Mrs. Bruce "Large" has returned from a two months' visit in San Francisco. Mr. and Mrs. Large celebrated their second anniversary last Saturday evening by giving a dinner at the St. Francis hotel to a number of their friends.

On Wednesday evening about twenty relatives and friends of Mr. and Mrs. Albert E. Taylor gathered at their cozy residence at 336 Iowa street, to celebrate the second anniversary of their marriage.

The rooms were tastefully decorated and after a most enjoyable evening spent in various games and music the many useful presents were opened, followed by the serving of supper, after which the guests departed wishing Mr. and Mrs. Taylor many more pleasant anniversaries.

Those present were: Mr. and Mrs. Albert E. Taylor, Mr. and Mrs. Edgar Taylor, Mr. and Mrs. A. P. Taylor, Mr. and Mrs. W. R. Alsop, Mr. and Mrs. E. M. Eyster, Mr. and Mrs. McConnell, Mrs. R. D. Lauer, Miss Lilla Anderson, Miss Myrtle Maxwell, Helen Taylor, Ernest Maxwell, Will Anderson, Master Fay Lundy and Master A. Warren Taylor. (Continued on Page 13)

BURNS ARE FATAL TO LITTLE CHILD

Dorwin Willet Dies From Injuries Received In Fire

Dorwin, the 5-year old son of Mr. and Mrs. Joseph Willet, died yesterday morning at 10 o'clock, from burns received late Friday night when the home of his grandmother, Mrs. Virginia Willet of 3051 Fresno avenue, was partly destroyed. Coroner Bean will hold the inquest today and funeral arrangements will be made later.

Residents of the home were asleep when the fire started and the blaze was not discovered until it had eaten to the heart occupied by the little fellow. His night clothing was afire when he was carried from the room by his uncle. Three doctors attended him at the Burnett sanatorium, but very little hope was held out from the first. The origin of the fire is unknown but is rumored to have started from an electric iron being left burning. Besides the parents and grandmother, the deceased is survived by two aunts, Virginia and Florie Willet, and two uncles, Frank and Ollie Willet.

FORESTERS EXPECT LIENS TO PAY OUT

Second Notice Received Says Not Expected Or Desired to Pay Up

Following the notice received by members of the Independent Order of Foresters of an assessment of \$200 on a \$2000 policy taken out prior to 1893, a second notice was mailed yesterday saying it was not expected that this assessment should be paid. The notice follows:

Brother: With reference to official notification of your financial secretary, herewith, I desire to explain that it is not expected or desired that you pay the amount of the lien assessed against your policy. That amount is merely a maximum lien, that will be reduced from time to time by the fraternal fund as outlined in the August Forester. You will note that quite an amount is to your credit in the fraternal fund at this time.

The amount of monthly interest you will find stated on the notice represents 4 per cent per annum on amount of lien, and will be payable until the lien is liquidated.

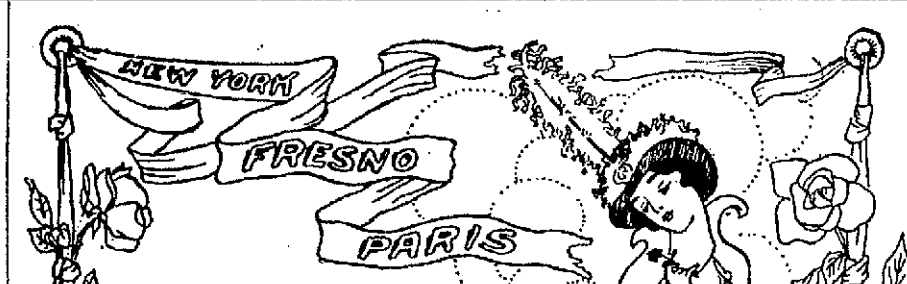

If not paid by you it would be compounded annually so I would recommend your paying the interest each month on the amount of the lien, thereby securing the full benefit of the grants from the fraternal fund from time to time.

Fraternally yours, S. G. DUNKERLEY, H. S. C. B. DICKSON, H. C. R.

According to members of the order, the Fraternal fund will ultimately pay out these assessments, the only members to suffer financial loss being those who withdraw or the beneficiaries of those who should die before the liens are paid off.

Schools of California Are Developing Gratifyingly

It is school opening time throughout the state—a good time to take inventory of stock along the line of popular education. Intelligent Californians are so puffed up with state pride as vainly to believe or contend that the public school system of this state has reached absolute perfection. But it is gratifying to realize the truth—that this grand old commonwealth has an excellent school system and that it is in a happy state of progressive evolution. California is not given to rash experimenting in public-school methods. But it is quick and eager to adopt the best of the new methods and to keep the school of the state abreast of the most approved development in educational thought. The public school is supported loyally by Californians and its work is highly esteemed. Most of the municipalities of the state have done themselves proud in building splendid public school edifices, sanitary in construction and modern in equipment. This pride in and care for the people's schools augurs well for the state's future.—Pasadena Star.

Exclusive Showing of Pattern Hats

Selected By Mrs. Porter in Person From the Fashion Centers of Paris

THE beautiful millinery we are displaying was chosen personally from the stocks of the world's greatest designers by Mrs. Porter. In correctness, in beauty, and in good taste it is the last word. More than the millinery itself, or rather supplementing it, is the care and taste we use in assisting our patrons in selecting what is becoming to them.

Pretty Models Specially Priced At \$10, \$12.50 and \$15

While of course millinery at these figures is not the same as the imported models, it is so closely modeled after the imported, and is so tastefully designed that women are delighted with the good taste and with the beauty of it.

We will be glad to show you these moderately priced models and assist you in making a selection.

New Marabou and Ostrich Neckwear

Just received a beautiful selection of neckpieces made from marabou, or ostrich feathers combined with marabou. The neckpieces are shown in scarf effect, finished with large tassels, or in the regular stole shape. Combinations like white and black, white and natural, white and gray, are the most popular.

Prices Range Up to \$25

"Goodwin Corsets" Are Essential If You Are Desirous of Having Your Gowns And Suits Fit Perfectly

THE fit of the suit or gown that you buy this fall is more closely connected with the corset you wear than you may have ever known. That is one of the great points about the "Goodwin." It is a corset that is satisfactory in every way. It will permit the correct and satisfactory fitting of the suit you wear this fall. The contour of your body will be pleasing, the ease will be perfect, the comfort will be all that can be desired if you wear a "Goodwin."

The "Goodwinette"

It is made of a new fabric expressly created for slightly boned corsets, and follows the lines of the body closely. It does not stretch out of shape.

The Fit of Your Coat Will Never Be Criticised if You Wear a Goodwin

Wear a Goodwin this Fall and note how much more smoothly your gown fits. You'll find a new pleasure in wearing your suit. You'll find a satisfaction you never felt before. The fit of the corset is imperative to the fit of the gown.

SOCIETY

(Continued From Page 12.)

The Friday Afternoon Sewing Club, composed of a congenial group of the younger matrons, will be entertained for the first of the season's meetings by Mrs. W. L. Adams, at her home on Mildred avenue. Among those included in the group are Mesdames W. L. Adams, Ralph Allen, Harry Barbour, Jesse Blasingame, O. B. Doyle, Creighton Hamilton, R. W. Hobart, Robert Hollingsworth, Scott Landrum, John Manning, Butler Minor, Ward Minnion, F. Dean Prescott, Edwin M. Prescott, T. N. Sample, Roy Woodward, Frank Wyatt, Miss Ruby Olney, Miss Adeline Thornton.

Mrs. Emil Gundelfinger will entertain a party of little tots on Wednesday afternoon complimenting her little daughter Louise, whose second birthday is the incentive for the celebration.

Miss Breeze Huffman has returned from a three months' outing in southern California.

Dr. and Mrs. W. L. Adams are enjoying a visit from the former's mother, Mrs. C. C. Deah of Berkeley.

The Tabor Embroidery Club will be entertained on Wednesday afternoon by Mrs. J. E. Long at her home on Calaveras avenue.

Mr. and Mrs. William C. Wharton have as their guest, the former's mother, who has just returned from an extensive trip abroad.

The many friends of Mrs. Walter L. Brown, who is better remembered here as Miss Elizabeth Adams, will be interested to know that she contemplates a winter's sojourn in California, after an absence of some years in England. Mr. Brown, who is a mining expert, has had to devote much of his time to "treasure on the west coast of Africa, and during his absence, Mrs. Brown made her residence in a London suburb. They have been spending the summer touring Europe, and should Mr. Brown's business affairs take him to Africa, Mrs. Brown will spend the winter in California, and

Fair week promises much stimulation to interest this week, and Thursday, which is scheduled as "Fresno Day," there is to be a record-

breaking attendance. The society side of the fair is being accentuated more than ever this year, and before the viewing stands have been arranged sixty boxes of a capacity of six or eight persons each, which are to be held for the season.

Among the holders are: H. V. Welsh, M. L. Moy, A. V. Lisenby, Levi Garrett, George J. Warlow, F. M. Helm, J. E. Dickinson, H. McKenke, George Waterman, Milo Rowell, S. N. Griffin, George H. Blomgren, J. C. Forner, Dan Brown, Jr., K. A. Pratt, W. Parker Lyon and P. Dean Prescott. Mrs. H. W. Neely and her daughter, Miss Marguerite are at home again after a summer's outing in the Bay cities.

WANT NAMES FOR CIVIC COMMITTEE

Nominating Board Expects To Hold Meeting Early This Week

A meeting of the committee chosen to select the members of the City Beautiful Committee will probably be held the early part of this week and it is hoped that civic organizations will present names to the committee for its consideration.

Until those interested suggest names, it is not probable that the committee will do very much as it would be practically impossible for it to start blindly in its effort to secure members of the committee.

The Pajaro Lecture Club will take this matter up at its first meeting and this will probably be one of the most important matters to be considered at this meeting as there are ten women to be appointed.

Members of the committee report that there is a great deal of interest being manifested in the City Beautiful Committee and that there probably will be plenty of suggestions as to names. All suggesting names are requested to send them to E. M. Prescott, Box 116, Fresno.

GREEN FRUIT PRICES STILL FALLING OFF

Auction Average Is Now Little Better Than \$900 Per Car

Prices on Malaga grapes have taken a decided slump in the past two or three days and the average now being received by local shippers is just a trifle over \$900 per car, gross, although some sales have been reported as high as \$1250.

The falling off in returns on eastern auctions was expected, but shippers have been greatly pleased that it did not come sooner. Grapes are now arriving on the markets in large quantities and these have brought about a decrease in the price of Malaga grapes. The bulk of the Tokyo shipments will have reached the East in the next four or five days and after that it is expected that the Malagas that are remaining will bring good prices.

Some local people have been salping Thompsons of late, but the returns have not been as large as was hoped. The first of the late Thompsons brought very good prices, but as the shipments increased the demand lessened and at the present time this variety of grapes is doing no better than the Malagas. Tokays are leading in prices.

Malaga shipments have fallen off until only a few cars are now being sent out, but it is expected that there will be a revival for a short time, after the Tokays have been moved from the Lodi and other northern districts.

TARPEY WIRES THAT SUCCESS IS IN SIGHT

Situation At Present Is Very Nerve Racking Says Fresno Man

That success for both the wine and Zante currant provisions of the tariff bill is now in sight, was the substance of a telegram received at the offices of the Associated Raisin Company yesterday from M. F. Tarpey. The telegram was as follows:

Washington, D. C., Sept. 27, 1913.

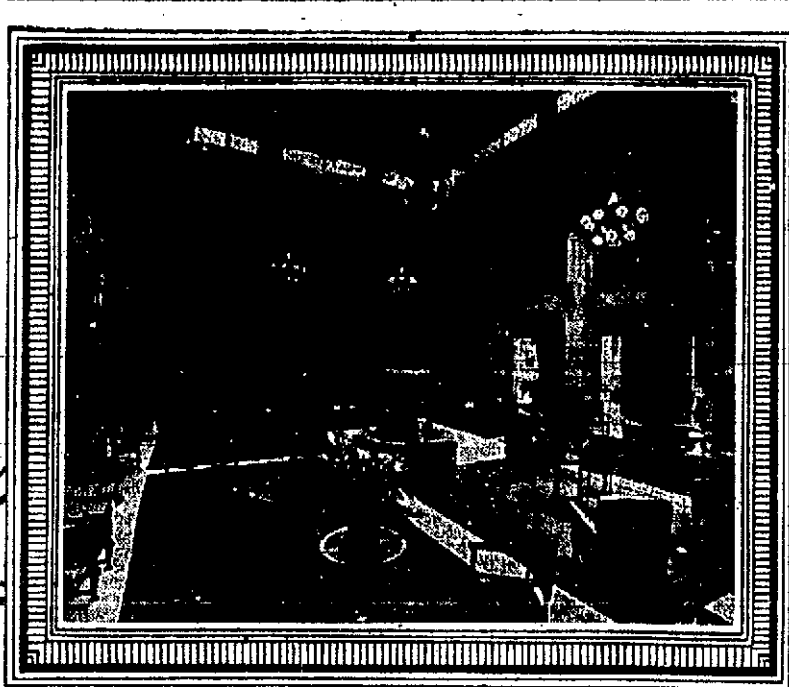

James Madison, Fresno, Calif.

Conferees are now agreed on all except cotton futures and Zante currants, on which latter we are all working tonight. Cannot forecast results, but some hope yet remains. Wine situation still stands in our favor, notwithstanding astonishing persistence of Ohio and Missouri, who have held daily conferences and enlisted every possible assistance and sympathy. Fomerene pamphletted his speeches and furnished them to every legislator in the last ten days. The situation is particularly nerve-racking, but success seems to be in sight tonight.

M. F. TARPEY.

SEEKS DAMAGES FOR TREATMENT OF HAIR

That she was damaged to the extent of \$1225 by a "decoloration or lotion" applied to her scalp by A. W. McKittrick, who he said, was harmless and would restore her hair to its natural color, was the allegation made yesterday by Miss Mattie L. Mosley in a suit filed against the McKittrick hair store of 1214 Mariposa street. She says that as a result of the treatment her head, face, neck and chest "broke out in a terrible and painful eruption." She says this eruption was so violent that she was ignorant of the ingredients and only on his representation and inducements did she consent to its application on March 26, 1913. She also wants \$1000 for the pain and injury suffered, \$500 for loss of wages for two months at \$15 a week and \$25 for her doctor's bills. Drew and Drew are her attorneys.

The Aim of this Hotel is to Extend True Hospitality

THE name "Hotel" derives its origin from the word "hospitality," created in the olden times before hotels were known and the traveler was accommodated with food and drink at any farm or village where night would overtake him or her. Strangers were never refused and the best that the house afforded was at their disposal. The increasing number of travelers who were wont to ask for food and shelter made it imperative that public places should be provided for their accommodation, and this was practically the foundation of the present day hotels, called in those days "inns," where food, drink and lodging could be obtained for a small stipend.

While a great progress has been made in recent years by hotels in the matter of accommodations and equipment, yet the successful hotel of today is the hotel which bases its foundation on the same old fashioned "hospitality" that was so evident in the olden days and this is particularly true of the Hotel Fresno, for this hostelry has happily combined hospitality with the most modern equipment and comfort giving accessories so dear to the heart of the traveler away from home.

Here you are made to feel at home and while the furnishings and service are of the best, yet the homelike atmosphere that pervades at all times makes one feel at ease instantly, regardless of the luxurious surroundings.

Low Rates Made Possible

Because of their desire to make this hotel popular among all classes of people, the management has adopted a low price schedule, which makes it possible to offer room rates on the European plan as low as \$1.00 a day and upwards. Splendid meals are served in the dining rooms at moderate prices, and nothing has been overlooked to make your stay here pleasant and economical.

Founded by Fresno Men who have the best interests of the community at heart

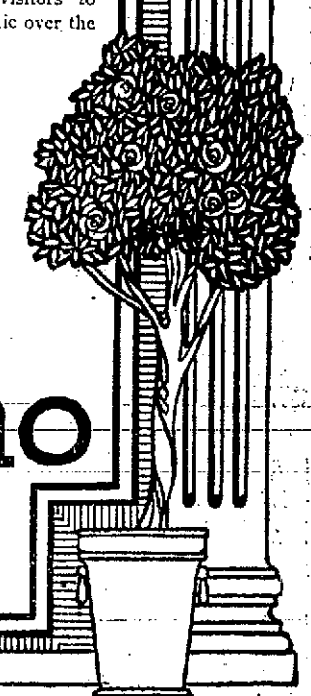

The Hotel Fresno was built by business and professional men of Fresno, not for selfish reasons, but more to help the progress of the city by providing a hotel that could offer as good accommodations as any hotel in the state. How well this hotel has succeeded is best proven by the liberal patronage that it now enjoys, both from commercial travelers and country visitors to Fresno. And every guest has been enthusiastic over the treatment accorded them here.

Make this hotel your headquarters whether you are a guest or not

We extend a general invitation to all to make the Hotel Fresno your headquarters, whether you are registered as a guest or not. You will receive the same courteous treatment here, no matter whether you are here to meet your friends or whether you wish to engage rooms. This is a "Hotel" in all that the name implies and our aim is to extend true hospitality.

MARRIED

GARNER CARPENTER — In Fresno, September 27, 1913, Van Garner of Fresno and Agnes Carpenter of Clovis, Rev. Harold Govette officiating.

JAIL BREAKERS ARE CHARGED IN COURT

Shorliff McSwain yesterday appeared before Judge Briggs and swore to warrants charging E. D. Wheeler and James Manning with jail breaking. The district attorney and the sheriff announced the day following the daring attempt at the jail delivery that the men would be prosecuted. The men will be taken into court this week and given preliminary examination.

ROOMFUL OF WITNESSES

In St. Louis a stout colored woman, apparently about 40, was called as a witness in an assault case before a Police Justice. She said: "I am 44, and live down near the river, and this is what I saw when the fight took place." She then gave her account of the assault.

FRATERNAL SOCIETIES

O. O. RED MEN.
An evening marked by hilarity is planned by the Minutemen Tribe No. 144, improved Order of Red Men, for the meeting tomorrow evening at which time the social degree of the order, the Hazmaters degree, will be exemplified on a large class of candidates. Initiations have been sent to Parlier and Sanger tribes and large delegations will be present from both of these lodges for the festivities. After several hours of fun the Red Men will adjourn to the banquet hall where one of their justly noted Minutemen steaks will be served. All the preceding business sessions applications will be acted upon and several candidates will probably be initiated the following Monday evening.

FRATERNAL ORDER EAGLES.
The first big meeting of the winter season will be here by Fresno Eagle, F. O. E., tomorrow evening when a smoker will follow initiation of a large class. Election will be held of an Aerie physician to take the place left vacant by the death of Dr. Frank McMahon. Dr. C. H. Ingram is the solo, "Song of the Soul" (by special request), by Mrs. John Miller; melody in F, piano solo by Miss V. Jinks. Everyone cordially welcome to these interesting services.

SWEDISH MISSION.
The Swedish Mission church, P and Hilva streets. C. A. Nelson, pastor. Services, 11 a. m. and 7:30 p. m. Young people meet at 6:30 p. m. This is Sunday School day. Sunday school will take part in the morning service. Some of the Sunday school workers will speak and read prepared papers and the pastor will preach on the parents relating to the Sunday school evening service, "Four Small But Very Important Things."

UNITARIAN.
First Unitarian church, corner O and Tulare streets. Thomas Clayton, minister. Ten a. m., Sunday school. Frank Wolfe, superintendent. Eleven a. m. service, subject—Discerning of Winston Churchill's new book, "The Inside of the Cup." Music under direction of Mr. A. J. Wyllie, and Mrs. Rosalind Davies, pianist. The public cordially invited.

Sunderland in remembrance of what he has done for the Camp in days past. Neighbor Sunderland will make an address to the members to explain the newly started laws made at the last session of the Head Camp. This is of great importance to every member of Manzanita Camp, as a big attendance is desired at Woodman hall on next Tuesday evening.

The program of the evening follows:
Selection.....W. O. W. Orchestra
Short Talk, Neighbor Ed. Jones, on "Manzanita Club."
Solo.....Neighbor Gus Olsen
Accompanist, Neighbor Butler.
Address.....Neighbor Sunderland
Solo.....Neighbor Gus Olsen
Selection.....W. O. W. Orchestra
UNITED ARTISANS.
The United Artisans will meet Wednesday night in the Fowler lodge attended. A greater part of the evening was spent in floor work of the Rebekah degree which will be conferred on three candidates who will be taken into the order next Saturday night.

KNIGHTS OF PYTHIAS.
On October 11 the rank of knighthood will be conferred on a class of neophytes at Dinuba by Fresno Lodge No. 138 and Progressive Lodge No. 309, K. of P., of this city.

PERMITS GRANTED TO BUILD AND ALTER.
Granted city permits to build and make alterations are these:
H. E. Humphreys for \$1400 dwelling on lots 3-4 in Kropfer addition.
H. E. Dahl, \$1500 dwelling on lot 38, block 1, of Villa Homestead.

GAS COMPANY PAYS FOR RESURFACING OF STREETS

Something Over \$800 to Be Distributed to Owners of Property

Money Is In Hands of City Clerk Who Will Pro Rate Amounts

Property owners along paved streets in the business section that were resurfaced about a year ago, are to be reimbursed for the money they were compelled to pay out because of the tearing up of the streets by the Pacific Gas & Electric Company. A check for something over \$800 is now in the hands of City Clerk Ryan, and the money will be distributed as soon as Ryan can pro rate the amount.

Shortly before the streets were resurfaced, the gas company tore up the pavement to lay new mains. It did not repave but let the trenches remain unfinished until the streets were resurfaced. Under the city ordinance, the company was to replace all pavement torn up but when the resurfacing was done, arrangements were made whereby the property owners were to be assessed for the gas company's portion of the work. This was done, and the check now in the hands of the city clerk is for payment of that part of the work that was done for the gas company.

Ryan has not yet had any opportunity to ascertain the pro rate of each property owner but said yesterday that he would do this work this week and then make the distribution. He expects to have considerable work making an equitable adjustment.

ALIENS ARE WARNED ON NATURALIZATION

Declarations Must Be Acted Upon Before Next Sunday

According to the Congressional act of June 28, 1908, all declarations for naturalization made on or previous to September 24, 1908, will expire next Sunday and the application will suffer the consequences unless he follows his application up by securing his final papers. County Clerk Barnwell yesterday called attention to the law and suggested that all who had made declaration for citizenship had better look up the dates so that their application will not become void under the law, which set seven years as the time for making citizen application on the declaration. Since the law went into effect, 1438 have applied in this county alone for naturalization and records show that the very first one to receive the declaration has not taken out final papers. Barnwell says there are many such cases in the county.

JEWS TO OBSERVE NEW YEAR HERE WEDNESDAY

Programs for These Services and for Atonement Day Completed

Excellent Music To Be Had; Public Is Invited To Attend

The Jewish New Year, known as Rosh Hashona, will be celebrated in this city with appropriate services next Wednesday night and Thursday. The committee from Fresno Lodge of B'nai B'rith which has had charge of the arrangements for the services has completed its work and announced the program. Miss Catherine Balthis, who has charge of the musical part of the program, has completed the program for the New Year services and also for the Atonement Day services which begin on the evening of October 10.

The Jewish New Year will start at sundown next Wednesday and will be observed until sundown the following day, October 2. This is in accordance with the custom of the reformed church. The orthodox have been in the habit of observing two days.

The Rosh Hashona services will be held in the Parlor Lecture Club the first one starting at 8 o'clock on Wednesday night. Henry H. Hart, assistant city attorney of San Francisco and an understudy of Rabbi Marti Meyer of Temple Immanuel of San Francisco will officiate. The subject of his address at the evening service will be "Paradise." At the service the following morning, which opens at 9 o'clock, he will talk on "The Ideal of the Jew."

Hart will also officiate at the Yom Kippur services on October 10. On Kol Nidre night, the night of October 10, he will take for his subject, "The Three Sins." His subject at the morning service on October 11 will be "I Am a Jew." An afternoon service will be held at which he will speak on "The Flame of Life." At the Kol Nidre night services, Mrs. Miller will render a violin solo of Kol Nidre.

The services will be open to Jews and Gentiles alike and orthodox Jews will join with the reformed. As these are rare occasions in Hebrew life all Jewish merchants in the city will close their places of business on both New Year's day and the Day of Atonement.

The following is the musical program for the services next Wednesday evening and Thursday morning.

WEDNESDAY
8 o'clock—Prelude, "The Dawn of a New Day," by Mrs. Miller. Solo by Miss Balthis and M. Rophuro. 9 o'clock—"The Flame of Life," by Mrs. Miller. Solo by Miss Balthis and M. Rophuro. 10 o'clock—"The Ideal of the Jew," by Henry H. Hart. Solo by Miss Balthis and M. Rophuro. 11 o'clock—"The Three Sins," by Henry H. Hart. Solo by Miss Balthis and M. Rophuro. 12 o'clock—"The Dawn of a New Day," by Mrs. Miller. Solo by Miss Balthis and M. Rophuro.

THURSDAY
9 o'clock—Prelude, "The Dawn of a New Day," by Mrs. Miller. Solo by Miss Balthis and M. Rophuro. 10 o'clock—"The Flame of Life," by Mrs. Miller. Solo by Miss Balthis and M. Rophuro. 11 o'clock—"The Ideal of the Jew," by Henry H. Hart. Solo by Miss Balthis and M. Rophuro. 12 o'clock—"The Three Sins," by Henry H. Hart. Solo by Miss Balthis and M. Rophuro. 1 o'clock—"The Dawn of a New Day," by Mrs. Miller. Solo by Miss Balthis and M. Rophuro.

NEW YEAR'S MORNING
1. "The Lord Is My Light" (Starik).
2. "Teach Me to Pray."
3. "Nearer Thy Presence, O Lord" (Folies).
4. Holy Father, Guide Thy Children, Murliana, (Wallace) Misses Balthis.

The following is the musical program for the Atonement Day services:

EVENING
1. "Day Of God, Ancient Kol Nidre" melody, (Starik).
2. "Fear Not Ye, O Israel" (Huck).
3. "Oh Lord Redeem Me Not" (Psalm VI) Wilkinson, Miss Catherine Balthis.
4. One Sweetly Solemn Thought (Ambrose).

MORNING
1. Benedictus (Gounod).
2. "Hear Ye, O Father" (Miliard).
Violin obligato by Mrs. Davies, Miss Catherine Balthis.

2. King David's Lament, Mr. Jno. Shismalian.
AFTERNOON
1. "Crossing the Bar" (Macy).
2. "Adonai Mo Odem" (Schlesinger).
3. "Adonai Moled" (Schlesinger).

Besides this the beautiful Schlesinger service will be sung in Hebrew, most of the musical settings being from operas; one, "Ki Bayom Haseh," from Donizetti being sung as a soprano solo by Miss Balthis. The "Etchyma" is a fine alto solo, while the "Orvish Malkema" in which Miss Marguerite Balthis and Jno. Shismalian take the solos, is very beautiful.

FRESNO COUNTY STARTS COUNTIES ASSOCIATION

Plan Is for Mutual Benefit At Panama-Pacific Exposition

Fresno has launched a movement for a California Counties' Exposition Association to be organized as a fastening of county exposition commissioners to be held at Hotel Oakland October 20. The organization is not concerned in a spirit of antagonism or offense to either exposition, but to subserve by co-operation the mutual interests of the counties at the 1915 exposition.

"The association is intended for mutual benefit," said Chairman Jorgenson of the Fresno supervisors, who as president of the San Joaquin Valley Counties Association is sending out the call for the Oakland meeting. According to the old saying, there is strength in unity, and with the counties showing one united front they will be in a better position to demand and press questions of policy connected with their exhibits and which the management might not so readily acquiesce in. Then there is also involved common interests as a special exhibit days and advertising. The association will undertake a uniform plan of decoration, in the California building and in this regard perhaps go so far as to employ one architect to furnish a harmonious design for the various groupings of county association exhibits.

The letter being sent out to all ex-

The Fresno Hardware Co. Announces a GRAND DEMONSTRATION Of Stoves, Ranges and Aluminum Ware at Fresno District Fair!

First Car Load of "Elk" Stoves and Ranges Besure to see the World's Best Aluminum Ware

We are going to be at the FAIR with the stoves and ranges that are made on the Pacific Coast, and which are constructed expressly to conform with the fuel conditions of this state. The first carload of the season has already been received, and all models will be on exhibition at the Fair Grounds.

Heaters That Heat!

It's time now to think of reducing fuel bills this winter by buying a heating stove that will throw out an even, adequate volume of heat, with a moderate consumption of fuel. This demonstration of heating stoves will be the means of saving you many dollars on the heating problem.

Valuable Gifts To Be Given Away Dec. 27th

Ask at our Booth for full Particulars and see gifts at our store.

Wagner's Cast Aluminum Ware Will Modernize Your Kitchen

Mrs. Olive Butler Factory Representative, will show you the advantages of using Wagner Ware

You'll find her discourse one of the most interesting things at the Fair. Don't miss it.

Elk Steel Ranges--\$8.50 to \$60

Made in California!

"Elk" ranges are made with special features that make them especially adapted to the kinds of fuel used in California. Also, the fact that they are made right at home makes it possible to get parts quickly, if some are broken by accident.

See Them at the FAIR!

Cooking Utensils that Wear Longer and Make the foods Taste Better

You know that ordinary tin cooking utensils allow the foods to burn, if your back is turned for an instant—that by reason of this they become sooty and black—that they become leaky and have to be replaced within a short time, then why use them?

Wagner's Aluminum cooking utensils stand years of hard service, and they make the foods taste better than are cooked in them. No burning—hence no dirty, black pots and pans.

WAGNER CAST ALUMINUM WARE Will Be One of the Chief Attractions at the Fair

position commissioners of counties in California is as follows:

"San Joaquin Valley Counties Association."

"Fresno, Cal., Sept. 29, 1913.

"Dear Sir: It is proposed to form the California Counties' Exposition Association for the purpose of dealing with questions of exhibit, special days, advertising and general policy, which will arise and be common to all counties either at the San Diego or the San Francisco Exposition or both."

"The organization is not to be formed in a spirit of antagonism or offense to either Exposition, but for the purpose of conforming on many matters in which the interests of the counties of the state are mutual and can best be served by co-operation."

"For this purpose it is proposed to convene at the Hotel Oakland, Oakland, Cal., on Monday, October 20, three delegates from each of the associations now formed on a basis of geographical boundaries, viz., the Southern California Counties Association, the San Joaquin Valley Counties Association, and the Sacramento Valley Exposition Association, and one from those counties of the state acting independently in these matters."

"The San Joaquin Valley Counties Association, by whose president and secretary this communication is sent out, would be glad to confer through its representatives from other counties of the state on many matters which it believes to be of paramount importance, not only to the counties forming the district organizations, but to all other counties of the state, which matters will be laid before the convention."

PREPARATIONS FOR OPENING OF FAIR NEARLY COMPLETED

Horses and Cattle Which Will Be Exhibited Here This Week at Fresno District Fair.

From the present indications Fresno will commence celebrating next Tuesday what is taken to be the largest district fair which has ever been held in this city. Ever since R. W. Wiley took over the position of secretary on May 1 and started to gather funds for the fair which is soon to open, there has been a great deal of activity and interest taken in the matter.

Merchants and others interested in holding a district fair that would make this region known to the people who live in it and the visitors who will be here at that period, have proved themselves loyal to the association in many ways. Contributions reaching into the thousands of dollars were received by

Wiley and his money, besides that paid for advertisements and display space has been spent in the making of the largest fair for the showing of the products ever held in Fresno.

Attractions and exhibits of all kinds have been secured not only from this district but from many parts of the State and some even from outside the bounds of California so that people of any disposition whatsoever will find something going on at the fair which will be suited to their nature.

There will be agricultural products, an oil and mineral display, machinery of all kinds, cows, horses, sheep, poultry, and a women's department, a "baby show," running, trotting, push-

mobile, and automobile races, auto polo games, diving girls and horses, automobile stunts in the air, fireworks, carnival attractions and various other amusements which will cater to the likes of the people.

WORK DAY AND NIGHT.
In order that the fair might open in full force on the opening date, Tuesday, September 30, with no drawbacks, such as uncompleted buildings, exhibits and displays but partially in place, work is being carried on both by day and by night. The only halt in the work was yesterday afternoon when the carpenters refused to work on Saturday afternoon. They continued again last night and they, as well as many others will be at work today making the final arrangements for the opening.

To induce exhibitors to have their displays all lined up for Tuesday, a rebate of the charges will be made to them.

A great many of the exhibits are expected to arrive in this city today. The Reno fair closed last night and the exhibitors there have wired that they will have their displays here either today or tonight.

Among the attractions which will come here from Reno are the running and trotting horses, several exhibits of draft and work horses, prize cattle, sheep and hogs, machinery of all kinds and other commercial displays.

EXHIBITS ON GROUND.

Several of the exhibits are already on the grounds, nearly ready for the opening. These are mainly local displays and those from neighboring towns. From the contracts for space which have been let during the last few days, it seems that almost any town of consequence in the valley will be well represented here during the fair.

Many of these towns are planning to celebrate their special day at the fair so that the visitors who are here on that day will well remember the occasion. Parades including hundreds of automobiles, which will bring most of the population from the towns and the surrounding country, will be here on the special days awarded to them in their honor. The business houses in most of these towns will close up on that date.

"CLEANING UP."

Hundreds of men have been at work of late on the grounds cleaning them up, painting the buildings, and whitewashing the trees and cattle sheds so that everything will present an attractive appearance during the fair.

The exhibits are rapidly coming into the automobile building, the main pavilion, machinery hall, agricultural hall, the poultry building, this had to be doubled this year to accommodate the number of entries received, the school department, the horse, cattle, sheep and swine sheds.

It is stated that practically every exhibit shown this year is far more complete than any shown heretofore and in many cases the displays have been doubled.

WHEN ENTRIES CLOSE.

The entries to the various exhibits on the part of those who will have displays at the fair have been announced as follows:

Entries for Division A (horses), Division B (horses), Division C (cattle), Division D (swine), Division E (sheep), Division F (poultry), Division G (poultry), Division H (dairy), Division I (agricultural products), Division J (horticultural products), Division K (plants and flowers), at 5 o'clock Tuesday morning, September 30, Division L (woman's department), at 6 p. m. Monday, except in Class 8, which will close at 10 o'clock on Wednesday morning, October 1. Division M (fine arts), Monday evening at 8 o'clock. Division N (educational), Monday at 8 p. m. Division O (oil and minerals),

SIXTY SEVEN STALLS ON PUBLIC MARKET

To Meet Demand for
Chicken, 622 Live Fryers
Quickly Sold

Market day was a big affair yesterday with an attendance of sellers and buyers that gave evidence of the lively days which the public market first opened. There were 67 stallskeepers doing business on the market classified as follows:

Producers in fruit and vegetables... 38
Meat sellers... 11
Restaurants... 7
Cooked meats... 2
Pickle men... 2
Salt meat... 1
Potatoes... 1
Mountain apples... 1
The potato man offered the Stockton product in sacks at \$1.50, and the apple man was from North Fork, in Madera county, bringing his apples in bulk in the bed of a wagon covered in straw and selling for a dollar a box.

There has been a big demand for tomatoes, and one producer of the home grown love apple who disposed of 71 boxes at a dollar a box on the market a few days ago, was on hand yesterday, but the demand was so great that he was unable to sell more than a few boxes.

The big business done on the market yesterday was in live chickens. Fifty-two dozens, including two of young fryers, were disposed of at 8 cents a pound, the fryers showing on the scale from three to five pounds each. There were three producers who had dressed chickens for sale, besides which ducks and geese in crates were also offerings. The demand for chickens was such a strong one that the 622 live fryers were sold off by 10 o'clock and the dressed fowls one hour later.

at 6 p. m. Monday. The same will apply to Divisions J, Q, R, and T.

SELMA TO PARADE.

R. J. Cooper and C. E. Heaton, who are assisting the Selma Chamber of Commerce in arranging for the big auto parade from this city to the fair grounds Wednesday morning, state that their expectations have been exceeded in the number of machines which will be in the demonstration. The committee has taken up the proposition with the automobile owners residing in and near Selma, and the motorists are practically unanimous in promising their attendance. The machines will form in line here that morning and leave for Fresno promptly at 10 o'clock.

Local stores will observe a half holiday on Wednesday, although there is no official declaration on the subject since the Fresno merchants changed their date. Selma merchants originally wanted to close on Thursday, but changed the date to unite in a holiday with the Fresno firms, which they were assured would close Wednesday. In order to avoid such a misunderstanding another year it is suggested by local merchants that a fair day be set aside as merchants and clerks day, on which date all stores in every town, including Fresno, would close. They assert that this would be more fair than a commercial stand-point.

MADERA EXHIBIT.

The Madera Chamber of Commerce is completing its plan for a large exhibit at the county fair. An exhibit was placed at the State fair at Sacramento which brought good results and in view of this condition it was decided to make a presentable showing in Fresno at the fair during this week.

The exhibit will be mainly for attracting possible settlers from among those who come here while the fair is in session. It is estimated that the returns received here in point of advertising will well be worth the expense.

WORRY AND HURRY

There are two little demons who have to combat each other.

And their names are Worry and Hurry. They pay the price with our nerves and all that.

But still, we keep on with our hurry. We hurry through breakfast, then on like a shot.

We worry through work till the end of the day.

We hurry through dinner, after which, like us not.

We hurry again to be off to a "play." We hurry the baby as fast as we can. Kindergarten and High School and College, you bet.

Are raced through in our hurry to make him a man.

Till his brain is a jumble, his nerves all upset.

Then we wonder why half of the world's inefficient.

As we rampage along in our hurry, I am sure this very good reason's sufficient.

It is due to our Worry and Hurry. Do you think, after all, it is worth what we pay.

In nervous prostration and numberless ills?

Why can't we take our time to live, day by day?

For calm and surely, it's Hurry that kills.

—William Stubs in "October Nautilus."

SWUNG TO THE VOID

Once, suddenly, I found myself alone. Out in the void of a great city, filled with tremblings and the cry of many fears.

Making escape out of the human deep, I climbed heart-troubled to the leafy hills.

And stretching on a bank above a stream, I gazed up to the dome of the high boughs.

And wondered over life and life's alarms.

And as I lay there asking for a sign, A sudden flash his filmy ropes.

Across the dome; saw him, with rap-turous fall.

Drop on a silver cable to the void, And hang serenely in the rosy beams Of sunset—hang all still and unafraid.

And lo, a courage came upon my soul, With long, long thoughts of this adventurer.

This little dweller in the floorless air, Held in the peace that holds the earth and stars.

—Edwin Markham in "October Nautilus"

AGENT AT MERCED GOES TO HANFORD

MERCED, Sept. 27.—I. M. Piekas, for the past six years Santa Fe station agent here, has been promoted to the position of station agent at Hanford and will take up his new duties October 1. He succeeded Agent Doldt, who was promoted to the position of traveling freight agent. Mr. Piekas and

FRESNO DISTRICT FAIR

SEPT. 30
TO
OCT. 4
1913

Chorographed Steel

Here's What You'll See! Big Fair Begins Tuesday

Bigger And Better Exhibits Than Ever Before
Fancy Cattle, Horses, Sheep, Hogs And Poultry,
Farm Machinery, Engines, Pumping Plants, Commercial Art, School And Other Displays, Etc.

There are more new special features offered as a part of the Fresno District Fair than ever before. It is on a greater scale, with more exhibits, larger ones, and more extensive and interesting displays than have ever before been made. The auto races are attracting some of the greatest drivers in the West, in the United States, in fact. World-famous cars will be here to race, and the championship of the world for a circular track is likely to be determined. Note the famous names in the list. The horse races will be the best ever held here.

Auto Polo

Most Dangerous Game In the World—6 Games To Be Played.

Don't fail to see Auto Polo, the most thrilling and exciting game ever played. On Wednesday, Thursday, and Saturday afternoons and evenings.

Diving Pony

The Diving Pony leaps into a tank of water 40 feet below, carrying a girl with him. A most spectacular feat.

Suicide Leap

In the Suicide Leap a white girl and an Indian girl clasp arms and leap into a tank 105 feet below. This is one of the most hazardous and spectacular free acts ever given.

Somersaulting Automobile

Automobiles rush down an inclined plane, jump an open space, turn over, and safely land on a platform. The cars carry passengers. A feat that will give you something to talk about.

Grand Clean-up Sale

OF

Reed and Summer Furniture

Enormous shipments arriving daily from the east, make it absolutely imperative that we make more room on our floors, so as to be able to properly display our goods. We have decided therefore, to close out all Reed, Chinese Grass and Iccotan at enormous reductions rather than carry them over the winter. All these goods are equally as attractive indoors as out. Here is a great opportunity to get a few pieces at

Reductions up to 50 Per Cent

\$19.50 German Reed Rocker	\$9.95	\$12.00 Chinese Grass Settee	\$7.45
\$22.50 German Reed Table	\$11.35	\$10.00 German Reed Chair	\$5.75
\$14.50 Iccotan Rocker	\$8.85	\$10.00 Rattan Arm Chair	\$3.95
\$13.90 Wicker Rocker	\$7.95	\$9.00 Chinese Grass Chair	\$5.00
\$12.50 Rattan Rocker	\$7.45	Chinese Grass Tabourette	\$1.75

We will continue our sale of broken lots of lace curtains all next week. All patterns of which 4 pairs or less remain have been reduced one-third to one-half. Some great bargains are still to be had.

FARMERS OF UNITED STATES DO NOT PROPERLY BALANCE NATION'S RATIONS

By PETER RADFORD

FORT WORTH, Texas, Sept. 23.—The problem that confronts the American farmer next in importance to distribution is diversification, for what is needed is as necessary information to the farmer as to the consumer. Many states and countries boast of their powers of diversification, but very few of them exercise it. In this article I shall use Texas to illustrate conditions which exist in all other states.

Build a wall around Texas and we would survive to death. This statement is made in defiance of all phrases used by orators and stock speculators employed by sensational writers in picturing the glories and achievements of grand old Texas. The idea that Texas is now an independent industrial empire is a phantom thought that should be driven from the life of this state. While the Texas farmer is plowing his field, his neighbors a thousand miles away, we should diversify our products so we can dine at home and enjoy the comforts and luxuries of home life.

I have before me a balance sheet of Texas production and consumption prepared by the Texas Commercial Secretaries and Business Men's Association, showing that out of thirty-three agricultural products which we produced, and of which we also consumed, we have a surplus production in only two—cotton and rice. We lead all other states in the Union in production of cattle, yet our livestock statistics show a net loss in consumption over production of \$2,000,000 per annum, due to heavy consumption of pork and other meat products which are shipped in from other states. What is true of Texas applies to the nation as a whole.

Texas clothes the world but buys bread from other states.

Our civilization has charged Texas farmers with the responsibility of clothing 20 percent of the population of the globe, but the bare necessities of living for 300,000,000 people is not a valid excuse for our begging bread from door to door of our neighboring states. I hold that every farmer should live at home. We can and should, as a rule, produce on the farm all the things we consume, as well as supply home markets, and when this is done, we have made rapid progress toward eliminating waste and inefficiency in living. As farmers, we must study the needs of our community and nation and see that its wants are supplied.

EMPTY SHELVES IN NATION'S LARDER

The farmers of the United States do not properly balance the nation's rations. Our farmers cultivate the larger areas and produce larger quantities of products per capita than the people of any other nation on the globe. We live in waste and luxury and send a surplus of over a billion dollars of agricultural products per annum to foreign lands, and without our exports the world would go hungry and bitter with cold. We export 10,675,000 bushels of cotton, 40,000,000 bushels of corn, 23,000,000 bushels of wheat, livestock and its products \$185,000,000 and miscellaneous products valued at \$297,000,000 per annum. But notwithstanding this enviable record of the American farmer as a producer, the nation's larder has empty shelves, as well as those that overflow.

We call upon foreign countries for

approximately a quarter of a billion dollars of agricultural products annually which can and should be raised in the United States. I will mention a few of them: Vegetables, \$18,000,000; fruit, \$17,000,000; canned vegetables, \$5,000,000; beans, \$1,857,000; peas, \$1,518,000; onions, \$1,234,000; other vegetables, \$1,724,000. In dairy products we imported last year \$10,030,000, as follows: Cheese, \$6,897,000; cream, \$24,000; butter, \$237,000; and milk, \$62,000. In sugar and molasses our imports reached \$115,000,000; tobacco, \$21,000,000; liquor, \$21,000,000; currants, \$1,500,000; grapes, \$2,331,000; lemons, \$369,000; olives, \$2,303,000; dates, \$43,000; figs, \$935,000; miscellaneous, \$2,000,000.

I will repeat that I have listed only our agricultural imports which should be raised in the United States.

I now want to discuss a few of these products with which we are personally familiar. While these vegetables were being imported in the United States and sold at fancy prices, better qualities of the same products in many instances were rotting on the ground for want of a market. To my personal knowledge, carloads of beans and peas were left unlicked in the gardens of the Rio Grande Valley, and tons of onions rotted in the fields of Southwest Texas for want of a market. Each individual item in the list is a challenge to our system of distribution and needs the wisdom of Congress in appropriating funds for a market bureau.

The American farmer has solved the problems of production and he is now confronted with the question of marketing his products. While he is selling staple articles on a glutted market and his perishable products fester in the air with their stench for want of a buyer, the consumer is importing his supply from abroad or living in want.

The nation's menu must be made up from the fields, pastures, orchards and gardens and to farm intelligently the farmer must know what is needed. The American people stand ready to pay a reasonable price for things they want, but subscriptions can only be made at unsatisfactory prices. It is the world of the farmer to feed the world on the things they want to eat. The means of communication between the producer and consumer are inadequate. The voice of the consumer is hardly audible beyond the city limits, and there are no authoritative highways of intelligence between the seller and the buyer. I have previously suggested the common carriers as an information bureau, and with the assistance of government, I believe they can render efficient service to both producer and consumer.

THE DINNER TABLE

When the dinner bell of the nation rings, there has been slaughtered for the repast 13,000 hogs, 21,000 hogs, 4,000 sheep, 2,000 cwt. of poultry and other meats and there has been 700,000 bushels of cereals and 540,000 pounds of vegetables prepared for the feast. Multiply these quantities by one thousand, representing approximately the number of meals per annum and we have the annual contents of the nation's larder. But with all our immense quantity, superb quality and wide range of products, the American farmer, like the wife of King Nebuchadnezzar, longs for variety and she goes marketing in foreign lands. She buys abroad \$200,000,000 per

annum of farm products that can and should be produced in the United States.

We farm on a large scale and address ourselves to staple products. Every farm in the nation provides an average bread and meat for eighteen and clothing for one hundred and sixty-seven people, and in addition, feeds the work animals, supplies commerce with cloth, leather and such equipment as is essential to turning the wheels of industry and furnishing the homes. On this basis of calculation, the farmer of the United States feeds one-third of the world's population and cloths three-fourths of the people on the earth's surface. This is a marvelous achievement and a tribute to the ability of the American farmer collectively, but we do not balance our rations; we are short on diversification.

NATURE TEACHES DIVERSIFICATION

A record of the annual swing of the pendulum of production affords many important lessons to both producer and consumer.

The world's corn crop for 1911 shows a decrease of 500,000,000 bushels over 1910 and corresponding variations exist in wheat and other crops as they alternate on one or the other side of the ledger.

Necessity is the mother of many diets. She annually shifts the menu of the poor, shortens the garments of the indigent child and brings new products into existence. In the world's production, the shortage of one crop is usually offset by the surplus of another and thus Nature teaches us a lesson in diversification. It is the highway to prosperity and no one-crop farmer can or should expect to prosper.

CLERGY REVIVING LITURGICAL CHANT

Gregorian Melodies Slowly

Coming Into Use, Following Pope's Suggestion

Lovers of the liturgical chant of the Catholic church will rejoice to note the multiplication of signs that the faithful in the diocese of San Francisco are trying to carry into effect the wishes of Pope Pius expressed in his famous "motu proprio."

For example, at St. Peter's church, in Alameda street, on almost every Sunday, you can hear the choir of men, women and boys sing the beautiful "Missa de Angelis." Father Carahar of St. Mary's has begun the good work, and on Sunday, Sept. 22, his newly formed choir of boys joined with their elders in singing a plain-song Kyrie. Again, Father McCarthy, of Sacred Heart church is training a company of boys so that they may join with the adults in singing the Gregorian psalms at vespers.

YOUNG PRIESTS TRAINED

More fundamental still is the work that is being done by the professor of plain chant at the diocesan seminary, Menlo Park, and his able colleague at the organ, Father Hunt. These good clerics are fastening into the novices under their guidance the principles of Gregorian music, and precept is regularly exemplified by practice. The result of this training will be to create a generation of priests, to whom the traditional music of the church will be not merely a permissible or accidental part of their religious life, but belong to its very essence.

Until the Renaissance, the Gregorian chant was so completely dominant in the services of the church that not only was it an ever-present feature of liturgical observance, but it gave color to the work of the great composers.

The masses of men like J. S. Bach, Lully and Palestrina are steeped in the old song, and even when musicians made use of secular themes as subjects, they were so faithful to the spirit of the ecclesiastical chant that the worldliness of their themes was lost sight of in the spirituality of their treatment.

BASED ON MUNDANE THEMES

It is sometimes objected against individual masses that they are based on so mundane a theme as "The Arm of the Lord," but, amid the mazes of sacred polyphony, the old tune completely loses its worldliness and often, could not be recognized save by a musician. But the "new music," out of which sprang opera and oratorio, so engaged men's minds that the very consciousness of the church itself became infected; the grand old writers of the Roman school and their German, English and Spanish emulators began to be neglected; the operatic aria invaded the sanctuary; sacred words were written to coloratura; dramatic realism superseded the spiritual recollection of the ancient composers under the inspiration of the unadorned chant; so dire was the mischief that the sacred became musically a sort of sacred opera; the "Miserere" was set to dance rhythms; the sorrowful words of the "Stabat Mater" were used as a threat on which to hang roundels for prima donnas and fashionable lyrics.

LATINS LOSE OLD IDEAL

The declension from the ideal of the ancient church was the most marked in Latin countries and, perhaps, because it is so strong, Latin in its complexion, San Francisco has lagged a little behind other American cities in its attempts to follow the behests of Pope Pius. But the pontifical injunction, though expressed with the gentleness of an appeal, was none the less meant to be obeyed. It is not desired to banish modern music from the churches; but it is meant to abolish all such music as jars against the character of the words with which it is associated.

The ideas of the church on this head are clear and easy to be understood, even by persons who are not learned in music. The services of the church are acts of worship. Anything, therefore, which makes the worshiper forgetful of his worship, is a religious point of view, an inappropriateness.

THEATRICAL VS. SACRED

When Hecker Berles, in his tremendous setting of the "Requiem," attempts a realistic representation of the crack of doom, he distracts attention from the matter of the service to his manner of presenting it. It is the same with Gounod when he writes in a strain that would not seem inappropriate on the lips of Juliet or Marguerite. Yet Gounod has written some really wonderful music. Even Mozart, devout though he is in his "Ave verum" or the "Klarymosea" or his Requiem, is often, if not irreligious, certainly unreligious.

Beethoven himself sometimes set the words of the mass to melodies which are more suggestive of the opera house than the church.

In some of the Eastern dioceses they have done much to remove abuses. Here the work is yet to be done. Not long ago Father Hunt, of the diocese of San Francisco, has written "Barcarolle" from "The Tales of Hoffman" at the most solemn moment of the mass. That was his way of raising his spirit to heights of heavenly contemplation. He forgot the difference between amorous and religious

Pay Less

When You Buy A Range Get A PEERLESS

They cost you less and are the best ever. We have been selling PEERLESS ranges for the past eight years and any one of our hundreds of users will bear us out in this claim. PEERLESS ranges always please even the most fastidious.

Ask any housewife what part of her daily household work she considers the most important and she will invariably answer "baking." It is the unequalled baking qualities of PEERLESS ranges that have won for them their first place in the hearts of their users. "No more half baked bread or cakes, but an evenness in baking and browning that makes cooking a real pleasure," is the ever gratifying expression that makes each and every one of our customers a booster for PEERLESS ranges. They know because they have used them.

PEERLESS ranges cost you less than other makes because of the buying advantages enjoyed only by

us. We save by buying a California-made range; we save by buying in carload lots; we save by dealing direct with the makers themselves; we save by eliminating the high freight the dealer pays who sells an Eastern make. All these savings are yours, which mean that we make the same profit and you get a range which is a masterpiece in every detail of its construction.

We are going to sell two carloads this season and to do this means that we must have the bulk of the range business. We are sure we will not be disappointed because of our position to give so much for the money. "Many sales at a small profit on each" will be our slogan, and if you are contemplating buying a stove or range, it will be to your interest both financially and pleasantly to see our line before you buy. You will find it complete from the lowest priced model to the most elaborately finished.

Get a copy of the latest edition of our Free Range Booklet just off the press. Make your selection and join the Peerless army of happy housewives.

S. P. FORCES VETS TO PAY FULL FARE

SACRAMENTO, Sept. 27.—Asserting that the Southern Pacific railroad compels Yountville home veterans to pay full fare by the issuance of an order to the Yountville agent prohibiting him from opening the ticket office until a few minutes before train time, Freeman H. Bloodgood, a member of the state board of control, acting as a private citizen, today protested to the State railroad commission.

The veterans are not given time to present their credentials and secure half fare tickets to which they are entitled," said Bloodgood.

HEAVY SENTENCES FOR AUTO THIEVES

LOS ANGELES, Sept. 27.—In an effort to check the operations of a band of automobile thieves, who have kept the police of this city busy for weeks, Judge Frank R. Williams, of the Superior Court, announced today that hereafter prisoners appearing before him guilty of automobile larceny will be sentenced to penal servitude. This will be carried out without exception," said Judge Williams.

"The maximum penalty for grand larceny will be imposed in every case, until automobile thieves in this vicinity become less active."

VISIBLE (EVENING) OCCUL- TIONS OF ALGOL FOR THE SEASONS OF 1913-1914

By WILLIAM A. MASON.
 Algol is such an interesting star that every star lover should be able to locate and follow its perfectly regular occultations, which occur at intervals of 2 days, 20 hours, 48 minutes and 55 seconds. That is, they occur every third day about 3 hours and 11 minutes earlier. The phenomenon is due to the revolution of Algol and its dark companion about a common center of gravity in a plane passing through our sun. The dark companion, which is about the size of our sun, is slightly smaller than Algol and does not totally eclipse him, but reduces his light every third day from the second to the fourth magnitude.

The eclipse lasts ten hours—five hours diminishing to the minimum and five hours increasing.

Below are the dates for all the visible (evening) minima throughout the season. It is interesting to note that the eclipses that one sees on any particular evening actually took place 112 years ago, the light only just reaching us traveling a celestial space of 80 trillion miles.

One may keep track of Algol indefinitely if he notes that the series is repeated every 172 days (40 occultations), but 55 minutes later; or every 344 days (80 occultations), 1 hour, 50 minutes later. The accompanying chart will assist the reader in locating this star.

1913.

OCTOBER EVENING SKIES.

By Garrett P. Serviss.

The Stars and Constellations.
 The stellar gem of October is the brilliant Vega in the constellation Lyra, which may be seen slowly dropping down the northwestern quarter of the sky, preceded by Hercules and the Northern Crown, and followed by the Northern Cross in Cygnus. South of the Northern Cross and like it immersed in the Milky Way, glitters Altair in the constellation Aquila. The Great Bear, with the Great Dipper, is under the pole in the north, and Cassiopeia is high in the east, southeast of Polaris. Below Cassiopeia, toward the south Andromeda lies extended, her head touching the northeast corner of the Great Square of Pegasus. East of Andromeda, following her along the path of the Milky Way, appears Perseus, brandishing his diamond-hilted sword, and carrying the head of Medusa, with the strange twinkling star Algol in the left hand. Near the ecliptic, below Perseus, glitter the Pleiades, just risen, and north of the Pleiades shines Capella, a starry jewel capable of rivaling Vega itself, but not possessing the blue-white brilliancy of the latter. In the east, Cetus is seen rising and between Cetus and Andromeda appears Arius, the Ram, the first constellation of the zodiac. Low in the south, east of the meridian, glows the lone star Fomalhaut in the Southern Fish. The Milky Way, now arching across the sky from

(the northeast to the western horizon, is always an object of great beauty, in the absence of moonlight. It cannot, however, be well seen in cities. Those who have never seen the Milky Way on a clear dark night in the country can have no conception of its sublime beauty, and of the thoughts of immensity which it awakens. It is very brilliant in Aquila, Cygnus, Cassiopeia and Perseus. Above the head of the Northern Cross the eye readily observes a dark space in it recalling, to some degree, the appearance of the celebrated "Coal Sack" in the Southern Hemisphere. All along its course the Milky Way, composed of millions of stars, too small or too remote to be individually evident to the naked eye, throws its light into vast loops, garlands and clouds, which, in their ensemble, produce a most majestic effect. A good opera glasses reveals many fields of stars in the Milky Way of astonishing beauty. In the mythologies of many nations the Milky Way has been regarded sometimes as a mysterious pathway among the stars, trodden by gods and spirits, and sometimes as a certain river in the heavens, a river composed of some ethereal fluid as evanescent as vapor. But in the eyes of the astronomer the Milky Way is the framework of the universe, and all modern investigations of the constitution of the celestial system are based upon it. Our sun, which is but a pygmy in comparison with the greater ones surrounding it, seems to be situated not far from the center of the vast space which the Milky Way encircles like a starry globe. But the sun is in motion across this comparatively open space, traveling at the rate of about twelve miles per second from the south toward the north, and dragging the earth and the other planets with it. It is like an illuminated note drifting across an immense apartment which is crowded with countless lamps. Whether it will go on as it is now going, or will turn again, is something that lies beyond the present range of our knowledge. For the benefit of those possessing telescopes attention may be called to a few of the conspicuously beautiful double stars now to be seen. One of the greatest of these, one within the reach of the most modest instrument, is the charming Albireo, or Beta Cygni, in the foot of the Northern Cross. The larger star is yellowish white and the smaller deep blue, and their distance apart is about half a minute of arc, or say one-sixtieth of the diameter of the full moon. I have separated this star with a powerful field-glass. Another beauty is the star Gamma in Andromeda, the last conspicuous star toward the northeast in the row marking that constellation. Here again there is a beautiful contrast of colors between the component stars. But they are much nearer together than those in Albireo. Gamma, the smallest of the three stars in Andromeda, shown in our chart is a beautiful double, consisting of a being the star double star ever discovered. Its duplicity was discovered accidentally by Robert Hooke in 1664 while he was following a comet with his telescope. Now thousands of double stars are known. The "double" star Epsilon in Lyra, the northernmost of the two little stars making a triangle with Vega, is always an interesting object to view with a telescope capable of magnifying 150 diameters. The star Gamma in Delphinus, a Job's Coffin, which will

be seen below Cygnus and east of Aquila, is also a beautiful double. Gamma is the eastern-most of the four stars of Delphinus shown in the chart.

There are many meteor showers visible in October. Mr. Denning has predicted no less than nine. One of them, occurring on the nights of the 18th and 20th in 1913, is usually quite bright, the meteors moving swiftly and leaving streaks behind them. They radiate from a point in the feet of Gemini, the twins, and the radiant focus is well up in the east before midnight. With several meteors are seen in succession an effort should be made to trace their paths backward to a point of intersection, in this way the "shower" to which they belong may be determined. The study of meteors is one of the branches of observational astronomy which requires the use of no instruments except a pair of quick true eyes.

THE PLANETS FOR OCTOBER.

Mercury will be in the western evening sky this month but it is so far south of the Equator that it will not be visible until the last of the month. On the 31st it will be in Scorpio, setting about an hour after the sun, and for a few days before and after this date may be seen if you have a low clear horizon.

Venus is still finely in view in the morning sky rising about 4 A. M. on the 1st and 5 A. M. on the 31st. Mars is now coming into the evening sky rising about 11 P. M. on the 1st and an hour earlier on the 31st. Mars will be in conjunction with the moon at 7:59 P. M. on the 21st, Mars being 3 degrees, 55 minutes south of the moon.

Jupiter will be at the quadrature with the sun at 9 P. M. on October 2, and will be found due south immediately after sunset. It will set about 11 P. M. on the 1st and at 9 P. M. on the 31st.

Saturn will rise at 9:20 P. M. in Taurus on the 1st and at 7:30 P. M. on the 31st, and will be in view all night. It is splendidly situated for observation and its rings are opened so as to be the most advantageously seen at this time.

Uranus is still interestingly in view in Capricornus.

Neptune rises at midnight on the 1st and at 10 P. M. on the 31st.

PLANETARY CONFIGURATION FOR OCTOBER.

(Washington Mean Time)

Oct. 2, 7 A. M. Mercury in descending node.
 Oct. 2, 10 A. M. Mars and sun at quadrature.
 Oct. 2, 9 P. M. Jupiter and sun at quadrature.
 Oct. 6, 1:12 P. M. Jupiter and moon in conjunction. Jupiter north 4 degrees 51 min.
 Oct. 8, 10:20 A. M. Uranus and moon in conjunction. Uranus north 3 degrees 35 min.
 Oct. 12, 1 P. M. Mercury in aphelion.
 Oct. 13, 3 P. M. Uranus stationary.
 Oct. 14, 5 P. M. Venus in perihelion.
 Oct. 15, 4:10 P. M. Saturn and moon in conjunction. Saturn south 5 degrees 56 min.
 Oct. 21, 7:59 P. M. Mars and moon in conjunction. Mars south 3 degrees 55 min.
 Oct. 21, 12 P. M. Neptune and sun at quadrature.
 Oct. 22, 2:46 P. M. Neptune and moon in conjunction. Neptune south 4 degrees 53 min.
 Oct. 27, Uranus and sun at quadrature.
 Oct. 27, 3:23 P. M. Venus and moon in conjunction. Venus north 3 degrees 18 min.
 Oct. 31, 3:10 A. M. Mercury and moon in conjunction. Mercury north 2 degrees 2 min.
 Oct. 31, 8 P. M. Neptune stationary.

MOON PHASES.

Central Standard Time (Chicago)
 Oct. 6, 7:56 P. M. First quarter.
 Oct. 15, 12:16 A. M. Full moon.
 Oct. 22, 5:03 P. M. Last quarter.
 Oct. 29, 8:39 A. M. New moon.

A NEW COMET.

Bulletin 626, Harvard College Observatory, Sept. 3, 1913.—A telegram received at this observatory today from Rev. Joel Metcalf, at South Hero, Vermont, announces the discovery of a comet by him in the following position, Sept. 1, 56 G. M. T. Right ascension 6 hours 50 minutes. Declination north 57 degrees. The comet was of the fifth magnitude and had a slow northerly motion.

EDWARD C. PICKERING, Director.
 (The position given would show the comet to be in the constellation "Lyra" and in a straight line about one-third of the distance between Cassiopeia and the first magnitude star in Auriga, and the uppermost of the two stars of the "Big Dipper.")

ANOTHER COMET.

Harvard College Observatory, Bulletin 625.—A cablegram received at this observatory from Kiel gives the following position of Neujmin's Comet as observed by Graff: September 6, G. M. T. R. A. 23h. 49m., 55s. S. Dec. 6 degrees, 27 minutes, 44 seconds. The comet was visible in a small telescope.

EDWARD C. PICKERING, Director.

Is Your Child's Health and Happiness Worth 75c

If so, you are vitally interested in KOVERALLS, the most hygienic, healthful and economical play garments that have yet been devised for children one to eight years of age.

Your doctor will tell you to dress your child in roomy garments that do not bind at any point; that permit the blood and air to circulate freely.

This is where the
air circulates

KOVERALLS meet these requirements as no other garments do. As the picture of the original—KOVERALLS girl shows, the air circulates freely. There are no tight elastic bands to stop the circulation of the blood. They fit so neatly that any child looks well dressed in them, and yet are so loose and roomy that full play of the limbs is allowed. In brief,

**Koveralls Keep Kids
Kool, Klean and
Kontented**

making healthy, happy children — and happy mothers, too — for they lighten mothers' work and care, save the children's costliest clothing and save materially on the wash bills.

**Koveralls sell for 75c
the suit**

Made in light weight long-wearing materials for Summer wear, in a variety of pleasing patterns and colorings—white, khaki, blue and white stripes, neatly trimmed with fast color blue or red galatea. All KOVERALLS are made in high neck and long sleeves, which protect the child from the blistering sun, or in Dutch neck with half-length sleeves.

This Woven Label

is sewed on every suit of genuine KOVERALLS. Koveralls are made only by Levi Strauss & Co. of San Francisco. Insist on getting KOVERALLS with this label, because it carries with it the iron-clad guarantee.

A New Suit Free If It Rips

Get the genuine KOVERALLS. Buy your child a suit today. If your dealer cannot supply you we will forward prepaid on receipt of price.

The American Bicycle

This is the newest thing in bicycles. This wheel is equipped with the latest achievements in spring forks and double supported frame. It has everything that a bicycle rider could wish for, spring forks, double supported frame, roller chain, frame pump, motor saddle, large rubber pedals and any style handle bars. Come in. You'll like the looks of it.

MEN OF BERKELEY TO DON OVERALLS

Whole District To Spend
One Day Improving
Grounds

BERKELEY, Sept. 27.—In overalls, and with sleeves rolled up, business and professional men of North Berkeley will on October 4th arm themselves with shovels, rakes and hammers to spend a day improving the grounds and clubhouse at Codornices park. At noon they will be refreshed with luncheon prepared by the wives of the one-day laborers. Already a large number of citizens of the park district have volunteered their services.

Codornices park, leased for twenty years from the People's Water Company, is the last piece of available park ground in Berkeley not in private ownership. It contains twenty-three acres of wooded knolls, a running water, and springs and in its natural beauty, residents of North Berkeley believe that the most should be made of this beauty spot, not only for aesthetic reasons, but that the children may have a place to play.

Accordingly, October 4th has been set aside as labor day, when the men of the district will strive not only to improve the grounds, but to earn the dinner which their wives will serve. Mrs. H. H. Gastman and Mrs. Thomas Patch are among the women who are arranging the details of the day.

Simplicity

The new SIMPLICITY DISTILLATE ENGINE with the OSCILLATING MAGNETO does away with all battery troubles and gives to the user an engine that can be run by anyone, as a large percentage of engine troubles come from defective batteries. The new Simplicity Distillate Engine is started by ROCKING THE PISTON AGAINST THE COMPRESSION, thus doing away with the old way of having to turn the fly wheels over.

MEET US AT THE FAIR GROUNDS, and let us show you this engine. We also manufacture our own centrifugal pumps, direct connected, electrical and belt driven.

Selection of Pumping Plant

We are fortunate in securing for these columns a manuscript by Professor B. A. Etcheverry, of the State University, which sums up in a very thorough manner information which will be welcome to many farmers. It deals with the selection and installation of small pumping plants in such a way as to best serve the farmer's needs. We give the first half of this paper below. It will be concluded in The Republican next week.

"The proper selection of a pumping plant depends upon many factors which should be carefully considered by the intending purchaser. These factors are: (1) source of water supply, (2) capacity of plant and period of operation, (3) the kind of pump, (4) the class of engine or driving power, (5) the first cost, (6) the fuel cost, and (7) the cost of fixed charges and attendance. These factors are independent and should be considered together. Their relative importance will vary with local conditions and for that reason it is not possible to state definite rules which will apply in all cases. A study of the conditions affecting each factor is therefore necessary in each case.

SOURCE OF WATER SUPPLY. The source of water supply may be surface water, such as water occurring in rivers, lakes, canals, etc., or may be ground water supply. Where surface water is available, the water will be developed by means of a proper intake, which for the simplest plant will consist simply of the suction pipe of the pump extending into the body of water. Where ground water is available the most common means of development is by wells.

Wells. The well may be a dug, bored or drilled well. The most common form of well for individual plants in California is a drilled or bored well 10 to 15 inches in diameter or larger, lined with a casing which may be one of the three following types:

1st. Standard steel-screw casing. No. 12 to No. 16 gauge, with joints riveted together.
2nd. Double black steel casing. No. 12 to No. 16 gauge, known as California pipe casing, and very generally used in southern California. This casing is made of riveted steel sections 5 feet long placed with broken joints. The bottom of the casing consists of a string of iron 15 to 30 feet long, made of triple thick riveted together, and with a steel shoe at the lower end.

The well and casing should extend into the water-bearing gravel sufficiently far to give a perforated area equal to at least five times the cross section area of the well. The perforations are made with an improved cutting tool, and consist of 6 to 8 slits made in each ring or circle; each slit 12 to 18 inches long and 3/8 to 1/2 inch wide. A space of 4 inches is skipped and another ring of slits is staggered with the adjacent ones is made. Slits should not be over 18 inches long with wave pipe casing.

In southern California, near China, the price of drilling deep wells is as follows: For 10, 12 and 14 inch wells in fine material, \$1.25 per foot for first 600 feet; for 16 inch wells in fine material, \$1.50 per foot for first 600 feet. For depths greater than 600 feet the price is 50 cents extra for each additional foot.

The cost per foot of steel pipe casing is about as follows:

Diameter	12 Gauge	14 Gauge
10-inch	1.27	0.92
12-inch	1.51	1.12
14-inch	1.76	1.32
16-inch	2.01	1.52

CAPACITY OF PLANT AND PERIOD OF OPERATION.

The required capacity of the plant will depend on the area irrigated, the duty of water or depth of water required on the land and the period of operation. For ordinary orchard soil a

total depth of 12 inches of water during the irrigation season will be sufficient for young orchards. For a full bearing deciduous orchard 18 inches, should be ample, while for alfalfa and other forage crops 24 inches in plenty, although more may be used to advantage alfalfa where the lift is low, as it will usually not be feasible to grow anything but alfalfa. To reduce the cost of pumping, no excess water should be used, all losses should be prevented by careful irrigation and thorough cultivation, in which case a young orchard on fairly deep retentive soil may not require more than 6 to 9 inches of irrigation water and a full bearing orchard not more than 12 or 15 inches for deciduous crops and 18 inches for citrus trees during the irrigation season. To put a depth of 2 feet of water on one acre, it makes a flow of very nearly 1 cubic foot per second for 24 hours; this is equivalent to 450 United States gallons per minute for 24 hours. This requires a pump capable of pumping 1-4 of a cubic foot per second, or 110 United States gallons per minute, when the pump is operated continuously 24 hours a day every day during the irrigation season of four months. For a 10 acre orchard the required capacity is the same conditions would be 1-4 of the above or 28 gallons per minute or 1-4 of a cubic foot per second.

The above two examples are based on a pump operating continuously at the rates given above. While continuous operation decreases the required size of plant, it is usually preferable to select a plant of larger capacity and operate it only a part of the time. This is especially desirable for very small orchards, in which case continuous operation gives a stream too small to irrigate with. The other disadvantage of continuous operation is: 1st. Continuous operation requires attention to operate the pumping plant. For very small tracts a regulating reservoir may be used, but it must be of considerable capacity to be of any service, and it must be lined with concrete, which when pumped is too valuable to lose. Usually it is preferable to purchase a larger plant and do without a reservoir.

2nd. Continuous operation gives a small stream which can not be applied economically. 3rd. Continuous operation means that the water cannot be applied to the different parts of the orchard within a short time, so that only a small part of the orchard or farm receives the water when most needed, and the remainder must be irrigated either too early or too late.

4th. A small plant is less efficient and requires a proportionately larger fuel consumption than a larger plant to pump the same quantity of water. On the other hand, a very short period of operation requires a comparatively large pumping plant, which will greatly increase the first cost of installation, the interest on the capital invested, the depreciation and funds necessary to provide for renewal. It also requires a larger source of supply, which may not always be available. For instance, the required flow may exceed the capacity of the well or may so lower the water plane that the cost of pumping will be increased. Also in some localities the power company may offer a low flat rate for continuous use.

Usually it is desirable to operate the pump not over one-half or one-third of the time during the irrigation season.

(Continued on Page 28.)

GUERNSEY COWS HAMPSHIRE HOGS ARE PRIZE WINNERS

One of the smaller stock ranches of the state which is attracting increasing attention is the Bella Vista ranch of Dr. J. W. Henderson at Martinez. Here I found a choice herd of Guernseys, and probably the best Hampshire hogs in the state. At the recent state fair, eleven firsts, eight seconds and five thirds were taken by the hogs, besides several gold medals and a special prize offered by the American Hampshire Breeders' Association. Though only a few Guernseys were on exhibit from the Bella Vista ranch, and these in competition with the United herd of Charles Lathrop of Stanford University and the fine Grape Wild Farm herd of A. B. Humphreys, yet they took several prizes.

It might well be expected that excellent individuals would be found in this Guernsey herd, for it is headed by the great bull, Lord Kitchener, several times grand champion at the California state fair, the title having been relinquished by him only last year, and even then to one of his sons. He is, therefore, a producer of quality. Moreover, his young heifers now coming into milk are demonstrating high productivity though the only one so far submitted to official test is the 3-year-old Holliston France, who produced in one year 3,879.12 pounds of milk and 550.13 pounds of butterfat, thus placing her among the highest producers in her class. Many of Lord Kitchener's Island of Guernsey relatives are also remarkable for excellence. His dam, La Fleur du Jardin, was awarded the silver cup of the Royal Guernsey Agricultural Society for the best cow in the show, and her own daughter was reserve for the honor. She also stood first in the Special Dairy Class.

Clementine Mabel is an excellent representative of the cows of the Bella Vista herd. Under ordinary care she made an A. B. record of 10,746 pounds of milk, 534.93 pounds of butterfat, in one year. Her daughter, Golden State Beauty, produced in one month under official test 1,248.80 pounds of milk and 73.32 pounds of butterfat. Golden State Beauty is also in the class of producing dams, as during the past year two of her daughters, Virginia of Palmhurst and Margaret of Palmhurst, qualified for Advanced Registration. The latter produced at the age of 22 months 3,247.3 pounds of milk and 296.81 pounds of fat in one year. Two imported cows in the herd are also doing creditable work, while the young heifers in the herd are very promising, showing good size, pronounced udder development and well placed teats.

A rather remarkable fact about Clementine Mabel and her family is that for at least five generations a female has been produced as first calf, and that at the age of about two years. Four of these generations are now to be found in Bella Vista herd. Clementine Mabel at first freshening at 2 years of age produced Golden State Beauty, and she in turn produced a first heifer at 2, and in all them A. B. and the bull Gold Star, a younger son stood first in a strong senior calf class at the 1912 California state fair. Her calf this year is her most promising offspring.

Clementine Mabel and Golden State Beauty at the age of 2, and for the five succeeding years has dropped a bull calf each year, and reports from these show that they are getting from 65 to 80 per cent heifers—a tendency to be continued in a line.

At the 1913 state fair, Golden Buttercup, whose picture is given here, took first prize in the senior calf class. Virginia of Palmhurst won third in the 3-year-old cow class, and Virginia and Buttercup won second as producing dams. Among junior yearlings, William of Orange came second, Lingard

Eugenics Applied to Hogs

The expression "the male is half the herd" is often quoted by those who have studied the problems of heredity. It tells us that, other things being equal, the sexes are equally prepotent. Therefore if the boar is one-half the herd, the sows certainly constitute the other half, and their selection is a highly important matter which should receive the same careful attention as the selection of the boar. The sows used for breeding purposes should be selected from the best animals in the herd, and from mothers gentle in disposition, and prolific. A careful record should be kept of the herd and sows that do not farrow or raise a reasonably large number of pigs annually should be culled out and sold for pork.

While hogs do not show the strong differences of sex that we look for in other domestic animals, such as the male and female, these features constitute a marked feature of a good disposition and the ears not too coarse. The throat should be clean and trim and the shoulders smooth and deep. The sow should be of good length of body, (somewhat greater than the type preferred by butchers), length of body being regarded as an indication of fecundity. Yet length should be in good proportion to depth and width of body. Length of body should not be selected at the sacrifice of quality. The body should be slightly arched in the back, with no crease or drop back of the shoulders. The back should be wide and straight and deep, fleshy, the width being uniform throughout and the depth in proportion to the length and width.

There should be plenty of room for the vital organs, as indicated by a deep, capacious body from end to end. A sow with such a conformation is said to have a strong constitution. This is very important with brood sows, since sows that are weak in this respect can not become the mothers of strong, hardy pigs. Depth and width of the chest especially indicate a strong constitution. In addition, the eyes should be bright and clear, and the general appearance thrifty and active. Get sufficient bone in the legs to carry the animal well, and be sure the pasterns are not too long, but are strong and upright. The feet should be of medium size and the toes not too spreading.

Brood sows should show considerable quality but should not be over-refined and delicate. Extremes of refinement often lead to delicacy of constitution and often accompany sterility. It is important that a brood sow should have good reproductive powers, that is, that she should be a good feeder, or the litter will be small and poor.

Brood sows should be selected from the best animals in the herd, and from mothers gentle in disposition, and prolific. A careful record should be kept of the herd and sows that do not farrow or raise a reasonably large number of pigs annually should be culled out and sold for pork.

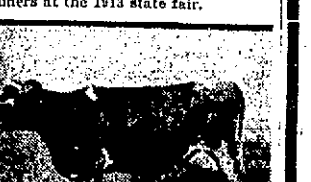

At the 1913 state fair, Golden Buttercup, whose picture is given here, took first prize in the senior calf class. Virginia of Palmhurst won third in the 3-year-old cow class, and Virginia and Buttercup won second as producing dams. Among junior yearlings, William of Orange came second, Lingard

Golden Buttercup of Bella Vista. Born December 23, 1912. Sire, Imp. Prince John of Oakhurst Dam, Golden State Beauty. Winner of first prize senior calf of 1913, California State Fair.

The Hampshire hogs are not as well known in California as in the Middle West, but the showing made by those at the Bella Vista ranch proves that they deserve a good word. Though the breed does not rank with the largest, it being medium in size, it has many notable characteristics which commend it highly. Its meat is recognized as being of distinctly superior quality, and during recent years it has won much success as a pure bred hog. Moreover, the fecundity of the Hampshire is of superior character. Sows usually farrow litters of ten or twelve pigs after the first farrowing, and make excellent mothers and nurses. In this respect they rank with the most prolific breeds.

The pictures here given of 700-pound Berkeley King, and 600-pound California Queen, indicate the general characteristics of the type and the excellence of these individuals. Both were prize winners at the 1913 state fair.

Berkeley King, Hampshire boar. Winner of prize at State Fair.

California Queen, 3 year old Hampshire sow. Bella Vista Ranch. Prize winner at 1913 State Fair.

Eat at the
Rathskeller
during
Fair Week

Our Rathskeller Provides Both Food & Entertainment

Music:

Get Our Prices On Tile A New Lot Just In

We have just recently bought a new lot of tile at a price that enables us to sell at a very low price.

It is ornamental and of highest quality.

We manufacture all kinds of brick. Common brick for ordinary building purposes, ornamental brick for residential and business buildings are on display at our office.

SEE OUR FAIR EXHIBIT

We want you to be sure to see our exhibit of brick at the Fresno District Fair. We will have a beautiful exhibit in the pavilion.

Craycroft-Herold Brick Co.

We Are Going to Show You the Oscillating Portal Wall Bed at the District Fair

Also the Disappearing Door

We are going to have an exhibit at the Fresno District Fair. We are going to give you the opportunity to see the Marshall & Stearns Oscillating Portal Wall Bed that we have told you so much about. We are going to show you this bed, demonstrate how it works, the space it saves, its advantages, and how effectively it is concealed.

We will also exhibit the Disappearing Door. This is a new device, being much used now-a-days in up-to-date homes. It saves 20 per cent in space.

Building Materials

Besides the household conveniences that we will have on display, we will also exhibit some of the many building materials that we handle. Such things as metal lath, metal ceilings, cornices, etc., will be shown. These are things you should see before you build.

MAKE INVESTIGATION OF RAILWAY ACCIDENT

Board of Inquiry Exonerates Crew That Injured Man At Crossing

TULARE, Sept. 27.—An investigation of the accident by which the north-bound passenger train No. 51, struck Perry Kinser, at the Marshall street crossing last Wednesday night, was held here last evening by a "board of inquiry," consisting of Division Superintendent C. H. Ketchum, Master Mechanic E. C. Keim, Division Engineer L. Beauman, of the Southern Pacific Company; H. S. Crane, president of the Commercial Bank, and J. E. Weaver, president of the City of State Bank of this city. The board was in session for about two hours in the division superintendent's private car. The scene of the accident was carefully inspected, and testimony was taken from the train crew of No. 51 and a freight train that was on a siding near the Marshall street crossing. Nightwatchman A. S. Collins, who witnessed the accident at close range also gave his version of the affair.

The findings of the board, which were made public today, were that from the testimony and inspection of the surroundings, there were no obstructions to the view of the man driving the train, and had he looked and not allowed his attention to be attracted by switching being done by engine 154 he would have seen No. 51 approaching and avoided being struck. The evidence shows that every effort was made by the employees of the railroad company to avoid the accident, and said employees are exonerated from all blame.

A. T. Kinser, father of the injured young man, stated this morning that he could not understand the purpose of the so-called board of inquiry, unless the railroad company was making a bid for public sentiment. Neither he nor his attorney had been invited to be present. The report of the board would have no effect upon a claim for damages which he would present to the company.

Young Kinser this morning showed indications of recovering consciousness, and the attending physicians are now expressing some hopes of his recovery, although the extent of the injury to his brain cannot yet be determined.

COALINGA WILL HAVE FINE LECTURE COURSE

Will Open Oct. 9 With Dr. Fox, of Chicago; Good Talent Secured

COALINGA, Sept. 27.—The Coalinga Lecture Course will be opened on the evening of Thursday, October 9, by Dr. D. F. Fox, the Chicago lecturer, now residing at Escondido, who will deliver his lecture on "A Neglected Cavalier." Dr. Fox will be remembered as an entertaining lecturer of the last teachers' association meeting at Fresno. There will be seven in the course this season, composed of the best available speakers. With the experience of last year before them the committee have not confined themselves to choice of speakers offered by the various bureaus, but have been in correspondence for some six months, and as a result a number of the best speakers of California men who are too busy to take lecture trips have consented to give a single lecture in Coalinga. Ex-Governor Pardee will discuss the irrigation of the West Side lands.

Dr. Atkin of the Lick Observatory will lecture on the possibility of life on the planets other than the earth.

Professor Hainthaus Wood, the aviator, will demonstrate the use of gyroscopes in aviation.

Monteville Flowers will read "Les Miserables."

One number is still in doubt. Bob Buford was secured to give one of his lectures, but sickness has caused him to cancel all engagements.

The Haynes-Kellogg Party makes the seventh of the series. These lectures will follow in regular intervals of about a month, and will give Coalinga an unequalled course of lectures for the winter season.

FIND OLD DECISION ON CITY WATERWAY

Declares Porterville Ditch Is Not Natural Course, and May Come Under Ordinance Provision

BANQUET IS GIVEN BOOSTER IN MERCED

MERCED, Sept. 27.—C. H. Edwards, secretary of the Merced Chamber of Commerce, was the guest of honor last night at a unique beef steak dinner in the stag room of Hotel El Capitán. Forty business men and professional men of the city attended. The event was in celebration of two events: the recent marriage of Mr. Edwards and his success in putting in a prize-winning exhibit at the state fair.

TWO DIVORCES GRANTED HANFORD, Sept. 27.—Nora Lindley was today granted an interlocutory degree of divorce from Louis B. Lindley, on grounds of cruelty.

M. N. de Farla also received an interlocutory decree from Mary P. de Farla because she refused to live with him, constituting cruelty and desertion.

FRIENDS CHASE MAN DOWN STREET WITH HIS CLOTHING AFIRE

TULARE, Sept. 27.—Chasing down Jas. Seiffert, whose clothing was in flames, throwing him to the ground and rolling him in the dirt was the method employed yesterday evening to save him from being badly burned.

Seiffert's clothing caught fire when a burning can of gasoline in the hand of A. Young of this city was thrown on him. Seiffert immediately started to run across a field toward a pond of water. Messrs. Elliot and Woods ran him down and succeeded in smothering out the flames before he was seriously burned.

Young was trying to start a gasoline engine and was pouring gasoline into the open priming cock when the engine fired and the flame ignited the can of gasoline. Young's hand and arm were burned and he threw the can over his head spilling the burning gasoline over Seiffert. Young's burns were not serious.

PROMINENT DOCTORS WORK TO SAVE LIFE OF BOY AT MERCED

MERCED, Sept. 27.—Dr. Schmitt of San Francisco, Mauphi of Fresno and Lilley and Davis of Merced are handling the case of Ivan Lilley, son of Dr. and Mrs. W. B. Lilley, who is critically ill at a local sanitarium and, although there is still a faint hope for his recovery, the end would not be unexpected. Today a second operation was performed on the young man, following a turn for the worse last night. He is suffering from pyemia, a case of general blood poisoning.

Births, Deaths and Marriages in the San Joaquin Valley

BORN.

HARRIS—In Lindsay, September 19, 1913, to the wife of Albert Harris, a daughter.

PETERS—In Lindsay, September 24, 1913, to the wife of R. L. Peters, a son.

SILVA—In Newman, September 23, 1913, to the wife of Manuel B. Silva, a son.

LEBOW—In Riverbank, September 26, 1913, to the wife of C. A. Lebow, a daughter.

WILKINSON—In Hanford, September 26, 1913, to the wife of V. C. Wilkinson of Riverdale, a daughter.

AYERS—In Hanford, September 24, 1913, to the wife of George Ayers, a son.

MARRIED.

SARMENT—AUSTIN—In Hanford, September 27, 1913, Charles C. Sarment, 23, and Pauline Austin, 23, both of Hanford. Rev. Walter C. Loomis officiating.

ENGAGEMENTS.

FUNK—HARGREAVES—Invitations have been issued for the marriage of Miss Myrtle Funk to George W. Hargreaves. The wedding will take place October 7 at the home of the bride's parents, Mr. and Mrs. Cornelius R. Funk, at Reedley.

FIREBAUGH—TREMBLEY—On Thursday, October 9, at 7 a. m., a double wedding will take place at St. Anthony's church in Reedley, the pastor, Rev. George P. Seubert, officiating. The contracting parties will be Miss Corneille Marie Firebaugh and Francis Earl Trembley, and Francis Alice Firebaugh and John Edward Trembley. The brides-to-be are sisters, daughters of Mr. and Mrs. John P. Firebaugh, and the prospective grooms are brothers, sons of Mr. and Mrs. John M. Trembley.

The wedding breakfast will take place at the Firebaugh home, after which the young people will leave on a honeymoon trip. They will make their future home in Reedley.

PACKING OF GRAPES CLOSES AT ATWATER

Ship 40 Cars of Malagas and 55 of Wine Grapes; Can 40,000 Peaches

MERCED, Sept. 27.—The grape season closed at Atwater today and the wine grape season will close the latter part of next week. Forty cars of Malagas were shipped this season and the number of cars of wine grapes will reach 55. It is thought. The wine grapes were shipped to San Francisco and Minnesota.

The small cannery at Atwater closed on peaches today and will start on sweet potatoes tomorrow. About 40,000 cases of peaches were canned and the management considers this a splendid run.

FALLS FROM WAGON; IS BADLY INJURED

HANFORD, Sept. 27.—Antonio Garcia is at the Hanford sanitarium suffering with severe bruises and possible internal injuries that may prove serious as the result of his having fallen from a hay wagon at the Burris ranch, fourteen miles northwest of Hanford, where he is employed, early last evening. He drove through a ditch, and when the wagon struck the bottom, was shaken off. A wheel passed over his chest.

AGENT AT MERCED GOES TO HANFORD

MERCED, Sept. 27.—T. M. Pickens, for the past six years Santa Fe station agent here, has been promoted to the position of station agent at Hanford and will take up his new duties October 1. He succeeds Agent Dold, who was promoted to the position of traveling freight agent. Mr. Pickens and

DEATH FOLLOWS AUTO ACCIDENT AT TIPTON

Frank Keller, Stockman of Hanford, Dies At Sanitarium In Tulare

TULARE, Sept. 27.—Frank Keller, the Hanford stock dealer whose skull was fractured last evening in an auto accident at a point one mile east of Tipton, in a collision between his auto and an oil truck, died at the San Joaquin hospital in this city this evening at about 5 o'clock. An inquest will be held Tuesday to determine the responsibility for the accident. Keller's body will be taken to his home at Hanford this evening for burial, which will take place Monday. He is 33 years of age and unmarried.

The accident, which resulted in Keller's death occurred last night at 10 o'clock. Keller was accompanied by John Burrell who is also a stockman from Hanford, and who was only slightly bruised during the collision. John Burrell, who was driving the Acme Oil company truck which collided with Keller's automobile, was not injured. Both machines were without lights.

It seems that Keller and Burrell had been in Bakersfield yesterday, where Keller had purchased an automobile. The two men had started home, Burrell driving, as Keller had had no experience. They had a carbide light equipment on the machine but it was out of order. The truck was going south, also unlighted. Both machines were going at a low rate of speed and driving in the middle of the road on account of the darkness which had just settled upon them.

Keller and Burrell saw the truck loom up in front of them just before the crash, but neither had time to jump or get out of the road. Keller was thrown forward and struck the radiator of the truck. Burrell was thrown out of the machine and struck on the ground slightly injuring his knee cap which may cripple him for life.

The other two men removed Keller, whose skull had been crushed by impact with the radiator, bleeding and unconscious, to the Jones farm, which was near by. Dr. W. C. Chilson of this city was called and rushed to the farm in his automobile. Hurriedly dressing the wound the doctor brought the victim to this city. Dr. Ross was called from Hanford and the physicians operated.

Keller's father and his brother-in-law, G. H. Ross, were called from Hanford and arrived about midnight. The father was at the bedside of his son today. Ross returned to Hanford this morning.

WILL RAISE \$20,000 FOR BIG CITRUS FAIR

Visalia Is Given Numerous Pledges of Support; To Be Annual Event

VISALIA, Sept. 27.—With scores of pledges of support, the executive committee of the big citrus fair will Monday start a campaign to secure a guarantee fund of \$20,000. The committee, which is composed of Ben M. Maddox, J. Sub Johnson, George Fleming and Secretary James T. Boyer, of the Visalia Board of Trade, were taken yesterday by Charles A. Whitmore, president of the board, on an automobile tour through a large portion of the county, visiting Dinuba, Lemon Cove, Wood Lake, Naranja, Yellum and Orosi.

The boosters reached Dinuba shortly after noon, after having received pledges of support all along the line. They were royally received at every stop.

Plans for the big fair have been completely outlined, and a site will be selected early next week. Work on the mammoth structure which will house the principal exhibits will begin immediately.

If the present plans are carried out in their entirety the building will be made a permanent structure, and the fair will be an annual event.

Enthusiasm in the proposed fair is running high, and it is understood that there will be many pledges of \$500 and \$1000 forthcoming when the campaign starts.

In connection with the fair there will be a program of sports and amusements, outdoing anything of a similar nature ever attempted in this section of the valley.

ATTORNEYS ARGUE RAISING OF BAIL

Iden, Tulare Realty Man, Is Still In Jail; Hearing Is Adjourned Over Till Monday

VISALIA, Sept. 27.—Arguments were begun before Judge J. A. Allen of the Superior Court today on the matter of increasing the bail of A. W. Iden, who has been held to answer to four felony charges connected with the manipulating of mortgaged property. At noon a continuance was declared until Monday morning. Iden is still in the county jail. His bail, as it stands, is \$5,000.

MOTHERS ARRANGE FOR KINDERGARTEN

PORTERVILLE, Sept. 27.—At a meeting of the Mothers' Club of the Congregational church held last evening definite arrangements were made for the establishment of a kindergarten, which is to be held in the church parlors each morning. Miss Winifred Schaeffer, formerly of Oakland, has been secured to assume charge of the classes. Twenty children have been enrolled and about ten more are expected to join the class work in the near future.

CHURCH ASKS FOR RETURN OF PASTOR

PORTERVILLE, Sept. 27.—At a meeting of the official board of the First Methodist Episcopal church, which was held last evening, resolutions were adopted warmly endorsing the work of Rev. Bodo A. Johnson,

The Finest Section for Dairying In the Valley

2 Tons of Alfalfa at Each Cutting

Think of being able to harvest 2 tons of alfalfa to the acre at every cutting! That is what you can depend on doing in Patterson Irrigated Farms, the fertile, friable, rich silt lands of the river bottom along the San Joaquin River. They are exceedingly productive. These lands have just been opened to the public and are now selling rapidly. Now is the time to make your choice. Now is the time to get the very best of them. There is all of the proof that you want of their fertility.

Dairying is wonderfully profitable in this section and the many who are entering into this industry have done so after a complete investigation of its prospects. They have all of the proof needed, for Patterson Lands show what they will do.

There is the Most Satisfactory Irrigation System in the State-- More Water Than You Can Use at All Times

Close to the Big Markets, Cheap Transportation; Melons, Vegetables and Fruits Produce Remarkably

Here is another advantage. Patterson Irrigated Farms are close to the highest prices. The melons, too, the big markets. Sacramento, Stockton, San Francisco and the Bay cities are all close at hand and there is water transportation. This is cheap transportation gives farmers in this district a wonderful advantage. All kinds of vegetables can be produced on this fertile land. The quality is the very highest, bringing the highest prices. The melons, too, are of exceptional quality. Peaches, pears, berries, apricots, plums, etc., are produced heavily and are the source of big profits. The rich silt soil, deposited by the overflow of the river for countless years, has built up the deep

less years, has built up the deep

11 Years to Pay

And here is the best of it all. You can buy this land on long time payments. The land is capable of paying for itself in 3 years, but you are allowed 11 years in which to pay for it.

It will pay for itself in a short time and will continue to pay for itself over time after time. The easy terms place it within the reach of all who want to become independent.

But you do not have to take our word for this. We want to give you proof, any kind of proof that you demand. We can give you the most convincing and satisfactory proof. Those who first bought in this district are now prosperous and independent or well on the road toward independence.

REDMEN IN SANGER HOLD INSTALLATION

Banquet Is Given, and Four Initiated Into Tribe; Farewell Reception Is Given Pastor; News Notes

SANGER, Sept. 27.—Last night the Waikato Tribe, I. O. R. M., of Sanger, and Potomac Tribe of Parlier, held a joint initiation and banquet at the Redmen's Hall here. Four candidates were initiated, the Potomac degree team putting on the work. An excellent banquet followed and about sixty members feasted. All present pronounced it an enjoyable affair.

Yesterday H. C. Basey and E. D. Norwood were thrown off motorcycles while on their way back from Big Creek. The accident occurred near Parlier and was caused by a bad bridge crossing. Both the men were badly bruised and Mr. Basey is laid up with a sprained foot.

The members of the M. E. church, together with their friends, enjoyed an entertainment and social at the Y. M. C. A. building last night. The affair was given as a farewell to Rev. Daniel Dundas and wife, he having resigned as pastor of the church recently, and will soon leave for another field.

An auto delivery wagon belonging to the Visalia steam laundry and driven by a man named Sossang collided with a motorcar driven by Virgil Sargent on Seventh street, in the business section here this afternoon. A buggy occupied the center of the road. The auto passed from the rear of the buggy to the left. The motorcar attempted to pass the buggy to the right, and in so doing struck the right fender of the auto. Neither man was traveling fast, but the auto fender was badly bent and the front end of the motorcycle was badly sprung. Horace Sherman, who was riding the back seat of the motorcycle, received a rather serious cut on one leg.

CARNIVAL IS CLOSED IN TULARE

Large Crowd Takes Part In Final Festivities; Was Financial Success

TULARE, Sept. 27.—The first Tulare Prosperity Carnival closed to night with a Mardi Gras, during which confetti throwing was the principal sport. As the night was Saturday night there was a large attendance of country people and the crowd was much larger than at any time during the first four days. "Choker" collars and high necked dresses were much in evidence and served as the only protection from the showers of confetti.

The dances in the pavilion was the center of attraction, Tulare society being present in force. The joy wheel in Glendale Alley loomed suddenly into prominence last night as a diversion for the members of Tulare's social sets. Joy wheel parties were planned for tonight and the wheel almost monopolized.

The carnival has proved a success, netting a neat sum for the local management and being an excellent means of amusement.

PLANS TO INSTALL ICE-MAKING PLANT

PORTERVILLE, Sept. 27.—J. E. Frame, for the past nineteen years the ice dealer of Porterville, has announced that within the week he will leave for San Francisco where he will place orders for a complete equipment for an ice-making plant with a daily capacity of fifteen tons.

Plans for the building have been approved and it will be located either at Olive and D or at Walnut and D, facing the S. P. railroad reservation. As a part of the plans a storage warehouse with a capacity of 100 tons will be erected. Ice will be furnished from Porterville to sub-agencies in Terra Bella, Ducor, Highgrove, Strathmore, Lindsay and Springville.

BAPTIST MEETING CLOSES IN VISALIA

VISALIA, Sept. 27.—The annual Baptist conference of the San Joaquin valley was brought to a close this afternoon, following a program which lasted the entire day. The speakers today were: Porter Brown, of Fowler, Mrs. S. A. Eaggs, Lindsay; Miss Whitting, Clovis; Rev. Mr. Brown, Clovis; E. L. Jolley, Del Rey; Miss Filling, Fresno; Mrs. Bowers, Madera; Mrs. J. L. Mitchell, Selma, and Rev. H. O. Meyers, Fresno. The Pious Memorial society of Fresno was present and took part in the program.

who has been in charge of the parish for the past year. The officials extended him a unanimous call to return here. It was stated following the meeting that the report of the church officials showed that finances are in excellent shape.

Moving a Logging Camp

By JOHN RODD, B. G.

Moving Day, Camp 11, Fresno Flume and Lumber Co.

This is the thirty-third summer I have lived the simple life up in these great woods, yet I am as far from being a simpleton then when I first arrived.

During that time I have undoubtedly met and photographed the largest majority of men, women and children in Fresno and Tulare counties. Very few rocks, cliffs, falls, canyons and trees have escaped my camera either. The Republican has published many a pictorial and wordy sketch of mine, which even my enemies pronounced interesting, but today I offer a real novelty, a train load of cabins.

Every two or three years the big mill at Shawyer puts out fully thirty-five million feet of lumber, and, believe me, that takes a great many trees and five to six hundred men to prepare for the market.

The company this season concentrated its crew in two great camps, a mile apart, and at night and Sundays the commissary at No. 2 is a very popular place.

A large number of the men are married, all of them should be, and their wives and kiddie-dears, also add largely to the population. Looking down from the heights above Camp 2, a variable town meets the vision, the center piece is the long, rakish cook house, which feeds daily between 200 and 350 men.

The cabins which house the unmarried men are of a uniform size, about 14x16 and contains four bunks. These are usually moved as a whole.

The train of flat cars are backed to the closest distance and a great "bull donkey" solidly placed on one of the logging cars, throws out a seemingly endless cable which the men fasten with hooks to the corner of the house and, regardless of its solidity of foundation of mud, and the rubbish the occupants scatter around it, when Engineer Grover Smith turns on the steam, something has to give way, and it usually isn't the cabin.

When the cabin is at a greater distance a chain is thrown around it and it is dragged by main strength and awkwardness to the car, against which the braces are placed to slide the house upon it.

Last Sunday was the first moving day and my friend Riggs, was "Johnnie on the spot" with his "machines" and between us we are able to give Republican readers something new under the sun.

Fresno's First Circus and Other Attractions

By UNCLE BILLY.

Ringling's circus has come and gone and carried off a good many loose dollars from Fresno county. That is, it is the first circus that ever came to Fresno City. On the 19th day of October, 1874, Montgomery Queen's circus arrived. They stretched their tent on what is now the city park, between 11 street and the S. P. depot. It was a one-ring show and you could see it all. Everybody in the county and a good many from other counties were here. I remember my friend George Bernhard, then young George, came from Mariposa county, forty miles, to see that circus. Every Indian that could walk or see a hole through a ten-foot ladder was here to see what they called the horse fandango.

From the pine ridge to the plains they all came. Not only Indians but white people also. One man who lived in the hills about thirty miles from town loaded up a cord and a half of stove wood, put his family, consisting of wife and four children on top of it and came to the circus intending to get here the evening before, sell his wood and take in the afternoon show and go part of the way home the same day. But everybody was excited about the circus and he could not sell his wood until about night he struck a court house official who told him to unload at his place, gave him the money and the family got something to eat, went to the night show, then went to the edge of town and camped, and next morning the old man laid out the balance of the money for grub and they went home.

Mentioning George Bernhard Jr., reminds me that along in the early days of Fresno he opened a butcher shop on I street, just north of Bert Sheldon's very stable, which was on the corner of Tulare and I, just where the clock and suit store is now. At that time Jim McCord Sr., or old "Jim" as we called him now, had started a restaurant just about where the Fresno Abstract office is now, on K street. Jim had become dissatisfied with the butchers that he had been trading with and called on George to supply him. He was told that Bernhard could supply him all right, but could not deliver because he was too far out of town. In the very early days of Fresno, Bill Lawrenson was deputy tax collector. He also had a saloon on I street, between Mariposa and Tulare streets. Judge Hill was justice of the peace and had an office adjoining the saloon. The Chinese on the west side in those days ran a game of fan tan on the side walk in front of their place of business, and they were pretty hard to collect poll and road tax from. Bill had in his saloon a band of music and a hint for dancing and the boys used to get in there and have what they called a good time. One night Bill got all of the young fellows and he could together, gave them guns, clubs and rocks and marched over and captured the fan tan game and all of the Chinamen, haled them over to the saloon and made them all pay their taxes.

Believing that it will interest people who are living in Fresno City now to know what the town was in 1874, with the help of some younger and better memories than mine, I will try to give the dimensions of the town at that time, both business and residence. At that time the business part of town extended from Kern street on the South, to Market street on the North and was mostly on I or Front street, with a few places on J and K streets. Beginning on Kern the business and residences alternated. The Davis Bros., now of Kingsburg, with a store; then came Shannon's Hall, Booker's candy store upstairs, next, north, was the public school with R. H. Bramlett, teacher. Everybody knows Bramlett, who was school superintendent and auditor of this county for many years, and is now a rancher in the Mendocino country. This brings us to Tulare street on H. There on the corner where the Fresno water company's offices are, was the first hotel built in Fresno. It was called the Schmitz Hotel. It was afterwards bought and run by a man from Visalia by the name of

Brinson. Brinson was the landlord, something like the Arkansas man was a guest rode up and hailed, "Who is back of this tavern?" The old man took his pipe from his mouth and said he: "I am, my wife is gone to town." Next place north was Mansson's horse restaurant and saloon.

In one of my previous articles I described that place, but a short description here may not be out of place. The old man dug a well, put a windlass on it and made a trough, put up a sign that looked and read like this, "Horseshoe Restaurant—One horse, water, one bet; two horses, 2 bet." He also had entertainment for man as well as beast. He dug a hole in the ground twenty-eight feet deep and down there was his saloon. The old man had an elevator on which he let down his beer and also let down his customers. That elevator was also run by a windlass.

Next north on H street was Faure's barber shop. Ed Faure is still here and is running a shop on Mariposa street. Everybody knows "Frenchy." North of that was Brubacher's hotel, afterwards known as the French hotel, and was run by the Le Carquier Brothers. Next north was the Magnolia hall, owned by Len Farrier, who came from Centerville. The lower floor was a saloon and dance hall. In that hall was the second best attraction ever brought to Fresno in those days. It was Barlow, Nelson, West and Primrose Minstrel.

Next north and on the corner was the Pioneer store of Silverman & Einstein and that is one of the two pioneer stores that I mentioned in my last week's letter. Now, jumping Mariposa street, came Fleming's livery stable. "Old Russ" is still here and I am wrong he will correct me. Adjoining him on Mariposa street was A. S. Goldstein's tin shop. Mr. Goldstein will be remembered by all old settlers as the father of Alex. (By the way, if anybody doubts the correctness of these stories, I hereby refer him to Alex Goldstein and George Bernhard as my witnesses. I think I can prove the whole thing by them.)

Next came Katsner & Goldstein, and they are the other one of the pioneer stores of which I made mention last week, and here I want to say that people who treated them right never had any cause for complaint against them. This brings us to the west side of I street, and as this letter is already long enough, we will finish next week. We are now getting pretty well out of town, anyway.

I want to tell a little story, anyhow, about that first circus. The main attraction of that show was the great barrelback riders, Charley Fish and Mollie Brown, especially Mollie, who in addition to being a fearless rider, was a handsome woman. Mollie sold her picture between acts, and the boys all brought them and I am reliably informed that one of them (a big boy now) still has her picture, but I don't blame him—it cost him a dollar.

W. J. HUTCHESON.

HOW IMPORTANT ARE PEGGOD FEATS?

Ability to Fly Upside Down
Not Likely to Help
Falling Aviator

PARIS, Sept. 27.—The remarkable feat accomplished by M. Pegoud in flying in "vol plane" for several hundred yards with his head downwards and his machine completely upside down continues to be much discussed in aeroplanists' circles. Aviators are unanimous in paying an enthusiastic tribute to the extraordinary pluck and skill of the young pilot, but doubts continue to be expressed as to the utility of these aerial acrobatics. M. Pegoud announces that it was his object to show that if an aeroplane capsize, it would not fall, it is still possible for the pilot, if he keeps his head to the right himself and to reach the ground safely. This object he appears to have attained, and it is announced that other experiments are to prove that a similar feat is possible if the aeroplane capsize laterally or "side slip" or, in fact, lose its equilibrium in any position whatsoever.

Practical aviators remark that what M. Pegoud has so skillfully and so courageously demonstrated had already been accidentally demonstrated several times, two or three aviators, both on biplanes and on monoplanes, have involuntarily turned a complete somersault in the air with their machines. There is a certain tendency to regard these sensational experiments as the reply of the French constructors to the Dunne biplane, which is described by Major Felix as having recently solved the problems of automatic stability. By many aviators the argument that, since it is possible to right a machine when it has capsize, automatic stability is unnecessary, is regarded as fallacious. They consider that the ideal machine should be incapable of capsizing in any circumstances whatsoever, and they point out that there are very few aviators living who could accomplish M. Pegoud's feat.

The personal element must always make loss of equilibrium in the air a perilous thing. But there is an even more serious objection to the idea that the problem of safety in the air can be solved by a machine capable of capsizing and being righted if its pilot is skillful enough. It is only when the aeroplane capsize at a very considerable altitude that it is possible for M. Pegoud had over 2,000 feet in which for the pilot to accomplish this feat, to capsize and then to right his monoplane. Had his machine capsize near the ground, despite all his skill the tale would have been a very different one; and it is near the ground, where the air currents are most disturbed and broken by the configuration of the country, that accidents continually occur.

M. Fleriat says: "When it is proved that a good aviation craft is able to turn or capsize in the air, fly on its back, and recover itself instantly at the will of the pilot, a considerable step will, in my opinion, have been made towards assuring security."

Watch and Wait For Important Announcement---

News of the greatest importance to investors will be announced soon regarding the development of the new town of Biola.

BIOLA

The New Town With a Big Future

- Contemplated work about to start:
- Tracks to be laid in two weeks:
- Water works to be started at once!

A Fresno County Opportunity Surpassing Any Other Investment In The State

HERE is something that should be of interest to you. Maybe you haven't given it much attention. Maybe you haven't thought about the possibilities of Biola.

Now listen!

Biola is a new townsite on a new railroad. The building of the railroad is absolutely assured. Most of the grading is already finished.

The actual building of the road itself, the laying of the rails, erection of stations, etc., will begin in two weeks.

In the city of Biola the building of the waterworks is to commence immediately.

The new road will open an immensely rich territory.

It means the rapid growth of this new town. It means prosperity for its citizens.

AND THIS IS PARTICULARLY TRUE OF THOSE WHO BUY EARLY!

Are you going to be one of these?

Now don't wait. Don't hesitate. Find out ALL about it right now. Get in among the first while the opportunities are at their best.

Are you going to seize opportunity when it is presented to you right at home?

SACRIFICES SELF TO SAVE CHILDREN

NEW ORK, Sept. 27.—Edward Scully, a superintendent in the street cleaning department, sacrificed his life today to save a crowd of school children from a runaway horse. The horse, attached to a truck, was headed toward a corner in Brooklyn occupied by two public schools. On the sidewalk were some 300 children. Scully dashed out of his office, seized the animal's bridle and turned it into the curb. Although he had checked the runaway, he was carried under the horse's hoofs and instantly killed.

Good Time Now For Blood Health

Energies Are More Keen and Respond Quickly to Help.

Let S. S. S. Help You to Health.

If you are down with rheumatism, if you sneeze, feel chilled, are choked with catarrh, have a cough, or your skin is pimpled and irritated with rash, eczema, or any other blood disorder just remember that all the life of the body comes from impure blood. And you can easily give your blood a good, thorough cleansing, a bath by using S. S. S. There is no need for anyone to be despondent over the illness of blood impurities. No matter how badly they attack the system, or how unsightly becomes the skin, just remember there is one ingredient in S. S. S. that so stimulates the cellular tissues throughout the body that each part selects its own essential nutriment from the blood. This means that all deep, all breaking down of the tissues, is checked and repair work begins. S. S. S. has such a specific influence on all local cells as to preserve their mutual welfare and afford a proper relative assistance to each other. More attention is being given to scientific medicine than ever before and S. S. S. is the highest achievement in this line. For many years people relied upon Mercury, Iodine of Potash, Arsenic, "Physica," Cathartics and "Dope" as remedies for blood sickness, but now the pure vegetable S. S. S. is their safeguard. You can get S. S. S. in any drug store, but insist upon having it. And you should take no chance by permitting anyone to recommend a substitute. And if your blood condition is such that you would like to consult a Specialist freely, address Medical Dept., The Swift Specific Co., 215 Swift Bldg., Atlanta, Ga. —Advertisement.

Electric Household Conveniences

Have you given any thought to the use of Electricity for the performance of household labors? Do you know that scientists and engineers have been working on this problem for many years and they have designed a great variety of wonderful labor and money saving appliances? Electric stoves, electric washing machines, electric heaters, electric boilers, electric toasters, electric broilers—in fact there is an electrical appliance for every household requirement. Drop into any electrical supply store. They will be glad to exhibit and demonstrate.

FIX YOUR WALLS With Beaver Board

On New Walls or Old

That's one of the 41 great advantages of BEAVER BOARD. It can either be nailed direct to walls and ceiling beams, or put over old, cracked plaster walls. Wallpaper is not used in either case, as you get more beautiful, durable and sanitary results by painting.

BEAVER BOARD is easily and quickly put up, is very strong, makes a house warmer in winter, cooler in summer. We can't begin to tell you all its merits here; but write us or call, and get full particulars.

citrus fruits, the Mr. Moore lands have been producing, and he has three sites for well on the sides of the hills and has the drill machines at work now crushing through the granite base. These wells are designed to flow water for 400 acres, 100 of which will be planted to olives, 100 to citrus fruits and 200 to alfalfa. Mr. Moore is very enthusiastic over his enterprise, and his success will mean a very rapid development of that part of the county. There is considerable oil and bituminous shale in the vicinity of the Wide Awake ranch of similar merit. It is all fine, level land which needs only water to cause it to be very resourceful to the county.

me. The immigration laws also forbid the landing of lepers, so that there is ample authority for the exclusion from this country of those afflicted with the disease, although on account of its long period of development the possibility of the entry of occasional cases must be recognized. The immigration laws provide that any alien afflicted with leprosy may be deported any time within three years after arrival. The federal government is authorized, by deporting, to relieve the state of the burden of the disease.

Announcement Extraordinary

W. E. BUSH & Co., of Fresno, Have Closed a Sales Contract for Fresno, Tulare and Kings Counties, for the Sale of the Great KUHN CALIFORNIA PROJECT, Comprising Upwards of 200,000 Acres, or Over 400 Square Miles of the Very Cream of Sacramento Valley Lands

The price of these lands, including perpetual ownership in the water system, ranges from \$135 to \$200 per acre, and the very liberal terms upon which they are sold are such that any thrifty farmer can make the crops pay for the land in one half the time of payment.

BENARES

By MARGUERITE THOMPSON

Benares is the holiest place in the world, every inch of it is holy, every drop of water in the Ganges is gold. There are three million temples here from the tiny abode of a little brass figure two inches tall to the magnificent golden temple in the heart of the city. There are endless streams of pilgrims and hundreds of fakirs, casually old priests who fleece the pilgrims for a pake. I doubt if any religion reaches the heights that Hindu philosophy does, or if any religion is so thoroughly corrupt or sinks to such horrible depths. And Benares being the holy of holies, it is naturally the most corrupt. For wherever human nature is left to its credulity and greed, there is the greatest opportunity for those who would fatten on it. The heathens do not see, they are in men's souls; but the deities are everywhere about us. America has the terrible reputation of indulging in and perpetrating the most gross institutions than any other country in the world, but beside Benares it is a mere infant in graft.

But, oh, it is such a strange, mad life, this holy chaos! There is nothing like it anywhere! It is wonderful! In one mass of holiness, of Gaucha water and marginals, people rush about in an ecstasy of religion crowded with gold marginals and scattering everywhere all the filth underfoot, with the mud (scrambled in the mud) deep mud. But to walk through the mud in the morning and see temple upon temple piled upon each other up the steep bank high into the sky and the broad steps descending into the river, covered with the bright colors of pilgrims, and the monasteries of priests, oh, nothing like it anywhere in the world. It is surely so beautiful, it is tremendous, and so deeply impressive and stranger than anything you have ever known. I cannot describe the feeling it gives one. But there are few things can move one so deeply as the Brahmins and the pilgrims bathing, the priests, in their prayers and meditations, the edge of the water, or on little bamboo platforms over the water; the beauty of the slim brown bodies going through religious gymnastics, the impressive multitude of priests, waist deep in the water, bearing the sacred drops through their hands and offering prayers to the sun.

One noon very early in the morning to see the Ganges in all its splendor, long before 12 o'clock it is so deserted and one would never realize the crowds and the animation that was there in the morning. We came down very early, but already the Ganges was full. The great steps that extend all along the river and far up the banks were a wonderful garden of vibrating color. Here and there a group of people gathered about a snake charmer or a fakir, and again an enormous sacred bull, too fat to walk, nosed its way ponderously through the crowd. At last I saw a real snake charmer. He had two beautiful big cobras—yes, a black one and an immense double headed snake—and innumerable scorpions, centipedes and other attractive creatures. He was holding a long harangue when I saw him while his pets made themselves at home on the stones; angry big scorpions rushed about in all directions with their tails up, and the cobra writhed and danced. The charmer without even looking at the creatures would reach out his hand and gather up a too venturesome centipede or scorpion and squelch the sensations of the cobra with a single confident stroke. Mrs. Watson, the lady we were with, said that when she had had a most extraordinary Swedish artist, staying with her, and on her first visit to this she was fascinated at the sight of these snakes. "Oh, what beautiful cobras," she cried, and she picked up two black monsters lot them wad and then by the horns and neck. The Indians were panicking and fled and the snake charmer was furious and snatched his pets away. Mrs. Watson said she had creeps in her spinal column even to think of it, but the girl laughed and said, "Why, I love them." The other snakes exhibited publicly usually have their heads removed, but still—oh how really they are very curious and intensely interested in those strange religious fanatics.

the Pacific, but Mrs. Watson was a former missionary and had no interest in the strange ways of the heathen beyond the certain fascinated horror over the way they killed them and I could learn but little that I wished most to know. All over the steps are mats under great umbrellas where priests sell forgiveness as well as the usual market favors and charms. The water of the Ganges flows along with the right to the Ganges. The ownership of an umbrella is enough to guarantee great wealth to the possessor. It is a license to extract money and graft to whatever extent he will. Some umbrellas are ornate, others rented at enormous prices. The priests of the Ganges are a highly organized trust and their monopoly is absolute. Everything purchased there is inconceivably holier than anywhere else and prices are extortionate. No one can so much as bathe in the river or carry away a sacred drop of it without being killed by the Ganges in the hope and ambition of every Hindu, to drink and bathe in its water is to be purified of all sin and disease. It is after all but a form of ancient idea of baptism and purification, the spiritual cleanliness brought by bodily cleanliness. The seemingly strange superstitions there is a real reason in the seeming unreasonable though it be glossed over with religion till the truth is forgotten; the water of the Ganges is not ordinary water, analysis shows the water and experimenters with it regards bacteria have proved that the germs of the plague, typhoid and cholera not only do not multiply in it but usually die in a very short time. No wonder that in India which suffers such terrible epidemics the water of the Ganges became more holy than any other water until every drop of it became a god.

The boats we go a-riding on the holy river in are a cross between a wash tub and a Chinese junk with a raised flat lid on which we sight-seers make ourselves comfortable in cozy wicker chairs—that is after we discover that for some strange reason we must all slip over, that we don't want to, and that the boatsmen can actually control the strange craft. From the land side, Benares is the least interesting of all Indian cities in color, architecture, streets and situation. From the water it is marvellous beyond all others. The ghats, the endless steps are called, are the most interesting feature, the streams of pilgrims in emerald green, the reds and shades of yellow and the most gorgeous brilliant plinks moving among the white umbrellas, up and down the steps and disappearing into the darkness of its streets far above, the ever moving masses at the water's edge and the people crowded into the narrow streets, all make a picture of no matter how dirty the water may be. The bathers were fascinating to watch, old gray haired women and young girls, men of all castes and conditions of life. I was much interested in the clever way in which a father before leaving the water could throw his garment and into a basket on a trolley and have it brought to amount to anything or bring him completely undressed. The religious exercises of the devotees on the bamboo platforms were like oriental dances and the strange humanness of the people, the queer places where religion is everyday, universal humaneness, the lack of caste as a respect, each man and woman seemed to constitute a little world unto himself, utterly unconscious and separated from the little worlds about him, but he could come back again to the big world about him at the most surprising moment.

ing lights and very quickly. The courses were dropped at the burn-out, and the attendant crumpled the dead, a sight nobody ever wanted to see. And yet they always go over to see the horror over. But there is nothing terrible about it, there is even a certain beauty. Men lay a foundation of wood on the narrow space at the edge reserved for cremation, and hearse bring down the body on a stretcher. The dead are wrapped in soft, clean garments and are placed in a coffin with flowers and cheese cloth and wear marigolds and few sacred emblems: after being placed in the Ganges they are laid on a wooden pyre and wood is piled on top and burnt until they are almost pure.

fit high about on the steps below the temple and the one nearest to the dead, his head shaved and dressed in white draperies of new linen, comes down and carrying the torch three times around the pyre chants a prayer of eight nights' wood. All that is dreaded is the fact that the presence of the attendants, the fact that they go right ahead with other pyres, clean up, throw the remains into the Ganges regardless of the ceremony going on, not more than one or two feet away. But that is the chief thing to be feared. I said before, each person moves in a little world of his own seemingly unconscious of what his neighbor who touches his elbow is doing. The only dreadful part about this burning Chit is that the people carried on by the priests, who compel the people to purchase the wood, fire, cloth and all from them and pay exorbitant prices. But after all, I do not know that that is any different from our own country, where we have the same thing at our funerals, when we make our own libations, and we have the same profits out of funerals and deaths. We go to foreign countries and we exclaim with horror over certain things but we forget to exclaim in horror over the things that we do in our own country because it comes to our funeral. Or else we turn our eyes away and do not see it at all.

And above the steps rise temple upon temple and towering high above them all the two long minarets of a Mohammedan mosque, here in the holy city of Calcutta. But in the midst of all this course there is a tinge of spirit work in it and the mosque certainly is an eye sore in the eyes of all Hindus and Christians. Among the temples are many smaller shrines, like great medieval castles clinging to the sides of the mountains of their decorated, columned windows far, far above, right close to the eaves. For there is one class of priests who are not required to marry. It is the Brahma religion that every man and woman who wishes to marry, the woman can marry only once—the man is supposed to die on her husband's funeral pyre—but the man may marry more times because it is necessary to have a son to carry on the name and family. The Brahma religion usually the only reason for which a Hindu marries a second wife, but if he wishes to he can adopt a son instead. When a family is too poor to feed a husband for a daughter and cannot afford to marry her, the girl is married to a tree or a temple or even to the sugar cane or a flower. Also it is a custom when in fear of some dreadful calamity to promise one's first-born child to be the bride or husband of the tree and one year later, when the child is sacrificed, are practically turned drift in the world, as sort of public property. A girl who combines a certain shrewdness or boldness with a good deal of good nature and common sense knowledge and enjoys the companionship of many intelligent men, finds impossible to the Indian women who are married to men. But such cases are exceptions. Usually they are rather stupid and dull masteries. They say the great monasteries for women are full of these women and their lives. How that may be, I do not know, but the most dreadful sight in Calcutta, worse than any other sight in the world, is to see the same women, the dreadful creatures, who howl about the steps at Bonares, drunk, diseased; their minds, every mark of reason or human feeling gone, and their golden hair cut off. When in the past there are a great many of these are so horrible one cannot look at them, and such that even a hawk will haunt one for years. And these are the girls that are married to trees, and when they are little children, and every one of these has to get back to a nice respectable country like America, where if similar things exist we can pretend they never existed, or at least never look into them and see what is at home, you know, and it isn't done. It's different when it's the sightseeing.

SCOTTISH OIL FIELD KNOWN FOR CENTURIES

Again Brought to Attention
of British Public By
the Crown

LONDON, Sept. 27.—The British public through the medium of Winston Churchill have rediscovered

ed the Scottish oil field. Until the right honorable gentleman's recent speech few were aware such a valuable national asset existed on the north side of the border. Yet the production of a first-class quality of oil from the paraffin shale has been in operation so upwards of half a century, and it has proved a profitable Scottish industry. And ample raw material exists for great development of the oil trade in the future.

Three times has the discovery of the oil-bearing strata been made. The first was made some 900 years ago, that is, by the late Mr. Young, of Aberdeen, sixty years ago, and now Mr. Churchill makes the fact known to the uninitiated British public. How the cozy fluid was first brought to light is contained in an interesting legend. There exists some three miles south of Edinburgh, upon the estate of St. Catherine's "holy well," which is nothing more than a fount of natural petroleum on a small scale, and this "holy well" has been known for the last nine centuries.

How this well originally came into existence is narrated in the Latin writing of Hector Boece. According to this ancient priestly historian, St. Catherine was responsible for the formation of the oil well and a pretty little tale he tells, although it is completely discredited by modern knowledge of geology.

St. Catherine was a maid-in-waiting in the suite of Queen Margaret, an English princess, who was consort of Malcolm-Gannore, King of the Scots. The saint suffered from some ailment, so she despatched the "Saint to Mount Sinai," in order to procure a supply of "holy oil," the only known nostrum for the royal disease. The Saint was on her homeward journey, with the oil in her possession, and on crossing the land now known as Palestine, the Catherine, Catherine, learned the unfortunate news that the oil, and it was quickly absorbed by the porous soil. The Saint, says tradition, was not prone to sit down and cry over the spilt oil. She went on her knees and prayed earnestly for relief. Her prayer was answered by a supernatural water arising from the earth, and upon its waters floated the whole of the oil, which Catherine gratefully collected. To celebrate the miracle, she ordained that the "holy water" should be used to feed the sick and the suffering humanity, and 900 years after the "miracle" oil can still be gathered from the water.

For centuries pilgrims from all parts of Britain visited the well at St. Catherine's to gather the "holy oil" to cure skin complaints, and today such pilgrimages are occasionally made. The oil accomplishes cures similar to that obtained from the use of vasellina, and is in reality a crude petroleum. This "holy well" exists on the eastern fringe of a huge shale-field extending on both sides of the Bentland Mills and passing beneath the Firth of North into Fife-shire. Some small parts of this shale have been worked for at least half a century, and the existing works at present are located at Broxburn, West Calder, and Dalmeny; the latter being upon the estate of Lord Home.

Automobiles And Trucks

Ford And McFarlan Six Automobiles

Federal And Little Giant Trucks

Your good business instinct will lead you straight to our Exhibit at the County Fair, and we will show you why no other car can be compared to the

..FORD..

In our McFarlan Six, never before in any Six have there been given such a combination of beauty, comfort and economy.

And in our Federal Truck you have the assurance that we have the best truck on the market, and we invite comparison and performance.

Our Little Giant, one ton truck, is silent, powerful and easy to handle--the best small truck on the market today. We have sold 469 cars this year, proof that we have the best cars.

See Our Exhibit At the
Fresno District Fair

Automobile Section

WE are going to have an exhibit at the Fresno District Fair that will interest you. We will show the beautiful 1914 models of the different cars we handle. You will have an opportunity to see the car that you are interested in with all of the new features. Don't fail to see our exhibit. We will have a number of cars on display.

IT'S HERE!

The 1914 Dorris Has Come
The Car That Creates Enthusiasm

Wherever the 1914 Dorris goes it sets people to talking. It has the beauty, the noiselessness, the strength, the contour. It is the perfect car, better this year than ever before. You cannot find anything in the whole range of automobiles that can compare with the Dorris in satisfactory service and the qualities that you want.

See It At the Fair

It is going to be at the Fair for you to look at. It is going to be there for you to inspect. You will be free to ask all of the questions about it that you want. You will be at liberty to see everything about it, to compare it with others. You'll be lost in admiration for this perfect product of 1914, the grand leader of them all.

ANGELENOS TO FIGHT OIL WELL INVASION

Board of Public Works Opposes Drilling in Northeast Part of City

LOS ANGELES, Sept. 27.—Attempts made by oil companies to drill wells on private property in the northeast part of the city residence section will be opposed by the board of public works and other officials of the city.

President Hurdley and Commissioner of Public Works learned that there was a movement on foot to establish oil wells in the northeast part of the city, which district is rapidly building up with homes, and both agreed that the board should do all in its power to protect the residence owners from an oil well invasion.

The commissioners declared they would endeavor to get other city departments to co-operate in order that oil companies might be prevented from securing a foothold in the district in question, and thought the oil companies or those contemplating drilling wells should know at the outset the city's attitude.

The new company or companies propose to operate in the district which extends from the Westlake district to East Hollywood.

OIL BREVITIES OF FIELD AT MARICOPA

MARICOPA, Sept. 27.—Contractor A. P. Murphy, of the C. R. Cline Co., finished moving the new 100-foot derrick from the property of the Pentland Union Oil Co., on section 1, 11-23, to a new location on the property of the Lakeview No. 2 Oil Co., on the same section.

Superintendent Lee Scott, of the Lakeview No. 2 Oil Co., will start a crew of men rigging up the derrick at once, and the new No. 4 well will be started. A rotary outfit of the latest pattern will be used for drilling, and one of the rotary use bits will be used along with it. Scott has tried out the disc bits and is very much satisfied with their work, having made a record in drilling the No. 2 well on that section down to the sand with one. The No. 2 well is producing at the rate of between 500 and 1000 barrels of oil per day and is the best well in that section of the flat.

The Pyramid Oil Company, on section 1, will be cemented to

ETHEL D GETS NEW GUSHER IN MIDWAY

Flows By Heads for Several Hours and Sands Up; Flow Was 500 Barrels of 26 Gravity

TAFT, Sept. 27.—The Midway Sunset Field is keeping up its reputation as a gusher territory in an excellent manner. For today there were two gushers in the big field for a short time.

The new gusher was on the lease of the Ethel D. Oil Company, on section 28, 12-24. The well is the No. 23, which was being re-drilled, it having been a good producer. A gas pocket was entered yesterday which in blowing off brought with it much sand and shale after which it showed in a short time. The well flowed the greater part of the day by heads, it shooting for a period of as much as 20 minutes, after which it would sand up for about the same length of time.

In blowing off brought with it much sand and shale after which it showed in a short time. The well flowed the greater part of the day by heads, it shooting for a period of as much as 20 minutes, after which it would sand up for about the same length of time.

on 28, 32-24 preparing to set the 10-inch casing in their No. 2 well, on the No. 24 locality. The hole will be cemented to shut off the bottom water, after which it will be continued down to the producer.

which is found at a depth of 2500 feet at the present time, with a 15-inch casing. It was started with a rotary and good time was made in making the first 1000 feet of hole. No. 1 well on the same section is being re-drilled on account of trouble with the casing which necessitated the shooting of the bottom of the pipe. It was put back to 2350 feet and will be finished with a 4 1/2-inch casing.

Frank Shaver, of the Sprickels Oil Company, on section 32, 12-23, caused the 6-inch casing in well No. 6 to be dynamited off at a depth of 2280 feet. About 40 feet of the casing was shot off. The trouble was caused by the bottom of the casing being frozen and after every other means had been tried without avail dynamite was resorted to. The 6-inch casing will now be carried down in a depth of 2562 feet to the bottom water at a shell found at that depth.

The No. B which has been standing cemented for several weeks at 1933 feet was drilled in yesterday. The 12 1/2-inch casing was cemented and now the rotary will go ahead with a 10-inch if possible, if not an 8 3/4 will be used.

LARGE BOILER STOPS STANDARD'S GUSHER

Flow Is Controlled for Few Hours, But Again Spouts Over the Derrick

TAFT, Sept. 27.—For several hours yesterday, the Standard's wonder gusher, the No. 6, on section 36, 12-23, appeared from a distance to be under control, and peacefully it was for a brief while. It had been placed over the stream of gas forced off that it might be held down and kept from scattering in the air.

The placing of the boiler was an enormous task. Nearly a score of men with black and tackle and every available tool for forcing were necessary to handle the heavy mass of iron and steel. Because of the long flow of the well the ground for a half a hundred feet around the base of the rig is soft and almost impossible to work in without the men sinking in up to their knees.

In the placing of the boiler the oil flowing through the 4-inch pipe was forced to spread in all directions in a manner not far different than when one places a finger over the end of a faucet and causes the water to spread instead of flow in a stream.

This spreading of the oil played havoc with the already badly damaged clothes of the men, it being necessary for all to make complete changes almost immediately.

All breathed a sigh of relief when the flow was held down, they little realized how short-lived the result of their efforts would be.

The grinding of the sand thrown up in the oil backed by the great gas pressure from a half mile deep into another earth soon wore away the plates of the boiler, it cutting a round hole as if a knife had been used, but a few hours after the hard task of placing the boiler was accomplished the oil was again going into the air nearly as high as before.

At times the gusher appeared to stand up and flow which gave but little oil. This from a distance given it a grayish appearance, it having a semblance of being in a cloud hanging low over it. With an occasional breeze this cloud of gas is wafted aside showing the oil. At other times there is but little gas and a vast quantity of oil which is thrown to the top of the crown block, where much of it is carried away in the form of bubbles which cause much discomfort to motorists and at times to people as far away as Taft.

For a distance of nearly a quarter of a mile in all directions from the well the ground is soaked with the black mixture which makes it far from being a pleasure trip to visit the site of the spouter and get close to its flow.

The Standard continues its vigilance over the well and the property around, guards being kept to warn of all autos both day and night that there may be no fires from an open exhaust igniting the surplus oil which covers the ground.

For a distance of nearly a quarter of a mile in all directions from the well the ground is soaked with the black mixture which makes it far from being a pleasure trip to visit the site of the spouter and get close to its flow.

The Standard continues its vigilance over the well and the property around, guards being kept to warn of all autos both day and night that there may be no fires from an open exhaust igniting the surplus oil which covers the ground.

SELL PROPERTY OF OIL CANYON OIL CO.

Dos Palos Company Establishes New Precedent of Paying Back Stockholders, On Losing Venture

DOS PALOS, Sept. 27.—The Oil Canyon Oil Co. sold out its holdings and has paid the stockholders a dividend this week. The dividend amounts to about nine tenths of one cent per share. In making this kind of a settlement with the stockholders the company puts itself on record as doing something that has never been done in the history of oil stock companies of the state, that is when all hopes of striking oil has vanished, the stockholders have over received anything but a loss. It is a rare thing that when a company of this kind has gone under the directors have made it a point to have nothing left for the stockholders. The directors of the Oil Canyon Oil Co. were nearly all local men and the manner in which they handled the company's affairs speaks well for their personal integrity.

Get a Clean, Cool Velvety Skin

Stop that itching at once. Put an end to that fearful, burning rash. Drive out those unsightly pimples. Clear up that muddy complexion. Give yourself a clear, smooth complexion that will make you "good to look at."

D. D. D. prescription exfoliates the skin—opens the clogged pores, drives out the impurities that cause the trouble and leaves a perfectly healthy, pure, cooling liquid that washes away eczema and minor skin troubles like magic. Soothing, refreshing, cleansing.

All druggists have D. D. D. We sell it on a guarantee to stop the itch or give you money back. Don't suffer another single day.

Come in today for a bottle of the famous D. D. D. Prescription. Also a tube of D. D. D. Skin Soap—best for tender skins.

WHILE VISITING THE FAIR DO NOT FAIL TO SEE THE STUDEBAKER EXHIBIT

Studebaker "SIX"

Six Cylinders
Six Pottingers
Electric Starter
Electric Lights
\$1675.00

Large Cars, Medium Sized Cars and Small Cars
All of Studebaker Make
Will Be There and You May
"Look Around to Your Heart's Content—
You'll Surely Come Back"

Your Studebaker dealer is not only willing, but glad, to have you "look around", after you have seen the Studebaker "SIX".

He means what he says. He feels perfectly safe. There is nothing in the market that can win you away. It is not easy for him, or for us, to tell the simple truth about the car without seeming to indulge in braggadocio.

Because the simple truth is bound to sound disparaging to competing cars.

The Question of Price
Let's assume that you do "look around".

The first thing you discover is that the Studebaker "SIX" is in a price division all by itself.

You've got to begin several hundred dollars higher up in your hunt for a car comparable with it.

Check one for the Studebaker.

The Question of Size
You are astonished to discover that the lesser price of the Studebaker is not explained by a lesser size.

The Studebaker "SIX" is a normal six—which means a six of the most generous proportions.

A seven-passenger six, in other words, (if used to its utmost) with perfect freedom of movement front and back.

So you lose nothing here in the lower

price—and gain nothing in the higher.

Check two for the Studebaker.

The Question of Beauty
There are those who contend that the Studebaker is the handsomest Six on the market.

Never mind that—it is a distinguished-looking Six at any rate. There are none more beautiful—none more graceful.

So you won't be won away on that score.

Check three for the Studebaker.

The Question of Workmanship
Bear in mind that you are supposed to be hunting for something that will justify you in not buying a Studebaker.

And immediately you encounter an insurmountable objection to buy any other car.

The Studebaker "SIX" is a manufactured Six.

Practically every other Six with which you will compare it is an assembled Six.

We mean by this, Sixes which are no larger, no more beautiful, but which sell for considerably more. This almost ends the hunt right here, doesn't it?

Add fifty points to the other three we've checked for the Studebaker.

The Question of Fitness
Studebaker will build more Sixes than anyone else in the world this season.

Almost as many as all the other makers combined.

That accounts largely for the price. It accounts also for that accuracy, without which a Six is a dangerous experiment.

It accounts for mechanical niceties and full jeweled workmanship which amaze you at the Studebaker figure.

Buy It Because It's a Studebaker

"SIX"

We say to you what your dealer will say to you—"Look around to your heart's content, you're bound to come back".

You'll buy this Six because it's a Studebaker "SIX".

You'll buy it because its superiority will be forced upon you by comparison.

CITIZEN COCHON, SYNDICAL LEADER

Cochon, the Bill Haywood of Parisian rent-payers—Citizen Cochon—is one of the ablest leaders that the French proletariat has at this moment.

Just three years ago this man was an obscure artisan, a journeyman upholsterer earning forty-two francs a week—rather less than eight dollars and a half. Today he is one of the best known and most popular men in Paris. His appearance, unaccompanied, and in the plainest of clothes, will be greeted by cheering cries of "Vive Cochon!" in quarters where the entire French Cabinet and the Academy in full uniform would excite only a mild interest.

Cochon's official title is "Secretary General of the National Federation of Tenants." He is the man to whom every tenant in Paris runs when he has trouble with his landlord or landlordess. If you are about to be evicted, Cochon will come to the rescue with several other pairs of lusty and willing arms. He will save your furniture from the greedy paws of the court bailiffs. Furthermore, if you are so poor that you have difficulty in finding a place to lay your head, Cochon will find you shelter—even if he has to storm Notre Dame to do it.

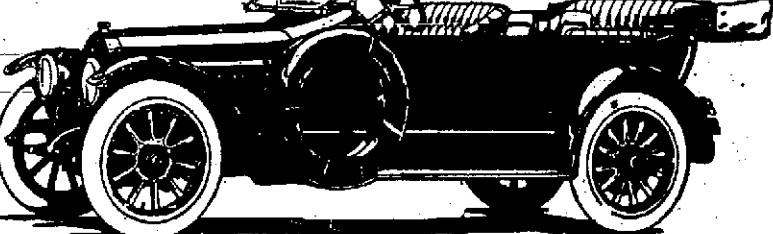

What he has accomplished he has done single handed. In one year, almost at one time, he compelled the attention of all France to one of the poorest slums on the body politic—the outrageous, pitiful condition of the poorest class of tenants in the big cities. He has in fact, forced not only the municipal, but the national, authorities to pay much belated heed to the crying problem of the housing of the poor.

Cochon himself is a very serious, stern man. Physically he is tall, broad shouldered, of muscular build with handsome features and an ample boned moustache and little eyes. Rumor credits him with having made money out of his activities, but it is not true. Not only has he no money, but his furniture is almost entirely dilapidated from frequent moving. He carries on his work from a tiny, bare office in the Rue des Martyrs, at the foot of the hill of Montmartre. As an orator he is simple and direct, and talks convincingly but without any rhetorical effects. Politically he is a Socialist. His organization is independent of any party, and welcomes members regardless of whether they are anarchists or extreme conservatives.

Louis Sherwin in the October Metro-politan.

HUDSON Six 54, \$2250

J. & J. Derris, Mich.

What Do You Know About Any Motor Car Save the One You Own?

JUST think of the cars you have ridden in during the past year; and have you driven any other car than the one you own? Not one automobile owner in a hundred rides a dozen times a season in any other car than his own.

Under such conditions, with a limited knowledge of other cars, it is natural that every motorist is apt to think his is the best car built.

It is like the man who claims that his town is the best—yet who never goes to any other town.

Remember the old Second Reader story about the pigs that thought they knew the world until they got out of the pen and climbed the hill?

Now Let's Make a Good Examination of Six-Cylinder Cars

If you have never driven a Six, you can know nothing of their smoothness.

The man who never saw an electric lamp could easily be persuaded to believe that a kerosene lamp was just as good.

If you never drove a Six, you might easily be led to think that a Four could be made to run as smoothly.

You'll never know the difference except by actual experience.

Riding in a Six will convey some of the sensation. You'll get that feeling of flying. You'll not experience any vibration. The motor will purr—almost noiselessly—and because there is a constant power impulse being imparted to the rear wheels, the grind and growl of the rear axle will not be heard.

But, when you take the wheel, you get an entirely new sensation in motoring. It is not high power that accounts for it. Four-cylinder motors can be made

How to Determine Six-Cylinder Difference

Of course, all Sixes are not equally smooth. Design means much.

To be sure to get the very finest impression of what a Six means, drive a HUDSON Six 54.

Go to any HUDSON dealer. If you drive, have him let you take the wheel, and over any road, through the maze of city traffic, over the rough roads, up hill and down, you will see why it is possible to do 500 miles in a day with safety and comfort.

New Features in HUDSON Six 54
True streamline body—the handsomest car you ever saw. Highest standard of HUDSON design and construction. The very best we know in beauty and finish. Left-side drive. Right-hand control. Entrance to driver's seat from either side. Electrically self-cracked and electric lighted.

Fully equipped with every necessary detail, \$2250.

camp, Mr. Crow spoke before the meeting and asked the assembly to contribute to the fund for the purchase of a new building. He was immediately answered in chorus. "Yes," his address took up the purpose of the campaign and the recently passed laws of the order. He complimented the local camp on being one of the best in the state and urged them to reach the 500 mark. This the members expect to do before January 1, 1914. A big class initiation will be held here on December 11. The initiation of the Visalia camp requesting the Tulare camp to attend the high links of the order in Visalia next Saturday night was accepted and a large number of members expressed their intention to go in automobiles. They will be accompanied by their wives and lady friends.

BAKERSFIELD

Miss R. G. Lincoln, and her daughter, Miss Katherine, have returned from a visit in Los Angeles.

Mr. and Mrs. J. L. Love had for guests during the past week Mr. and Mrs. F. H. Gump, who are touring the western coast.

The marriage of Miss Katherine K. Klarn and Mr. F. Imhoff was celebrated the early part of the week in St. Francis church with the Rev. Father Holden officiating. Attending the bride couple were Miss Teresa Klarn and Joe Klarn, sister and brother of the bride. Following the ceremony, Mr. and Mrs. Imhoff left for Los Angeles on their honeymoon trip, and upon their return they will reside at Panama, where Imhoff is a rancher. The bride wore a gown of pink messaline, elaborately trimmed in lace and pearls, with a veil reaching the hem of her gown. Her sister wore a pretty

gown of blue charmeuse, with lace trimming and a high collar.

The friends of Earl Wagy will be interested to learn of his marriage. Saturday to Miss Lucile Kistler at her home in Santa Rosa. Wagy is well known in this locality, being a graduate of the Kern county high school, where he made an enviable record in athletics. He is also a graduate of the University of California.

The marriage of Elvira C. Evans and W. C. Cunningham was solemnized at 8 o'clock Tuesday evening at the First Congregational church, with Rev. Edgar R. Fuller officiating. The witnesses of the ceremony were Earl Derby, superintendent of the Kern Oil Company, and Mrs. Lanier, the four enjoying a dinner at the St. Francis cafe following the ceremony. The bride is a Los Angeles business woman, having amassed a comfortable fortune in real estate. She is a member of the Theosophical Society and of the Eastern Star. Cunningham is a civil engineer with the Kern Oil Company. They are living at the Museum for the present.

At Wednesday's meeting of the Merchants' Association, the following committee was appointed to bring the Ellis & White Chautauque course to Bakersfield next June: J. H. Parsons, president of the realty board; W. Grant Hudson, president of the Merchants' Association; C. F. Johnson, president of the Kern County Board of Trade; Dr. Thompson, First Presbyterian church; Rev. James R. West, First Baptist church; Jay D. Hurd, superintendent of the Chautauque company, will give a week's course. If the committee will guarantee to sell 500 tickets at \$2.50 each, seventy riders will be on the circuit, and thirty-four have signed up. If Bakersfield decides to go ahead, the course will be held here June 8.

Judge Milton T. Farmer of the Superior court received word from Berkeley Thursday morning that he

has been prevailed with a son by the work.

Between fifty and seventy-five Bakersfield Elks are enjoying Fresno hospitality today, having made the northern trip in response to an invitation from the Fresno City Elks to the annual hard in a get-together meeting. The Bakersfield Elks who arranged the excursion were: P. J. O'Meara, H. J. Holderman, H. W. Thomas, J. Bruce Payne and James Ryan.

Mr. and Mrs. J. E. Gillespie have returned from a two weeks' outing at San Francisco and the bay cities.

PARLIER

Mrs. J. H. Parlier was the genial hostess to the Happy Hour Club on Wednesday afternoon. Besides the club members the invited guests were: Mrs. Milton, Mrs. S. M. Andrews, Mrs. I. N. Parlier, Mrs. Henry Ross and Mrs. William Lewis, and Mrs. Davis and Mrs. Swanson, of Del Rey. Mrs. Parlier will entertain the club at its next meeting.

TAFT

Mrs. Elrod most enjoyably entertained a number of friends Wednesday evening at her home in honor of her brother, Dr. Holton, of Cincinnati. The evening was spent with games, conversation, music and refreshments. The usual good spirits of the Twenty-Five hill crowd pervaded the assembly. In the three months that Dr. Holton has spent on the hill he has made many friends who were there to bid him good-bye and good luck in his work in the East. He left today to return to his studies in the Cincinnati Dental College. Those present besides the hostess and the guest of honor were: Mr. and Mrs. McCulla, Mr. and Mrs. C. A. Sowles, Mr. and Mrs. R. H. Smith, Mr. and Mrs. Percy Ithine, Mr. and Mrs. Frank Kaufman and baby, Mr. and Mrs. Lawrence Reay, Mr. and Mrs. J. H. Daugherty, Mr. and Mrs. J. N. Rippe, Mr. and Mrs. Thomas Hawkins, Mr. and Mrs. R. K. Fisher, Mesdames F. M. Fisher, E. R. McCulla, E. S. Stephens, Thomas Waldron, J. D. Lundgren, N. L. Farmer, J. W. Alexander, Roy Lashaw, Misses Helen Sutton, Martha Daugherty, Is. bel Madison, Lucile Rippe, Alice Waldron, Electra Hawkins, Messrs. Harry Linscott, Lester Finster, Wallace McCull, Monte Hawkins.

MODESTO

At a meeting of the board of directors of the Modesto Coffee Club Wednesday night the decision was reached to tender a banquet to the people of Modesto who are friends of the institution, Friday night, October 10th. It is planned to send special invitations to the managers and officers of the other 22 Coffee clubs of the state to be represented on this occasion.

In the new home the Club is progressing well, the average patronage each day at the present time being over 400. The club room on the second floor has not yet been furnished, but will be in the near future, probably about the time of the banquet.

MADERA

Twenty-six men appeared at the home of Prof. F. O. Mower Tuesday night to engage in chorus practice. This is the second practice since the movement was put on foot, and Prof. Mower looks to a talented male chorus very soon. All manner of voices are well represented, and it may be expected that the organization which is founded on the desire for pleasure and entertainment of the members will be the center of public interest on various occasions during the year. For some little time to come the club will devote its attention toward the development of itself in private practice.

Thursday evening W. S. Conner was the host at his home in Madera to his Sunday school class of boys of the Presbyterian church.

The evening was devoted to games, amusement and a delightful supper of Mrs. Conner's direction.

MYSTERY OF HEAVENS NOT YET REVEALED

Only Hell Has Been Vividly
Depicted By Artists
and Poets

The imagination cannot go far ahead of experience; it can travel simply along routes only faintly marked by adventurous explorers, but it always needs a starting-point, and it cannot project paths into wholly unknown regions. The world "unimagined" suggests the fact that the creative, pictorial faculty which has made progress possible and is the open door through which, as Dr. Bushnell said, God finds access to men. It is significant that all attempts to describe heaven and in a luminous, resplendent, which hell and purgatory have not been suggested but pictured with terrifying and convincing power. Dante walks the awful paths of hell with commanding authority; he not only sees and understands, but he describes and interprets, the world of punishment with compelling power. And in the world of purification, though less dramatic and realistic, he is not less at home; he knows whence flow the tears of purgatory. But when the gates of paradise open to his unaccustomed feet, the sight is too dazzling; he cannot see for the unfamiliar brightness; he speaks as one in a dream, and his dream, his vision has traveled far beyond his experience. Sin he knows, and remorse and pain and tears he understands, but he cannot grasp the bliss of heaven; he walks with faltering step in "worlds not realized."

The Milton of "Paradise Lost" is a greater than the Milton of "Paradise Regained"; and the Bible, the most concrete and definite of books in dealing with the deep things of God and with the mysteries of man's life, in the infrequent references to heaven takes refuge in symbolism which the Western reader often mistakes for pictorial imagery, and is rather hindered than helped by what he reads. In literature the great sinner is far more powerfully drawn than the great saint, and the most pathetic and appealing figures in the drama and in fiction are the men and women who, by breaking the law, have not in motion the tremendous tragic forces. The great artist finds his imagination reinforced and energized by experience when he deals with Satan, with Agamemnon, with Faust, with Richard III, the most he skillfully when he tries to paint a St. John or a St. Paul. Sin we know, and all the tragic consequences that follow it in inevitable companionship; but the peace which flows from perfect purity, that radiance that shines, as the old paint-

ers saw, from the faces of the sinless, the bliss that waits for those who stand at home in the presence of God like happy children, lie beyond our experience; and, try as we may, we cannot give them form or body. When we try, we become irrevocable and take refuge in a kind of sentimental materialism, or the heaven we picture is a golden cloud on the edge of the horizon or a shining dome hanging unsupported in midair.

The world of punishment and of purification we know, but the world of bliss we not only do not know, but it cannot be revealed to us; that is the reason why the longings of the heart are not met, and the cry of the soul for power to realize the surroundings of those who have gone on into the next stage of life is not answered; we are not told because we could not understand.

A description of the heavenly life by one who was in the heart of it would come to us in an unknown tongue, nothing in our experience would interpret it to us. It does not lie even in the power of the Heavenly Father to make these mysteries plain to us, as it does not lie in our power to make clear to the little children we love the principles of philosophy, the more abstract truths of science, the conditions of ripe Christian experience.

We can know the direction of the paths which lead us to that highest plane of living which we call heaven, but we cannot see the paths; we can know the elements out of which the things which surround them, but we cannot visualize the conditions in which that happiness is shared; we can neither give power and shape to the spirits of those who have departed nor dimensions and body of the things which surround them. All the reports of these things which credible experience has revealed to us, are people are asked to believe are crude, materialistic, or so vague that they have only the substance of a dream.

Heaven is beyond our power of imagination, not because it is unreal, but because it is a higher reality not yet grasped by the mind. All life predilect; punishment and purification foretell and affirm it; but it waits on our fuller experience to reveal it. Mr. Hercher has somewhere said, "Mr. knowledge is given us in this life, not to satisfy intellectual curiosity, but to aid in the development of character; and heaven, which rests immovable on character, both divine and human, comes at the end of a process not of thinking but of living; that is what

makes it more real than the things we know, more substantial and enduring than the things we paint and carve and describe. When the scientist begins to experiment with a short circuit of wire he may dream of the time when messages will travel under great seas along thousands of miles of cable; he cannot force the hour when they will fly through the air itself. That vision will come only when he has mastered the resources of the wire, and his experience as given his imagination a new vantage ground for further flight.

WIFE SIGNALS MAN TO SHOOT HUSBAND

LOS ANGELES, Cal., Sept. 26.—That Mrs. Rose Nelson of Florence, who is held as an accomplice in the murder of her husband, Frank E. Nelson, not only planned his assassination, but gave him the signal to fire the fatal shot was the statement of James P. Cook, confessed murderer, during the course of her preliminary examination which is in progress today.

Cook testified that Mrs. Nelson gave him \$200 with which to hire a man to do the deed and that he purchased a revolver with part of this money. On the day of the crime, he said, he was lurking outside the Nelson home when Nelson left for his work. Mrs. Nelson appeared at the window and signalled him to shoot.

"I could not resist her," said the witness. "I crept up behind Nelson and fired. The woman tempted me and I fell."

Cook, in his confession, declared he and Mrs. Nelson had planned to elope after the homicide.

50,000 cars—Not enough!

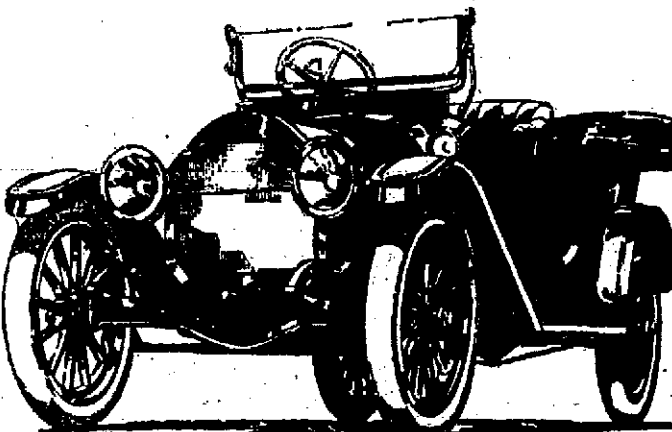

FOR from every indication and from orders on hand we could double our 1914 production—make 100,000 cars and still be behind in orders. We have on file immediate shipping orders for over 10,000 cars. The new Overland has been on the market for less than one month—yet in that short time—in 30 days—we have received orders for one-fifth of our entire 1914 production.

For example: Away up in a very small town in a remote corner of the great northwest, a dealer had contracted for 40 Overlands to be taken during the next twelve months. This is a big order for that section of the country. The publication of our announcement (last month) brought him such an overwhelming batch of cash orders that he came straight to Toledo to literally beg for more cars. He stated that he would take the entire shipment of 40 cars in one month instead of twelve months as originally contracted for.

On the other hand our dealers in the large centers would take 500 cars apiece right now if we could supply them. But 150 a day is the very best we can do at this time. And these 150 per day we are carefully and equally distributing all over the country.

Such selling records have but one meaning. Such a demand must prove to you beyond all doubt that the Overland is the most economical and practical buy on the market.

We Will Be At The Fair With 3 Winners

Regal Underslung "1914"

The Regal Underslung is the easiest riding car built. It has the comfort of a perfectly built car. It rides with the greatest ease over rough roads.

The underslung construction is a preventive of accidents. It is almost impossible to tip it over. You never hear of an accident from a Regal turning turtle. It is too nearly impossible.

See the handsome new 1914 Regal at the Fair.

The White "1914"

The White enjoys the reputation of being the best built car of them all. It is built to last, every part being the finest that can be made.

The workmanship is the highest, every part is standard. In the White is put the best that has been developed in the automobile world.

See the new 1914 White at the Fair.

The Michigan "1914"

The Michigan has been called the most beautiful car of all. Certainly it gives more for the price than any other built. The new ones are better than ever.

There's everything that you can desire in an automobile. In the Michigan you get all that you demand. See the Michigan at the Fair.

We will be easy to find.

PEOPLE—EVENTS—PUBLICATIONS

WEEKLY COMMENTS

By CHARLES H. SHINN.

There is to be a book of "fisheries" issued in London before long, quarto size, superbly illustrated. Lord, ladies, knights, non-rables, counts and our own Californian, C. E. Holder of Pasadena, are among the contributors. Holder, the fisherman, is a bright and native personage who belongs to the Glasgow Sea Angler, the French Castling Club, and no end of other associations. He has been writing out-door books and articles for more than thirty years, and he is descended from that Christopher Holder who founded the first Society of Friends (Quakers) in America (only 253 years ago).

California owes a heavy debt to the men of Missouri, hundreds of her pioneers came from that great democratic commonwealth whose settlement dates back to "Old St. Genevieve" (about 1735). General John Bidwell of Chico was only one of those pioneers; they were in every mining camp of the Pacific coast and their plans were in every valley and their cattle on every hillside. There used to be a notion that they did not take kindly to schooling; the roster of state university graduates tells a different story.

But the other day a rich and traveled Missourian from St. Joseph was asked about authors.

"We have none in little old St. Joe."

He had never heard of Mary A. Owen, a Vassar girl, who has devoted her life to folk-lore, has published half a dozen important books, made notable discoveries in Voodoo magic, has been admitted to tribal membership with Indians and gypsies, and belongs to the leading American and European societies for this sort of thing. She comes to California now and then—a student, busy and attractive student of things and people. Then she goes back to St. Joseph and finds out more of the mysteries of Ozarks and Musquagee.

Sometimes we shall have a law permitting the state librarian to take old letters and other documents from county archives and substitute certified copies. Old Mariposa has a lot of General Eganott letters, and no end of other priceless historical materials; San Luis Obispo has the Dana correspondence (in Spanish); almost every county in California is the owner of precious manuscripts and autographs which belong in the state library, under the charge of that capable fellow, J. L. Gillis, once a Sacramento school boy and a railroad messenger, who has developed into one of the leading librarians in California, and has now spent about eighteen years in public service connected with archives and books. The other day he secured a couple of nursery catalogues published by Beach of Marysville in 1852. Only collectors know how rare such things are, and only students know how much information some of them hold, especially in the advertisements which many of these old publications contain. Noah Brooks, who wrote "The Diamond Maker of the Sacramento" in the Overland Monthly, once advertised himself as a "careful sign-painter" in the early Marysville directories (about 1852).

The Cleveland moving picture shows have voluntarily accepted a censorship of all films and theaters. Nearly a thousand reels were censored in 67 days and 88 were "cut" in the process. It is planned to license these theaters under a permanent censor-

ship. They had the children write compositions on the "movies"; one third grade boy said: "You are men robbing houses, and so you learn how."

It is estimated that only 5 per cent of the population of New York city is reached by recreations under public control. A sub-committee of the board of estimates urges that wholesale recreation publicly controlled is needed by all the people just as much as public education.

Free recreation available for all would cost about \$40,000,000 a year, but it is believed that the people would gladly pay for a better class of amusements than those now furnished by private-enterprise methods. This raises a number of large questions. The program desired includes neighborhood organization, self-government, local control of funds, use of school houses and other public buildings, and it is believed that "recreation for all" can be made self-supporting.

The Wisconsin State Medical Society has made a study of the physique of 1500 criminals in the state prison. The "habitual offenders" show marked physical inferiority; they lacked two and one-half inches of the height of the average American of the same age, and proportionately in weight, strength, chest measurements, etc. In other words, most of them could not hold their own in the struggle for existence. This raises a few more of the larger social problems.

It would be first-rate if all of the people who discuss social questions did it with the tact, courage and common sense shown by Edith Livingston Smith, a well-known social worker in Massachusetts, who writes of "Un-nourished Mothers" in Harper's Weekly for September 6th. She knows her things, and she is not afraid to say things that "the poor with clean hearts" who women must generally co-operate in dealing with such problems as they will.

There is an advertisement of a book that Cook has written going to publishers. It is a book of numbers, newspapers and it has a weird look. A man who knew both Cook and Perry writes about them in the St. Louis Mirror; he says that "Perry was too cold," and "Cook too willing." In other words, Cook was always "too shifty-eyed and too well-concealed," while Perry was "horribly 'offbeat,' over-pawing, but 'tired to the bone' as if he had really fought some big, big fight. There you are, and you can choose for yourself."

There is an old mountaineer, up in the California Sierras, he lives all by his lonesome, in a cabin built of shakes which he split from a wind-fallen pine. He was one of the honor men in his university. When he delirious a story, poem, play or book of any sort he mails it up to a tree, and lets the post bring it complete, the system. The other day he drove a number sixteen spike clear through that red booklet of a certain young writer—Walter Lynner of Barbary Home, Vermont. The title of the booklet was "Tiger."

It is immature work on a great subject, its atmosphere is all wrong. As Oliver Herford lately said (through Hafiz, his cat) it certainly belongs in the rubbish pile.

But this old shake-maker buys all of the stories written by Mrs. Stratton-Forter, that Indiana woman who began illustrating and taking photographs for recreation, published "The Song of

the Cardinal" in 1902, and has written seven or eight good-sellers since then. One cannot exactly tell why he likes her books. A reviewer once said of them that they were "sugared peaches and sweetened cream, beaten to a froth." The old man in the cabin says they are nice and clean and have the sort of real old-fashioned people in them that used to live in his neighborhood when he was a boy. He fell in love with the girl in "The Harvesters" and is now reading "Laddie, a True Blue Story," which Doubleday Page & Co. have just published; it is an even shot that he cried over a chapter headed "Even So" and he said the Ohio woman of the Indian story was like his great grandmother. "Laddie" is already one of the "best-sellers." It is not deep, not wide, nor are its currents swift. But people appear to like these little spring-fed brooks in the forest.

There is room on the Pacific Coast for a great many more people. But what changes will come, what new problems arise, as we "fill up the open spaces." Once England was a great forest, full of little valleys, and the tribes ran free; then the "incisors" cleared the Andromeda wald; at last in Lancashire, for instance, every acre is occupied on an average by five persons! The struggle for mere existence thus becomes more severe, more precarious. It is statesmanship to look ahead to see these things on the road and make full-ready for them. But the freedom of the individual to go and to come to make and to unmake, to choose and to cast away, has been far greater than it now is—and may come to be much less. A civilization which is fine and well-ordered, must have discipline and obedience as well as freedom.

Robert Shackleton, who contributes a most readable paper on "Tree Conservation" to "American Forestry," is a University of Michigan man, an Ohio lawyer, one of the Saturday Evening Post group, and the author of "Many Waters." But we know and like him best when, with his wife, whose front house is Elizabeth, he goes in quest of colonial chairs, brasses and porcelains.

Mining operators, engineers and surgeons meet in Pittsburgh this month to devise means of reducing accidents. This has grown from the "Safety First" agitation of last year. Nearly 10,000 men are annually killed, or runely injured in American mining industries. It is too high a life-tax. "Safety First."

It is down in the Argentine Republic that a statue has recently been erected to our George Washington, and the American flag was everywhere in evidence. We ought to reciprocate somehow; perhaps we can send American foresters down there to help in developing those immense coniferous areas chiefly Araucarias. And we might give a passing thought to our old Mendoza, who founded Buenos Aires in 1535.

One more treasure-tale has gone glimmering into nothingness. That lake Guatavita in Colombia, where the Indians were said to have been casting treasure for ages, was lately drained at vast expense. The company secured about a week's running expenses. This particular legend is as old as the times of Raleigh and has been repeated with additions every year since.

Tree-houses are being built in this country and Europe for "sleeping rooms." This is fiction—more justified. Chesterton wrote a tale a decade ago in which his hero dwelt in a wasp-like swinging nest perched up in a tall tree, and reached by a rope ladder. But the whole thing is "Swiss Family Robinson"—and millions of children have built play-houses in tree-tops, and have thought how very convenient it would be to have a prehensile tail.

Everyone who has to dig up the

Bicycles

The Most Value for Your Money---

Flying Merkel Bicycle

—The most value for your money is in the Flying Merkel Bicycle, the easy riding, well built wheel that has become such an immense favorite. It has the double bar frame, comfortable motor seat, motor pedals, roller chain, coaster brake, heavy tandem, spokes, etc. The Merkel is priced according to equipment.

EASY TERMS

Reliability, Speed, Endurance, Comfort, and Real Economy Are Thor Features

Only the Best Materials Are Used—That's Why You Seldom See a Thor in the Repair Shop—They Stand the Work

We Use Factory Made Thor Repair Parts

We use repair parts that are made in the Thor factory. They cost us more, but they last you two or three times as long, give better satisfaction, and are thoroughly reliable. Our repair department is in charge of a factory expert, so that the work is done right.

THE BEST OF MATERIALS

The best of materials, the very best manufactured are used in the Thor, in every part of it. That is why it stands such hard use, why a Thor is used for so many years with entire satisfaction. It is the CHEAPEST motorcycle in the long run. This is the most important fact about any machine; it is the difference between satisfaction and dissatisfaction.

THOR FEATURES

The oiling system is perfect. It requires none of your attention. It is entirely automatic and takes care of itself. All you need do is to keep oil in the tank.

TWO SPEED.

This attachment is an exclusive Thor feature. It is operated by the clutch lever and is fool-proof. It can't be stripped. It doubles your power. Ride up any hill, through any sand, cut down speed till you barely crawl. It has been rigorously tested and found more than satisfactory.

SEE THE THOR

Let us show you this wonderful motorcycle, and tell you about what it has done as well as what it will do. You can buy on our easy payment plan.

DON LEE

GARAGE

1425 J STREET
Los Angeles, Pasadena, San Francisco, Oakland, Sacramento, Bakersfield

Stokes publishes that famous little book, (translated from the German of Wilhelm Lamazus)—"The Human Slaughter House." Its sale is prohibited in Germany, but it has been translated into eighteen languages, and everyone is recognizing its value as an argument against modern war.

A very interesting paper appears in the September issue of Albert Shaw's "Review of Reviews." It is by Paul U. Kellogg, and is on the work before the new federal commission on Industrial Relations. It's title is "The Government, the People, and the Labor Problem." But who is Paul U. Kellogg? He is from Michigan, took his degree at Amherst, and has been doing piles of sociological work ever since. He calls himself, we understand, "just a plain newspaper fellow," and he edits that useful publication, "The Survey."

It has long been said, by thoughtful people, that social workers of the Jane Addams type are badly needed in villages and country places. Some of the once-famous, but now run-down old mining camps of the Pacific coast certainly do need social help.

Well, Arnold L. Gessel in the October American magazine, has a study of a "Village of a Thousand Souls" which goes straight to the mark, and will give all of us a lot to think about. It should be followed up by a study of what have been called "those mushroom western camps, far smaller than hamlets thrown down in the rocks, and mighty hard places to live in, with their one store and their seventy-five inhabitants to a camp."

Among the books of the season which cannot be read with profit is Hall Cain's "The Woman Thou Gavest Me." As usual, in recent years, he is absurdly melodramatic. He seems to have wholly lost the power to write such books as "The Harvester."

That brilliant Californian, Geraldine Bonner, has fallen below her usual standard in "The Book of Evelyn." and it is a pity, for she has done much good work.

Frederick S. Isham's "Aladdin from Broadway," is altogether a bit of accidentalized Arabian Nights. He misses the Word of Mastery, the marvelous cavern does not open for Mr. Isham.

EXPERIMENTS SHOW TUBERCLE BACILLUS TO BE EXCEEDINGLY TENACIOUS OF LIFE

The fact that one-tenth of all the deaths in the human family are due to tuberculosis, and that millions of dollars worth of farm animals are lost annually from its ravages, makes any knowledge concerning the fate of tubercle bacilli outside of the animal body of great value.

These questions often come from stock owners: How long is it necessary to keep healthy stock from a field where tuberculous cattle have previously been allowed to roam? How long do tubercle bacilli live in manure, in a watering trough, and in a seed tuberculous animal?

Through the kindness of the tubercle bacilli, only two types of animals—the human and the bovine. The avian type, found in domestic fowls and birds, and a type that infects the cold-blooded animals, especially frogs and fishes, play almost no part in the infection of man. But the two types are difficult enough to guard against has been demonstrated many times.

As a result of extensive investigations with regard to the length of life of tubercle bacilli, Charles Bryant, of the Illinois Agricultural Experiment Station, says that great care should be taken to prevent healthy animals becoming infected from manure of tuberculous farm animals, from the dead tuberculous animals, from the soil, water, and similar sources. Live tubercle bacilli were found by him in dead guinea pigs exposed to sunlight more than seventy days after the death of the animal. They were alive in the tissues of a dead guinea pig exposed in water for more than 321 days. Tubercle bacilli in cow manure were

active and active at least seventy-three days after a pure culture had been mixed in a sample of the manure which was exposed to weather conditions in a pasture field in the shade. They lived 15 days when exposed in the sun. In running water both human and bovine tubercle bacilli lived for more than a year—441 days. The danger from a watering trough harboring tubercle bacilli, or from a dead tuberculous animal in a stream or your neighbor's farm, are therefore evident.

Man is endangered not only from infected water, milk, dust, etc., but in the use of phosphate made by grinding up tuberculous animals. This is rather extensively in the United States. This fertilizer being much used in vegetable gardening. One can readily see how a small piece of tuberculous tissue containing many dozens of tuberculous germs, could be made to adhere to a onion or radish, especially in a slightly bruised place, and be carried directly to the consumer. That these germs would remain alive and virulent during such a circuit there is no doubt.

With regard to the length of time bovine tubercle bacilli live in butter, Dr. Bryant says, "Tubercle bacilli were produced in test animals from injections of infected, cold storage butter after as long as 274 days. This shows that while butter can be kept in cold storage for months in an excellent condition, this in no way lessens the danger from tubercle bacilli that were originally in the butter. All such dairy products should be tested by government officials not only for quality but also for the presence of tubercle bacilli."

THE SELECTION OF A PUMPING PLANT

(Continued From Page 12.)

son, and often a shorter period is desirable. This requires a pumping plant two or three times or more the size required for continuous irrigation. The capacity of the pump must be sufficient in all cases to give a large enough stream to irrigate economically; even for the smallest orchards a stream of at least 5 to 10 inches per minute, or about 50 to 100 U. S. gallons per minute, is desirable.

For a full-bearing orchard 18 inches of irrigation water for deciduous trees and 24 inches for citrus trees, applied in three to four irrigations of 6 inches each at intervals of thirty to forty days, should be ample in most cases. As stated above, where the water has to be pumped to high elevation, the higher cost of the water demands great care in its use and 12 to 18 inches total depth of irrigation water should be sufficient.

The table below gives the required pump capacity for various sizes of orchards or farms, and for different periods of operation. It is based on a depth of irrigation water of 6 inches each month, or 18 inches in three months, which is taken as the irrigation season. The period of operation is given in number of 24-hour days that the plant is operated each month. These days need not be consecutive; for instance, if the operation period is ten days, instead of applying 6 inches of water in one irrigation lasting ten days, the soil may be so porous and gravelly that it will not retain moisture. In which case it may be preferable to apply 3 inches at a time in two irrigations during the month, of five days each. The required pump

capacity is given in U. S. gallons per minute. Necessary capacity of pumps in U. S. gallons per minute to give a 4-inch depth of water on the land each month when operated the following number of 24-hour days each month.

Area, Acres.	20 Days.	15 Days.	10 Days.	5 Days.	2 1/2 Days.	1 Day.
5	19	28	38	56	113	225
10	37.5	56.25	75	112.5	225	450
15	56	84	112.5	170	340	675
20	75	112.5	150	225	450	900
25	93.75	140.625	187.5	281.25	562.5	1125
30	112.5	168.75	225	337.5	675	1350
40	150	225	300	450	900	1800
50	187.5	281.25	375	562.5	1125	2250
60	225	337.5	450	675	1350	2700
80	300	450	600	900	1800	3600
120	450	675	900	1350	2700	5400

The capacity of pumps for smaller or greater depths of water applied per month can be easily computed by proportion from the value given. For different rates and different periods of operation the capacity may be obtained by interpolation.

KINDS OF PUMP

The kinds of pump commonly used to raise water for irrigation are (1) centrifugal pumps, (2) power plungers, (3) deep well pumps, (4) air lift pumps, (5) hydraulic pumps. Where the source of water supply is a entire body of water, either a centrifugal pump, a power plunger pump or a hydraulic ram will be used; where the source of water supply is ground water or water in wells, usually with a centrifugal pump, a deep well pump or an air lift pump will be used and in some cases a power plunger pump. For deep wells usually, the vertical

PLANTS RESPOND IN SPECIFIC MANNER TO THEIR PECULIAR ENVIRONMENT

Student at University of California. It has been recognized in the past that a given plant will behave in a certain manner when transplanted to a new climate, or to a region where different soil conditions exist. It has been demonstrated that forms living in the elevated mountain locations. The converse has been found to be equally true. We need but to look around us, here in California, to see the relationship between the forms of plants and their specific environment. Take for example the most familiar of our wild flowers, the California poppy. At the seashore it is a low tufted plant, rarely exceeding two or three inches. A few miles inland it attains a great height, and in the interior valleys it often reaches eighteen inches. It may be interesting to note here that the botanist, Greene has made over one hundred "species" out of our common Eschscholzia Californica.

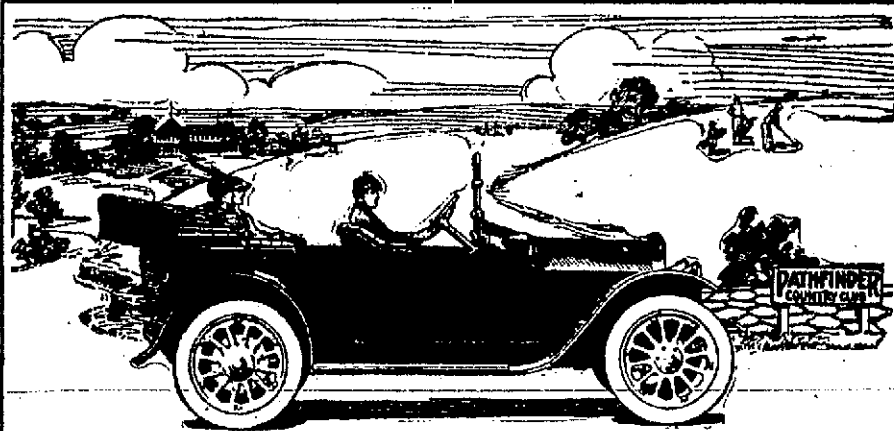

At every turn we find that plants apparently respond in a specific manner to their peculiar environment. However, we must conceive of what actually occurs as being an equilibrium between the activities of the plant (extending in all directions, and the opposing forces of the environment. Factors exist that tend to upset this equilibrium by the term adaptation. It is the reaction involving the vegetative parts of the plant and acts independently of the hereditary factors, the ovules and the pollen grains. That the ovules and pollen grains are not transmitted. However, men like Dr. Webber are inclined to believe that the same conditions, requiring a constant repetition of a special adaptation, may so alter the manner of impregnation upon the "germ-plasm" of the plant as to actually affect the sex-cells or gametes, and allow the acquired character to be passed for one or two generations under new conditions.

The bulk of the evidence seems to indicate the transmission of acquired characters. However, this does not mean that we should shut our eyes to the ever-present factor of adaptation. In dealing with the problems of applied genetics it is essential that we should recognize its potency and plan accordingly.

Every individual has certain hereditary factors which produce a certain type of character. However, this does not mean that we should shut our eyes to the ever-present factor of adaptation. In dealing with the problems of applied genetics it is essential that we should recognize its potency and plan accordingly.

Where the source of water supply is ground water developed by deep wells with the water table at a large depth below the surface (50 to 200 feet or more) the choice is between a vertical centrifugal pump in a pit and a deep well pump which eliminates the pit. Deep well pumps are best adapted where the lift is in excess of 100 or 150 feet and for wells that do not yield more than about 40 gallons per minute. Their efficiency is greater than that of centrifugal pumps, but the cost of repairs and depreciation is greater.

The selection should be made only after careful consideration of the first cost of the pump and the annual cost of fuel, operation and maintenance. Where the lift is high, the fuel cost will be considerable and it is good economy not to select the cheapest pump obtainable, but one that is guaranteed for its efficiency. On the other hand, if the pump is to be operated only during a small portion of the season, it would be poor economy to invest a large capital in a high grade pumping plant to save in fuel cost.

PATHFINDER "40"

A Record-Making Car

In the Hoosier Tour the Pathfinder Made 1472 Miles--Indianapolis to Denver--With Sealed Hood. This Is the World's Record

The strength, dependability and perfect construction was never more severely tested or more convincingly proven than in the "Hoosier Tour," when the Pathfinder went the 1472 miles with the hood sealed. It shows that the Pathfinder is a car built right. Its beauty is substantially backed with the stuff that means satisfactory use. The equipment throughout is the very best and the very latest. The beauty is compelling, the graceful contour being a distinct feature.

The Pathfinder Is Backed for Service

Bicycles and Repairing

Talking Machines and Records

FREE Children's School Bags With Each Bicycle Sold or Repaired

\$20 to \$25

We are making these specially low prices on bicycles, especially made for children. They are strongly made to stand the hard usage and abuse that children give bicycles. They are easy riding, so that the most delicate child will be greatly benefited by the exercise. They are strongly guaranteed and backed by our service agreement to keep the tires glued, nuts tight, moving parts oiled, wheels true, etc. Now is a good time to buy the child's bicycle to ride to school.

KEPT In Repair One Year Free And thoroughly Guaranteed

A Special Offer

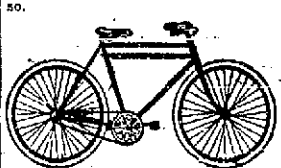

On all bicycles that we sell we will equip with coaster brake and motor saddle instead of the regular equipment, for only \$3 extra. This is a very low price on this extra equipment. This offer is good both on juvenile bicycles and the larger sizes.

Repairs Free for One Year

These are all well-known makes. The Rambler has a national reputation and has been a leader for years. The Olive is high grade in every respect and strongly guaranteed. The Fresno is made specially for us. The Olympia is the most popular-priced bicycle made.

Special Repair Prices

On all jobs of bicycle repairing that amount to anything (that is, all except trivial repairs), we will make a special rate. We guarantee all of our repair work to be thoroughly satisfactory. Let us do your repair work and economize by doing so.

SPECIAL Coaster and Motor Saddle \$5.00 on our Wheels

Our Easy Terms

All bicycles are sold on easy terms of a little down and a little each week or month. If you have an old bicycle, we will take it in trade on a new one. Come in and select the wheel you want, make the small initial payment, and ride the bicycle away.

\$3.00 Tires \$1.75
\$3.50 Tires \$2.25
\$4.00 Tires \$2.75

We Put Tires On All Are Guaranteed Wheels

Here is your opportunity to buy the best of guaranteed bicycle tires at wonderfully low prices. These are all guaranteed tires and will give excellent service. These low prices include putting the tires on for you. If you are in need of tires, buy now.

EUGENICS APPLIED TO THE HOGS

(Continued From Page 13.)

narrow-backed sow is always slow in maturing and is likely to be a poor suckler and a poor feeder.

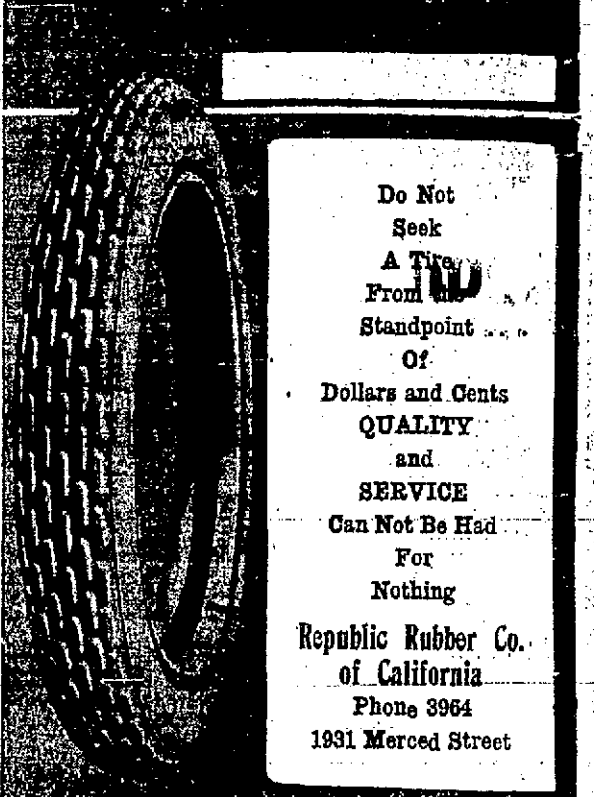

The breeder of pure-bred hogs appreciates the value of the tried broad sow and seldom parts with one except at a remunerative price or until her period of usefulness has passed in the breeding herd. It is, however, a very common practice among many farmers who produce hogs only for market, to select gilts from the spring litters and breed them in November and December for spring litters. Immediately after weaning their pigs these sows are fattened and sold on the early fall market. These same farmers usually breed their gilts to young boars, arguing that it is too much trouble to keep an old sow. This practice of breeding constantly young immature animals will, if followed for a few years, very soon reduce the productive capacity of the herd fully thirty per cent. This applies not only to the profitability of the producing pork. While some writers advocate a special course of feeding for the development of gilts which are intended as brood sows, I question if such recommendations are worthy of much consideration. A successful swine raiser knows what constitutes a "rational" food—food containing a reasonable ration of protein, carbohydrates and ash. Supplement this with plenty of pasture, pure water and sunshine, and the development of the brood sow which will pay a handsome profit will have been accomplished.

THE PILGRIMAGE

He would have wept, but there was nothing to be done. He would have laughed, but there was nothing to laugh at. He came where there were songs and wine and play and passion—but he went and was not there. He lingered long beside a form shrouded. And strewn with lilies—that which on a day Had known his kisses—but he turned away. To wander where he would not wander, mad With silence. Then he came unto the home of other days and climbed the garret stairs. Finding an olden box where were his childhood playthings—wrecked, even formless some. All dusty—which he kissed as one who dotes, Precious then to him. Then he laughed—and wept. —Walter Gould, in the International.

FREAK PLAY FINDS WAY INTO LOCAL BALL GAME

Fahey Pegs Ball to Butler's Head In Third Inning

California League Season Closes With Contest This Afternoon

A freak play of the first water occurred in the third inning of yesterday's game with Stockton. Before going farther it won't be mentioned that Stockton won 3 to 5. But to return to the freak play and incidentally the five runs made by the visitors in this inning.

With Butler on first, where he had arrived after a single to Driscoll, Holt drove a grounder to Driscoll. Holt fielded cleanly and threw to Fahey, covering second, forcing Butler. Fahey wheeled and threw to first for a double. Butler was not more than six feet from Fahey when the latter made the throw. The ball struck Johnny squarely upon the forehead, bouncing fully a hundred feet. By the time Hoffman had secured the sphere, Wilhoit was on first.

The force of the throw knocked Butler cold and it was several minutes before he was able to leave the field. Boeckel opened the inning by doubling to left. Simpson drew a walk. Stevens perpetrated a passed ball and Boeckel scored. Edmondson drove shortly before first and the box. Hoffman fielded the hit but first was left unprotected. McClellan walked, crowding the paths.

Schmidt connected for a three base hit against the rightfield fence, scoring Simpson, Edmondson and McClellan in order. Butler then came through with his single, the medium of the last run.

Pittman's single and Simpson's double scored the former in the sixth inning. Jack Thomas earned a couple of dollars with a homer. A double by Boeckel and a single by Simpson, scored the second run of the inning.

FRESNO GETS SIX Driscoll added the locals in the run-making. His homer in the third inning opened the way for six runs, although they were widely scattered. Three singles in the sixth added two more runs, bringing the total to five as two hits and a walk scored two in the fifth.

Bunny Pierce got one nearer the victory in the ninth. Pierce led off with a single to center. Lander scored on a head throw to Driscoll. Lander scored on an attempt to stop Fahey. Score:

HANSON OF COALINGA TO MEET SALT LAKE FIGHTER OCTOBER 3

(Special to the Republican)
SALT LAKE, Sept. 27.—Vic Hanson of Coalinga was matched today to box twenty rounds with Kid George at the Saltair hippodrome Friday night, October 3. Kid Winsor, who has Hanson in charge, expects to send the boy to the top of the heap shortly. Negotiations are now on for a match with Eddie McGeary, the middleweight champion, at Butte, Mont., the latter part of next month.

PIPPINS DEFEAT BEARS IN FOURTH

Hughes Outpitches Walker Keeping Eight Hits Widely Scattered

(Special to the Republican)
WATSONVILLE, Sept. 27.—Watsonville made it four straight by beating San Jose 3 to 6 this afternoon. Hughes outpitched Walker all the way, letting down only in the seventh, when the visitors scored four runs. The Pippins started in early, piled up a long lead and never were in danger. Score:

MAC KENZIE ANIMAL SCORES AT PLEASANTON

PLEASANTON, Cal., Sept. 27.—The Pleasanton race meet was brought to a close today with the deciding of three events.
J. C. Simpson, owned by R. J. McManis, secured high in the 2:15 trot. Dick W. finally stopped to farm over, annexed the 2:20 pace and White Sox won three out of four heats in the 2:25 trot.

The first event was a split heat affair. Simpson winning the first two heats, Monica McKimney the second and Aleck the last two. The honors went to Simpson because he took high in the summary.

SPORTING NOTES

Manager McGraw of the New York Nationals, it was learned yesterday, believes that injured pitcher Thomey Doyle and yesterday by Larry Doyle and Fred Snodgrass will not necessarily keep them out of the world's series. To what extent the heavy-hitting second basemen and the speedy center fielder would test the effects when the Giants face the Athletics can not be answered at this time. The injured pitcher due to Doyle's automobile accident and the "Charley" Snodgrass developed in yesterday's game may leave a stiffness that would interfere with the smooth work demanded by the big series.

Mrs. Doyle asserted yesterday that her husband had nothing worse than a bruised shoulder. An X-ray examination failed to show any broken bones.

President Leavitt of the Oakland baseball club announced yesterday that Manager Carl Mize had been granted a two weeks' leave of absence at his own request in order to handle his personal affairs and conduct negotiations with an Eastern club with which he desires to affiliate. Walters on Mize has been asked from all Coast League clubs and if they are agreed the Oakland club will assist the catcher to locate wherever he pleases.

Meanwhile, Field Captain Hettling will be temporary manager. Shortstop Arthur Devlin, who has been signed to manage the Oaks next year, leaves New York tonight and will join the Oaklanders in Portland. While Devlin will play Hettling will probably be the nominal manager for the balance of the season.

Joe "Azevedo" and "Bud" Anderson, lightweights, have been signed to a ten-round bout before the Oakland Wheelmen's club on the night of October 23. The boxers will make 145 pounds at a weight. Anderson's terms for the match were accepted today by promoter Rohn, who is also manager for Azevedo. The latter meets Johnny Dunfee at Vernon, October 11.

Frank LaPorte, utility flier of the Washington American baseball club, was purchased yesterday by the Kansas City Club of the American Association. The purchase price is not stated.

The Turlock Merchants will go to Modesto today for their first game with the Reds. The Merchants have defeated the Husons club twice this season, and as Husons defeated the Reds last Sunday, the Turlock fans are expressing the utmost confidence that Turlock will bring home the bacon.

Frank Peterson, the famous swimmer, will be on the mound for the Merchants while Phil Mobley will do the twirling for Modesto.

Douglas, Sept. 27.—Snow, the earliest in years, was reported today at Casa, Sonora, Mexico, just south of the Arizona border. The temperature here dropped several degrees tonight.

NEW YORK CINCHES NATIONAL PENNANT BY BOSTON VICTORY

(Special to the Republican.)
BROOKLYN Sept. 27.—The Giants clinched the National League pennant and became the world series contenders this afternoon when the Phillies dropped their game to Boston. It is now impossible for Dooley's men even to tie the New Yorkers. McGraw's men must play nine more games and the Quakers a quarter century. If the Phillies take all of the games they have yet to play and the Giants lose all of their contests the standing will be:

Won.	Lost.	Pct.
New York	98	.56
Philadelphia	95	.57

Merkle and McInnis First Basemen for the World's Series

SEVENTY-FIVE WILL MAKE WORLD'S TOUR

Players Must Post \$300 to Guarantee Their Appearance On Sailing Day

CHICAGO, Sept. 27.—Seventy-five persons will go on the round-the-world tour, to be made next winter by the New York Nationals and the Chicago Americans.

President Leavitt of the local club stated that there will be fifty in his party when the steamer sails from Vancouver, November 13, and the Gotham delegation will number twenty-five.

Each tourist's fare will amount to at least \$1,500, but there will be extensive and expenses in addition.

Each player with the result to post \$300 to guarantee his appearance on the ship, but the money will be re-

OVERALL LOSES GAME TO DUCKS

Jimmy Johnston Features By Stealing Three More Bases

PORTLAND, Ore., Sept. 27.—Overall pitched for San Francisco today and a crowd of 4500 turned out to witness a Portland victory. For almost five innings Overall did well, then he lost the game, the final score being 4 to 2. Baker relieved him in the sixth and held the locals safely to the end. Jimmy Johnston featured the game by stealing three bases, making his season's record thus far 107. Score:

funded when the boat sails.

The Cubs and Pirates will not be represented on this jaunt, though several members of both clubs would like to make the trip. Owners Murphy and Drayfus are both opposed to any of their athletes accompanying the party and only such players as receive the consent of their managers may go.

GOVERNOR PARDONS BICYCLE THIEF

SACRAMENTO, Cal., Sept. 27.—Governor Johnson today pardoned Earl W. Johnston, who was sentenced to San Quentin from Kern county several years ago for stealing a bicycle. His mind became affected in prison and he was transferred to the Stockton In-

stitution, where he has been cured.

The life sentences of Frederick K. Peterson and Walter Westwood, who committed murder while young were commuted to twenty years today by Governor Johnson as a preliminary for their application for a parole. Two companions of theirs who participated in the murder were also sentenced to life imprisonment will have their sentences commuted to twenty years at a later date.

The first of the inter-class series of rugby games to be played by Tulare high school resulted in a tie score of 3 to 3 between the Juniors and the Seniors. The game was hard fought and marked by a fine show of class spirit. Most of the players in the team that will enter the C. C. A. E. series are in these two teams and showed up in fine form, giving promise to make an excellent record in the big series.

TULARE RUGGERS
PLAY 3 TO 3 CONTEST

Fresno Driver Wins Two Bakersfield Events

TOM M'KELVEY SENDS OVERLAND CAR TO VICTORY

Eddie Waterman Takes Second Place In 15 Mile Speed Contest

Two Pilots Narrowly Escape Death During the Day

(Special to the Republican.)
BAKERSFIELD, Sept. 27.—Tom McKelvey of Fresno, driving an Overland car, won both the 15-mile and the 50-mile automobile races this afternoon at the Kern County Fair, association with the Kern County Fair, in a 15-mile race, Waterman of Fresno, in a Buick, was second in the shorter event, and J. R. Crawford of Bakersfield in a Maxwell car, third. Waterman would have won second place in the 50-mile event, but for a broken crank shaft which occurred in the twenty-fifth lap, preventing him from finishing. Crawford came in second, and there was no third, as Grover Weather's of Visalia, withdrew in the fourth mile because his motor suffered a cracked cylinder. McKelvey's time in the 15 mile event was 13:54 and at Bakersfield tonight no faster time for a light car is known. This is believed to be a world's record. Waterman won the light car event at Corona, averaging 52 miles an hour, and it was this car which McKelvey defeated at an average speed of 55 miles an hour, proving the Bakersfield track one of the fastest in the world. The Overland's time for the 50 mile was 51:40, which was minutes faster than McKelvey needed to go to win. He was repeatedly signaled from the pit to slow up, and did not exert himself after Waterman withdrew.

TWO ACCIDENTS.
There were two accidents. The first occurred at 8 o'clock this morning when the Marion special, owned by A. H. Hovitz of Los Angeles, driven by Charles D. McWhinnie of the same place, broke a front axle approaching the grandstand, some 100 feet from the 15-foot embankment, and jumped 40 feet before landing. McWhinnie was dragged under the car, and Wallace Mercer, who was with him, received only a scratched arm. The Marion is reduced to scrap, and will be taken to the scrap yard. At 1:45 o'clock this afternoon, Clyde "Dusty" Rhodes, in a Studebaker, had a miraculous escape from death when his rear wheel broke while he was tearing off a practice mile in 53 seconds. The machine tore through the guard fence, uprooted five posts, and turned turtle in the mud. Rhodes was pulled out unhurt, and the car was pulled out of the mud. Rhodes began an examination of his car to see if it could be put in shape to run tomorrow. Only the steering wheel saved his life. It did not break and made a protecting arch between his body and the crushing weight of the car.

Ball Players Will Return to Winter Jobs Tomorrow

With the end of the California League playing schedule today, members on four winter jobs will scatter to the four winds. The majority of them will return to Los Angeles to take up their various occupations during the winter months. Manager George Wheeler will spend the winter on his ranch at Yucca, Ariz. and Alva Wheeler leaves tomorrow afternoon for Los Angeles, where they will witness the world's series. Following a week in the south, they will adjourn to the farm, where the manager will be kept busy for several months removing the rocks from his farm, according to Mrs. Wheeler.

Trainer Harry Stewart is an insurance man. Before breaking into the national pastime, Harry was a real live promoter in Los Angeles and returns tomorrow to take up his former occupation. Reports from the south are to the effect that Harry sells any and everything.

Frank (Pete) Mackery left last night for Los Angeles to become a member of the Angels for the rest of the season. He will return to his home in Knoxville, Tenn., at the close of the season and spend the winter with relatives.

Pat Harkins also left last night for Los Angeles, where he will remain until the close of the world's series. Pat will then board the train for his old home in Birmingham, Ala. for a good long visit with relatives. This is the second year of Pat's visit to the coast. He will return next year and report to Los Angeles.

Carl Sawyer, who is now in Los Angeles playing with the Angels, will return to the plumbing trade during the winter months.

Howard Fahy, our own shortstop, boards the train tomorrow afternoon for Philadelphia, where he will witness the world's series between the Giants and Athletics. Fahy picks the latter to win the pennant. Following the series, Fahy will return to his home in Boston.

Johnny Bender is a machinist and to this occupation he will look for his meat ticket during the winter. Bender is rated as one of the best lathe men of the Angel City.

Bunny Placer will return to his home in Los Angeles and spend the winter with relatives.

Johnny Berkel has a job lined up in Conning. He will also manage a winter ball team in the Old City. Berkel expects to draw considerable material from the valley. A winter league of all towns will soon be formed.

Duke Driscoll will enter the employ of the Southern Pacific in San Francisco. Driscoll leaves for Hayward where he will meet his wife. Duke is rated as one of the best rate clerks in the employ of the company.

Dutch Huffman has lined up a job in Santa Barbara, where he will play winter baseball.

Catcher Stevens is an electrical lineman and will serve several months in this capacity in and about Los Angeles. Irish Meusel will return to his old occupation of draftsman. Meusel has been connected with the Los Angeles company for several years.

FOOTBALL PLAY FOR 1913 OPENS WITH THIRTY GAMES

University of California Defeats Barbs In Fast Rugby Match

Princeton, Harvard and Yale Victorious In Eastern Games

BERKELEY, Cal., Sept. 27.—The University of California defeated the Barbican Club of San Francisco in a fast game of Rugby today, 21 to 0. California used a fourteen man team, while the Barbicans used fifteen men. The second varsity team defeated the Titans of Berkeley, 13 to 0. Both teams used fourteen men.

STANFORD 13, CALIFORNIA 3
STANFORD UNIVERSITY, Cal., Sept. 27.—The Stanford University won today from the University of California club rugby fifteen of San Francisco by a score of 13 to 3. All the scoring was done in the first half, the club men holding the Cardinals to a close second period. The Stanford freshmen defeated the College of the Pacific team, 11 to 3, by superior work in the back field.

PRINCETON 14, RUTGERS 3
PRINCETON, N. J., Sept. 27.—Princeton defeated Rutgers College in the opening football game of the season here today by the score of 14 to 3. The snowing of the New Brunswick team was very much to the weight of the men, but the Tigers offset this with a series of formations anticipated by the visitors.

HARVARD 30, MAINE 0
CAMBRIDGE, Mass., Sept. 27.—Harvard's varsity football eleven presented a powerful attack and a scrupulous defense today in the first game of the season, winning from the University of Maine, 34 to 0. A complete team of substitutes was called into play for the crimson in the closing period.

PENNSY 53, GETTYSBURG 0
PHILADELPHIA, Sept. 27.—Pennsylvania showed better form in her opening football game of the season today than the red and blue has displayed in her first game in several years, defeating Gettysburg College, 53 to 0. Pennsylvania defeated the same team last year, 35 to 0.

YALE 10, HOLY CROSS 0
NEW HAVEN, Conn., Sept. 27.—Yale defeated the Holy Cross eleven this afternoon, 10 to 0. The blue team scored in the first period on a field goal from the 20-yard line by Guernsey, and later scored twice in the second period. The red team, however, played a very good game, but was unable to score.

ITHACA, N. Y., Sept. 27.—Cornell and Ithaca battled fiercely today, but neither team being able to score. In the fourth period Cornell had the ball on Colgate's one-yard line, but lacked the necessary punch to shove it over.

At Providence, R. I.—Brown, 9; Colby, 10.
At Edison, Pa.—Lafayette, 7; Muhlenberg, 7.

At Brunswick, Me.—Bowdoin, 17; New Hampshire State, 0.
At Akron, O.—Case, 6; Butchell, 27.
At Delaware, Q.—Otterbein, 15; Westover, 7.

At Oberlin, O.—Oberlin, 45; Heidelberg, 0.
At Ithaca, N. Y.—Cornell, 0; Colgate, 0.
At Cincinnati, O.—University of Cincinnati, 46; Georgetown, 0.
At Des Moines, O.—Ames, 6; Grinnell, 0.

At Minneapolis, Minn.—Minnesota, 24; South Dakota, 0.
At Des Moines, Ia.—Central College, 0.
At Hanover, N. H.—Dartmouth, 13; Massachusetts Agric., 3.
At Lewisburg, Pa.—Bucknell, 24; Hillman Academy, 0.

At Carlisle, Pa.—Carlisle, 25; West Virginia Wesleyan, 0.
At Amherst, Mass.—Amherst, 10; Rhode Island State College, 0.
At Springfield, Mass.—Springfield Training School, 22; Worcester Polytechnic, 3.

At Syracuse, N. Y.—Syracuse, 4; Hobart, 0.
At Philadelphia, Pa.—Pennsylvania, 53; Gettysburg, 0.
At Williamstown, Mass.—Williams, 14; Rensselaer, 0.

At Pittsburgh—University of Pittsburgh, 57; Ohio Northern University, 5.
At St. Louis—Christian Brothers, 44; Christian College, 0.
At South Bethlehem, Pa.—Lehigh, 54; Albright, 0.
At Medford, Mass.—Tufts, 15; Bates, 7.

At Lincoln, Neb.—Omaha University, 6; Nebraska Wesleyan, 52.

BASEBALL RESULTS

National League
BROOKLYN, 4; NEW YORK, 0.
BROOKLYN, Sept. 27.—Brooklyn closed its home season today with a shut-out victory over New York by 4 to 0. A big crowd of enthusiasts saw the curtain down and further were entertained by a brass band.

Rucker pitched one of his star games and received excellent support. The Giants' only four scattering hits, with only one runner reaching base. Demaree was batted freely in the seven innings he pitched. Score: New York 0; Brooklyn 4.
Batteries—Demaree, Randall and Meyers; Meier, Rucker and Fischer.

BOSTON, 9; PHILLIES, 3
PHILADELPHIA, Sept. 27.—Boston won the final game today of its series here this season with Philadelphia by 9 to 3. The visitors knocked Chalmers off the rubber in five innings, while Sudduth was very effective except in one inning and struck out ten batters.

After the game Shortstop, Doolan of Philadelphia went into the bleachers after a spectator who, no claims called him insulting names. The man claims he was knocked down by Doolan. Doolan said he only punched the man. The score: Boston 9; Philadelphia 3.
Batteries—Rudolph and Hariden; Chalmers, Brennan, Imay, Meyer, Doolan, Killifer and Burns.

CHICAGO, 11; CINCY, 2
CINCINNATI, Sept. 27.—Cincinnati's pitchers were ineffective and Chicago won the first game of their final series of the season from the locals today, 11 to 2. Outside of their hitting the visitors ran the bases at will on Blackburn, and this aided them in piling up their runs. Score: Chicago 11; Cincinnati 2.
Batteries—Vaughn and Archer; Johnson, Robertson and Blackburn.

PITTSBURG, 4; ST. LOUIS, 3
ST. LOUIS, Sept. 27.—Pittsburgh started its final series of the season in St. Louis by defeating the locals 4 to 3. St. Louis had many opportunities to score the winning run, but poor judgment and lack of speed on the bases spoiled the home team's chances. The score: Pittsburgh 4; St. Louis 3.
Batteries—Duffy, O'Brien and Gibson; Hopper, Salles and Snyder.

American League
DETROIT TAKES TWO
DETROIT, Sept. 27.—Detroit captured a double header from Cleveland here today, the scores being 7 to 6 and 4 to 3. The first game was a slug-fest, in which both teams bunched hits to good advantage. The second game, closely fought, was called on account of darkness after the first half of the seventh inning.

The double defeat tumbled the Naps from second place and advanced Washington, which won from New York today to that position. Scores:
First game—R H E
Cleveland 6 12 2
Detroit 7 12 1
Batteries—Steen, James, Cullup and O'Neil; Dubuc, Constock and Gilson.

Second game—R H E
Cleveland 3 5 1
Detroit 4 6 3
Batteries—Cullup and Carich; Whelan and Gibson. (Called out of 7th, darkness).

SENIATORS, 8; NEW YORK, 3
NEW YORK, Sept. 27.—Washington made it three straight from New York today and went into second place, winning the last game of the season in New York with ease, the score being 8 to 3. Caldwell was his hard and Pien relieved him in the seventh. Groom pitched brilliantly for the visitors for the seven innings he worked. Lovegan Atlanta recruit, relieved him. Score: Washington 8; New York 3.
Batteries—Groom, Love and Henry; Caldwell, Pien, Smith and Sweeney.

CHICAGO, 6; ST. LOUIS, 2
CHICAGO, Sept. 27.—St. Louis was helpless before the pitching of Jimmy Scott today, and lost their last game of the season here, 2 to 6, to Chicago. Scott struck out 14 of his opponents, one fewer than the season's record held by him. Bidwell was the only visitor who did not strike out. Score: Chicago 6; St. Louis 2.
Batteries—Baumgardner, Weigman and Agnew; Scott and Easterly.

BOSTON, 5; ATHLETICS, 3
BOSTON, Sept. 27.—Collins' pitching was a stumbling block to Philadelphia, the new American league champions this afternoon. Boston won the final game of the season on the home grounds 5 to 3. The world's champions finished their season with a timely interval, while errors by Baker and Orr accounted for three of the home team's runs. Score: R H E
Philadelphia 3 6 2
Boston 5 11 3
Batteries—Houck and Lamp; Collins and Snell.

JAM BOTTLE ROUTS.
Mrs. Jacob Feeley, of Clinton, N. J., saved two young girls and put to rout five men with one weapon other than a bottle of preserves.

The girls, both of whom are members of respected families of Clinton, were returning from a visit in Lakeview, as they walked along Wallingford avenue toward their home. Mrs. Feeley, returning from a sick friend's bedside, was a block behind them.

Suddenly she heard screams and saw five men leap from the shrubbery near the Maybury estate. The men seized the girls and, with the latter struggling desperately, dragged them from the walk.

"I'm coming! I'm coming! Fight them! Fight them!" cried Mrs. Feeley, running as fast as she could and unstrapping a bottle of preserves as she ran.

With the neck of the bottle clenched in her hand, she sprang through the shrubbery.

Captain of Pennsy Team Regular Human Catapult

A regular human catapult is this husky young captain of the football team of the University of Pennsylvania. He's Youngie in name, young in years and young in experience as a football captain; but at Pennsy they have a lot of confidence in him, and believe he'll whip his team into winning form for the big games.

YELLOW PINE MINING DISTRICT IN NEVADA

A recent investigation of the Yellow Pine mining district in Nevada, by J. M. Hill, has led to the publication by the United States Geological Survey of a short report descriptive of this new camp, the largest zinc mining camp in the State. The first mining in this district was done by the Mormons about 1860, when lead ores were mined and smelted, the later cast into bullets for use in the Mormon wars against the Indians or the United States troops. The discovery of this mine resulted in the opening of several lead-silver deposits and at least one gold mine, the Keston, which is reported to have produced \$1,000,000.

The Yellow Pine district itself, which was discovered in 1906, produces principally lead-zinc ores and employs about 300 miners, the total value of the output of gold, silver, copper, lead and zinc since 1906 having been \$1,234,550.

Hill's report describes the geology of the region and goes into some detail regarding thirty or more of the operating mines of the district.

FEW PEOPLE GROW MENTALLY AFTER THE AGE OF 35
In a remarkable contribution to the October "American Magazine," Arnold L. Gesell, says:

"One fact which seems to distinguish superior from ordinary families is that while members of the latter seem almost to stop growing at about the age of 35, the lives of the former expand and expand even into the vanishing years of old age. A visitor returns to the village after an absence of ten years. He is shocked at the relative standstill of a large part of the population.

This lack of development after the age of 35 or 40 represents primarily an innate deficiency in the prefrontal cortex of the nervous system. It is a psychological fact undoubtedly of eugenic import. Superior individuals exhibit a lengthening of the period of plasticity and growth. The personalities are correspondingly the richer from experience."

NO BETTER FOR RASTUS
The conversation the other night turned to things that have to be endured, which recalled to Senator Henry P. Lippitt of Rhode Island an incident that happened in Georgia.

One day, according to the senator, a colored man named Rastus went to the office of a doctor in a Georgia town and asked to be patched up. Rastus needed it. His face was full of dents of various sizes, his nose was shifted and part of his complexion was lapping over on the wrong side.

"My! My!" exclaimed the doctor, as he got busy with the adhesive plaster, and sewing apparatus. "You certainly got it good and plenty this time."

"Tasah," was the last response of Rastus. "If don't risk I dodged anything dat wah chucked."

COBB LEADS LEAGUE IN HITTING BY WIDE MARGIN

Jake Daubert Holds Honors for Batting In National Organization

Milan of Washington Takes Lead Over American Base Stealers

CHICAGO, Sept. 27.—Twelve points to the good, Ty Cobb entered the home stretch in the race for the batting championship of the American league. His chief rival, Joe Jackson, is hitting at the rate of .375 to Cobb's .385. This speaker apparently is out of it after a rally that threatened at one time to put him on top. He has fallen behind Hendrickson of Boston, batting .364 to the latter's average of .358 established in twenty-six games. Other American leaguers batting .300 or better are: Collins, Philadelphia, .337; Gilboody, New York, .337; Lajoie, Cleveland, .336; McInnes, Philadelphia, .324; Gaudin, Washington, .323; D. Murphy, Philadelphia, .316; Lelievre, Cleveland, .314; Baughman, Detroit, .313; Crawford, Detroit, .312; Story, St. Louis, .303; Williams, Washington, .299.

DAUBERT LEADING
Topped only by Earl Yinsling, the Brooklyn pitcher and plunger, Jake Daubert of the same club is practically the leader of the National league, with an average of .359, five points behind the mark set by Yinsling in thirty-eight games. Ham Wyatt, Pittsburgh club hitter, is next with .356, and Cravath, Philadelphia, .351, and Cravath, Boston, .306; Zimmerman, Chicago, .304; Mauser, St. Louis, .304; Thicker, Cincinnati, .304; Wagner, Pittsburgh, .303; Magee, Philadelphia, .301; Wheat, Brooklyn, .300.

Cravath is still leading home-run hitters with eight, Luders of Philadelphia being next with fourteen. Baker is ahead in the American with twelve and Veach of Detroit next with nine. Bodie, Chicago, and Crawford, are tied for third with eight each.

MILAN LEADS THIEVES
Milan, Washington, is ahead among the American league base-stealers with sixty-six, and Moeller, Washington, next with fifty-eight. Cy Young, Pittsburgh, is best in the National league with fifty-four, and Myers, Boston, next with forty-nine.

While Philadelphia leads in batting and fielding, as well as in the race for the pennant in the American league, New York leads in the National in chase for the flag. St. Louis being on top in fielding and Brooklyn in batting.

The late rally of the Chicago Nationals placed three of their pitchers among the first five slayers in the National, who are:

Player	W.	L.	Pct.
Demaree, New York	15	3	.833
Vaughn, Chicago	4	1	.800
Humphries, Chicago	14	4	.773
Alexander, Phila.	11	7	.750
Pierce, Chicago	12	4	.750

Johnson is leading in the American. The first five are:

Player	W.	L.	Pct.
Johnson, Washington	34	7	.829
Houck, Philadelphia	13	4	.765
Walsh, Chicago	8	3	.727
Palkenberg, Cleveland	22	5	.710
Wood, Boston	12	5	.716

got it good and plenty this time."

"Tasah," was the last response of Rastus. "If don't risk I dodged anything dat wah chucked."

"This ought to be a lesson to you," admonished the doctor. "In the future you should know enough to keep away from the people who do this sort of thing."

"I knut! be done, dootah! It knut! be done!" answered the eighth Rastus. "I knut! got no money to git no doctor."—Philadelphia Telegraph.

I STREET OWNERS PETITION FOR ELECTROLIERS

Want to Light Seven Blocks Between Calaveras and Kern Streets

Cost Estimated At About \$1.56 Per Front Foot; \$1250 Per Block

In line with the "City Beautiful" idea, property owners along I street, between Kern and Calaveras streets, have just started a movement to secure electroliers in these seven blocks. A petition is now being circulated, addressed to the board of trustees, and it already has the signatures of owners of more than 1500 feet frontage on the street, including some of the largest individual owners.

The plan is to install twelve electroliers having five lights. Six electroliers having five lights. Six electroliers will be placed on each side of the street. The cost of the electroliers, delivered, in Fresno, will be \$84.30 apiece, and it is estimated that the cost of installation will be \$20 for each electrolier, thus making a total cost of \$104.30 each. The cost per block will be about \$1250, or \$1.56 per front foot.

Among those who have already attached their signatures to the petition are W. Parker Lyon, Kutner-Goldstein Co., Alfred Kutner and Adolph Kutner Co., Farmers' National Bank, Stephens & Bean, D. S. Ewing, O. L. Evers, W. A. Bean, Dorsey-Parker Co., O. M. Thompson, Rudin & Camp, Macfield and Lisenby, by A. V. Lisenby, the J. M. Crawford & Co., W. Swift, B. F. Shepherd, Jr., Ben Epstein, J. L. Doyle and C. F. Doyle and Mrs. S. Stumund.

The following is a copy of the petition that is being circulated:

To the Honorable Board of Trustees of the City of Fresno:

Whereas, the undersigned, owning property on I street in the City of Fresno, between Kern street and Calaveras streets, respectfully represent to this honorable board that in our opinion the public interest and convenience requires that the City of Fresno install a system of street lighting between said points on said I street and to do so under and by virtue of the act of legislature of the State of California, entitled "An act to provide for the lighting of public streets, lanes, alleys, courts and places in municipalities," and for the assessment of the costs and expenses thereof upon the property benefited thereby; that such lighting system consist of five-light electroliers, and that they be stationed on each side of said street at an equal distance apart and six to each block on each side thereof; that this board of trustees also under said act take measures to acquire such electric poles and appliances now upon said street and that it proceed under and in accordance with the foregoing act to prepare plans and specifications and pass necessary resolutions therefor.

Following the announcement Friday that all charges pending against Iwata and wife for alleged violation of the immigration laws had been dropped in Washington and the Iwatas would not be deported, the Republican last night received a special dispatch from Washington in which Commissioner of Immigration C. M. Egan stated that he would like nothing better than to deport Iwata, whom he termed as the "King-pin of the Japanese white-slavery," but that the testimony submitted to him was not sufficient to sustain any particular charge as contained in the warrant of arrest, and that the Japanese should be prosecuted by the state officials, and not by the federal officers.

Caminetti's explanation is made to show why he deported every Japanese girl arrested in one of Iwata's cribs, but did not deport the owner of the place and his wife, who admitted that she had been an inmate of the cribs for immoral purposes, but previous to the amendment of the immigration statute under which the wealthy Japanese and his wife were arrested.

According to the statement given out in Washington yesterday by Caminetti, the Department of Labor is thoroughly convinced that they are guilty under the state law, but cannot be prosecuted and deported by the government.

"I would spend almost any amount of money," said Caminetti, according to the dispatch, "to convict these people, but it would be necessary to go to Japan and secure evidence concerning the woman, whom we feel certain was a Geisha girl and an immoral person before she came to this country, and it seems hardly practical to do so. However, it is certain that both the man and the woman are liable under the state laws. We went into this business in Fresno, and should have liked to get Iwata because he is the 'King-pin' of this whole business."

In warrants sworn out August 14, Iwata, reputed to be the wealthiest Japanese in Fresno, was charged by immigration officers here with owning houses which he rented for immoral purposes; that he shared in the profits and that his wife was at times an inmate of one of his houses. It was further alleged that Iwata was in the United States in violation of section 3 of the immigration act of 1907 as amended in 1910, and that he imported the woman, Nomi Iwata, alleged to be his wife, for immoral purposes, and that further he received and derived benefit from earnings of other Japanese women in Fresno. A similar charge was made against Nomi Iwata.

For more than a day the immigration officers held an examination at the county jail and statements of police officers, familiar with Iwata since his arrival in Fresno and also the arrival of the Japanese woman in question, were taken. Those statements in Washington were not sufficient to constitute a case against the white slaver according to Caminetti.

Attorney Lewis H. Smith went to Washington in the interest of his Japanese client. He took letters from people here stating Iwata a "moral character." The Fresno attorney made the case in person with the immigration inspector, who comes from California.

NORMAL Y. W. C. A. TO INAUGURATE UNIQUE WAR OF THE SEASON

Membership Campaign to Begin Tomorrow Takes a Most Novel Form

A novel membership campaign—the war of the seasons—will be inaugurated by the Normal Young Women's Christian Association Monday, continuing for one week.

This year 1913, presented by Miss Fay Goddard, general of the forces, has chosen four seasons as captains—Spring, Kathryn Crooks; Summer, Irene Crawford; Autumn, Lena De Mott; and Winter, Ditha McIntyre. Each month will name four lieutenants to aid in the work, each lieutenant being one of the weeks to which every month is entitled. The weeks have yet to be captured and when secured will be put to work in getting days, or other members for the Normal Y. W. C. A. girls expect to secure fully sixty new members for their association.

A handsome poster has been prepared setting forth the seasons, months, weeks and days with girls' heads as decorations and will be used to score the gains of the captain as the contest continues. For just one week, a school week, will this campaign continue, beginning tomorrow and closing Friday.

There is much rivalry between the seasons as the winning season with its months, weeks and days will be given the guests of honor at a party to be given by the losers. The social evening will probably be held at the Young Women's Christian Association building. The girls are all in readiness for this unique campaign, and it promises to be a winner. Flowers peculiar to the various seasons will be the badges to distinguish the contestants.

CAMINETTI CLAIMS IWATA EVIDENCE INSUFFICIENT

Immigration Commissioner Holds "White Slaver" Guilty of State Law

Would Like to Deport "King Pin" But He Is Too Smart a Japanese

Following the announcement Friday that all charges pending against Iwata and wife for alleged violation of the immigration laws had been dropped in Washington and the Iwatas would not be deported, the Republican last night received a special dispatch from Washington in which Commissioner of Immigration C. M. Egan stated that he would like nothing better than to deport Iwata, whom he termed as the "King-pin of the Japanese white-slavery," but that the testimony submitted to him was not sufficient to sustain any particular charge as contained in the warrant of arrest, and that the Japanese should be prosecuted by the state officials, and not by the federal officers.

Caminetti's explanation is made to show why he deported every Japanese girl arrested in one of Iwata's cribs, but did not deport the owner of the place and his wife, who admitted that she had been an inmate of the cribs for immoral purposes, but previous to the amendment of the immigration statute under which the wealthy Japanese and his wife were arrested.

According to the statement given out in Washington yesterday by Caminetti, the Department of Labor is thoroughly convinced that they are guilty under the state law, but cannot be prosecuted and deported by the government.

"I would spend almost any amount of money," said Caminetti, according to the dispatch, "to convict these people, but it would be necessary to go to Japan and secure evidence concerning the woman, whom we feel certain was a Geisha girl and an immoral person before she came to this country, and it seems hardly practical to do so. However, it is certain that both the man and the woman are liable under the state laws. We went into this business in Fresno, and should have liked to get Iwata because he is the 'King-pin' of this whole business."

In warrants sworn out August 14, Iwata, reputed to be the wealthiest Japanese in Fresno, was charged by immigration officers here with owning houses which he rented for immoral purposes; that he shared in the profits and that his wife was at times an inmate of one of his houses. It was further alleged that Iwata was in the United States in violation of section 3 of the immigration act of 1907 as amended in 1910, and that he imported the woman, Nomi Iwata, alleged to be his wife, for immoral purposes, and that further he received and derived benefit from earnings of other Japanese women in Fresno. A similar charge was made against Nomi Iwata.

For more than a day the immigration officers held an examination at the county jail and statements of police officers, familiar with Iwata since his arrival in Fresno and also the arrival of the Japanese woman in question, were taken. Those statements in Washington were not sufficient to constitute a case against the white slaver according to Caminetti.

SUNDAY SCHOOLS TO HOLD BIG RALLY HERE TODAY

State Workers Present for Sessions; To Speak in Churches

Bible Workers' Conference At Presbyterian Church This Afternoon

Pulpits of the majority of Protestant churches in Fresno will be filled at one or more periods today by state Bible school workers and an important conference, to be attended by Sunday school workers from city and county, will be held at the First Presbyterian church this afternoon as part of the Rally Day observances.

At a meeting of the state church representatives and local workers at the Y. M. C. A. last evening the program for the conference this afternoon was determined upon and the assignment of speakers in the churches finally completed.

Following the general meeting last night, President P. N. Miner of the Fresno District Sunday School Association appointed a committee composed of Mrs. G. W. Dowd, Doris W. Conley and Rev. Shirley A. Shaw to nominate a president and secretary for the association. The report will be made within two weeks.

After much discussion, the assignments were determined upon finally for Dr. C. R. Fisher of Berkeley, California international secretary of Sunday school work; Dr. Miles B. Fisher of Berkeley, California secretary of the Berkeley church; Dr. W. C. Sherman of Berkeley, California secretary of the Berkeley church; Dr. W. C. Sherman of Berkeley, California secretary of the Berkeley church; Dr. W. C. Sherman of Berkeley, California secretary of the Berkeley church.

Pulpits will be filled today as follows: Dr. George C. Butterfield—10 a. m. First Baptist Sunday school; 11 a. m. First Christian church; 4 p. m. Y. M. C. A. park service; 8 p. m. First Methodist church.

Dr. M. L. Thomas—11 a. m. Powl Memorial Baptist church; 7:30 p. m. First Baptist church.

Dr. C. R. Fisher—10 a. m. North Side Christian church Sunday school; 11 a. m. First Congregational church; 7:30 p. m. Clearer.

Rev. Elmer E. Fox—11 a. m. Arlington Heights; 7:30 p. m. North Side Christian church.

After the conference is held from 2 until 5 o'clock in the afternoon at the First Presbyterian church, P. N. Miner, conference president, will preside. The program will be the following:

3:00 Prayers—Rev. A. F. Fowler, Fresno Devotional.

W. C. Sherman, Berkeley

3:15 Home Visitation

3:25 The Complete Chain

3:45 Teacher Training

4:00 The Teacher's Opportunity

—Come in all colors, nickel mounted and contain mirror, card case and coin case; dainty, new affairs for the wee girls. Price 50c each.
—We are also showing a new line of German silver bags, in all sizes and prices.

An Invitation
—You are invited to open a charge account at this big store, beginning this month. See Credit Manager at our main office, Mariposa street store.

New Bags
—Nine of those quaint little saddle bags made of black silk and lined with pure white moire silk. They have the wide panther handles with pretty silver clasps. Price \$1.50 and \$2.00 each.
—Lots of new leather purses, too! wonderful genuine ply seal and Morocco leathers, new shapes, \$2.50 up to \$10.50 each.

Kutner's--The Valley's Greatest Stores For Over A Third Of A Century

---The foremost money saving establishment in three counties, maintaining branch houses in Hanford, Selma and Madera, to supply our large and growing clientele little wonder we are able to underbuy and consequently undersell all others all the time.

Kutner's Month-End Sale of Suits Rolls Briskly Along
—It's a rare suit that gives style and hard wear, but there are many such at Kutner's.
—Our \$35.00 suits at \$25.00 are exceptionally beautiful models. They are in the newest cutaway model, medium and long, handsomely tailored or with trimmings of velvet or buttons cleverly applied.
—The materials are as diversified as the styles. Smooth and rough weaves being equally represented. All in the most popular autumn colors. We also have a handsome line of foulard suits at \$15.00 and \$20.00.

These Domestics Underpriced
—Come At a Wanted Time
—Ripplettes at 15c. A rough dry wash fabric of real merit. It's popularity grows from season to season. Plain white or stripes.
—Kimono Flannels, 12 1/2c. You will want two or three of these pretty patterns. There's lots of comfort in them during cold days.
—Fleeced Cashmieres, 20c. A pretty twilled cotton flannel, for cozy home wrappers. The patterns are unusually pretty and include many new borders.

Lace Waists
—Are the last word in smartness this season and Kutner's are showing the daintiest little styles imaginable at \$3.95, \$4.95 and \$5.95.
—They are made of sheer shadow lace, with pretty ruffled necks and a great many have chiffon flowers caught in at the neck or front and inside threadings of colored ribbons.

The Velvets and Silks
—And Kutner's have a full-and-complete showing in colors and kinds. Here are a few of the wanted kinds—
—SILK PLUSH—Fashionable trimmings for Fall millinery and cuff and collar sets; black, taupe, golden brown, \$2.50.
—BROCADED VELVETEEN—Every good color in a splendid velvet; small, well covered brocades; \$1.25 regularly, Monday 90c.

Flannelette
—Wear for Girls
—High neck and long sleeve; comfortable and warm sleeping garment for girls from 2 to 6 years old. Priced at 25c each.
—Flannelette Gowns with warm double front and back yoke and neat roll collar, for girls from 4 to 14 years old, 59c.
—Beautiful Pajamas of warm fleecy flannelette, for girls from 4 to 14 years old, 59c.
—Pajamas of fine double fleeced flannelette, trimmed with silk frogs and fancy tape, 79c.

Checks
—Black and White Waffle Check Dress Goods. The smartest cloth of the season for separate skirts, 50 inches wide, \$1.25.

These Chilly Nights
—Remind You of Blankets
—And Blanket Needs Again; and Kutner's have made extra preparations for it.
—Kutner's \$5.00 special—Here's a wonderful blanket value. They sell regularly at \$6.00, and they are worth it, too. Soft, long staple wool, full sizes; and your choice of colors, white, gray and a dozen pretty plaid combinations. Special \$5.00 pair. The biggest blanket value in Fresno.

Flannelette Gowns \$1.00
—Women's night gowns, made of white, heavy flannelette with double yoke and attractive flat collar, edged with neat scallop of fancy twist. Price \$1.00.

Very New Neckwear
—Some of the many different styles of new neckwear to be found in our center aisle.
—Millet and Flesch effects of nets and laces; some finished with a touch of color, \$1.00 to \$3.50 each.
—Soft crope or not fleecus, with frilled edges, 50c to \$2.00 each.
—Eton guimpes and fancy yokes.
—Fancy silk plaid vests.
—Plaitings by the yard of nets.
—Point de Esprit lace and chiffons in all colors.

New Filmy Shadow Lace
—SHADOW LACE—NOW MUCH SOUGHT-AFTER.
—Kutner's have all kinds, silk, cotton, and silk run, in white, cream, ecru and black, in edges, bands and flouncings.
—2 1/2 to 45 inches wide, shadow lace allover, in 18 to 36 inch widths. Many novelties, including net top laces, in craguel mesh. Many of the patterns are works of art, priced from 25c to \$7.50 a yard.

"Sorosis" Shoes For Fall
—The newest of the new models in becoming, comfortable styles.
—For the woman seeking a lovely English tan shoe, there's a lovely English last, built of the Russian calf, in the popular button effect. Price \$1.50.
—Or at the same price you can have a choice in patent calf or smart black suede button shoes, made on new Autumn last and finished with mat kid or chamois cloth uppers.
—Then we have a line of richly colored suede models at \$3.00 and \$6.00.

Low Priced Sweaters
—\$1.95 for misses' sweater coats; heavy chain knit wool, high roll collar, 2 nice pockets, sizes 28 to 34. Women's sizes, same style, at \$2.45.
—\$3.45 woman's ruff neck sweaters, with adjustable collar, 2 knit-in pockets. Misses' sizes in the same style of sweater, \$2.95.
—\$5.00 woman's shaker knit sweater coats, all wool, closely knit chain stitch pattern, large roll collar. Comes in oxford or maroon.

Kutner's
The House That Saves You Money
1119-1123-I St. Fresno
1801-1819-Mariposa Street

Indestructo Half Hose
—Try six pairs of these Indestructo half hose for men. We guarantee they will give you perfect service and will last as long as you think they should. Per box of six, \$1.50.

Casserole \$1.65
—Round or oblong shape.
—Made with Nickel plated frame, exactly as shown in picture above. The insert for Baking is made of brown and white genuine Guernsey ware.
—A wonderful value at \$2.25 and a genuine bargain \$1.65

MAJESTIC THEATER MAKES INITIAL OPENING WITH BIG SHOW

FASCINATING PHOTOPLAY IS BIG FEATURE

BEVY OF THE 'PRETTY CHORUS GIRLS' OF THE GAIETY MUSICAL—COMING TO MAJESTIC THEATER

The Majestic Theater on F street, between Kern and Tulare, opened last night to a large and appreciative audience. The Gaiety Musical Comedy Company, late of San Francisco and Seattle, present "A Trip to Paris" in a most fascinating and entertaining manner, introducing Miss Carmella Meeks as the leading lady and ably assisted by a chorus that is far above the average seen in musical comedy.

The plot in the play is most interesting and brings into play a great deal of comedy which is furnished by Fred Weiss, who is most original in his character sketches and the puns that he pulls off to the merriment of the great crowds which greeted him on opening night.

The chorus is composed of favorites in musical comedies such as Emma Savage, Dolly Burke, Madge Gilmore, Ruth La Grande and others, supplemented by the strongest cast comprising such notable actors as John Lord, Teddy O'Dare and Frank Decker, assisting as musical director.

The play, which is strictly musical comedy, and one continuous round of pleasures is further strengthened by the introduction of the very latest "bits," such as "Smile, Smile, Smile," sung by Miss Meeks, and "When You're in Town," also by Miss Meeks and chorus.

Those who attended opening night were unanimous in their opinion that the Majestic will prove to be a big drawing card for theatergoers this fall and winter.

PLAZA HAS FINEST BILL OF SEASON

PRINCESS THEATER HAS EXCEPTIONAL BILL FOR COMING WEEK

Big Crowds Greet High Class Vaudeville Shows Nightly

A notable feature will appear at the Princess theater this afternoon and for the first half of the week. Crimmins and Gore, who are considered among the foremost in vaudeville, "novelty" will be seen in "What Are the Wild Waves Saying," an original, humorous and racy oddity. They are a most amusing pair of comedians. Most young women would deem it a misfortune to be as tall, but not Miss Gore, who takes advantage of the situation and gains money by her exaggerated height. She is an American girl, and a very clever actress in her line. She has a sweet face, a sunny smile, blue eyes, and a naive all her own. Miss Gore presents a distinct type of a New York tough girl, a character that is found only on the East Side at the Metropolis. By "tough," it does not mean that she is a "bad" girl—this product of the Bowery slums—far from it. On the contrary, she is noted for her kindly but rough nature and the assumption of toughness is simply an attribute of her kind, and the slang which to the rest of the world is unintelligible is part of her vocabulary. Crimmins and Gore's act is filled with original comedy surprises, and must be seen to be fully appreciated.

Her several successful seasons with John Drew have fitted Jolly, Funny, Funny Rice for such a triumphant vaudeville tour as she is now enjoying. She has been especially engaged to begin her tour at the Princess for three days beginning this afternoon her original conception, "The Miniature Musical." Funny Rice looks funny, and she is funny and positively is funny, and those who witness her unique act here will vote her the queen of jesters.

Petrino & Co. are booked for a novelty act that is certain to be one of the best seen in this city. Press, public and managers here have unanimously voted them poets of comedy. Bowen & Bowen, recently from Hammerstein's theater in New York, will present a comedy musical offering that is certain to please Fresno's critical audience.

The bill will be completed by Sid Seaver, eccentric musical entertainer and coin manipulator who is without doubt the equally if not peer of any high class pictures will also be shown.

HIS INHERITANCE
There are carriages and then again there are reasons. It will depend on the conditions in your own home whether you consider the following the one or the other.

A man was discussing the mother-in-law question the other day. "I am glad to note," he remarked, "that humorists and vaudeville comedians are no longer using the mother-in-law as a stock subject for jokes. It was always in bad taste, and as a rule entirely unentertaining. The average mother-in-law is a great little institution. A mother-in-law is or ought to be a grandmother."

"You do?" exclaimed a member of the party positively.
"You do?" Will you tell me what you have against her?"
"She's too darned much like her daughter."—Cleveland Plain Dealer.

(Mrs.) Dr. C. M. Williams, Chiropractor, —Advertisement.

Lynne & Bonnie Hazzard, Unique comedy team at Plaza tonight

The Plaza opens an entirely new show tonight, one in which every act is of the high class that the Plaza is known for. There are a couple of feature acts that are unique.

Lynne and Bonnie Hazzard are a pair of novelty comedians with a lot of original stuff that is exceptionally good. They are a big feature and have been billed as one of the most entertaining pair of performers that has ever been booked over this circuit. The novelty effects that they secure and the high class comedy that the produce has won for them an enviable place. They have the sort of fun that is so well liked that they usually have to respond to encores and recalls almost without number. They have a little sketch entitled "The Musician and the Girl," which is a real fun. The slanders are reported to have an act that is a "knock-out."

The Tyrells are coming with the new show in a whirlwind dancing act, that is one of the very best that is produced in vaudeville. It is an act in which the most sensational dancing is featured. The Tyrells are billed as one of the best acts on the new bill which means that they are recognized as being among the leaders in their line.

An act that will appeal to all who like comedy, yet none the less to those who like real harmony, is the Chicago Newsboy Trio, three young men whose mellow voices have won them a high place in the esteem of vaudeville audiences. Their harmony singing is the main thing, for all of the latest songs are rendered in a manner that meets with the entire approval of all who have heard them.

The best trained dog in America, if not in the entire world is also going to be a feature of the new bill. He is coming with Earl, who is a ring gymnast of no small ability. This strangely assorted pair are always big entertainers. The entire approval of all who have heard them.

and the wonderful intelligence that he displays make him one of the most interesting features of the entire show. He has aroused the admiration of people all over the United States.

The Morales Trio in sensational and novelty athletics with a good measure of comedy attached also have an act that is unusually good, rounding out the bill in a thoroughly satisfactory manner. It is one of the best bills that has ever been sent to Fresno and there is capacity here for the time that these people are here. The pictures that go with the new show are also exceptionally good.

THE SAME OLD BREAK
Congressman Emmet Wilson of Florida told one the other day in denouncing how innocently one may make a mighty bad break:

Some time ago the junior member of a prominent firm was married and the bride, in a sudden contest, "My dear, I hardly feel like a stranger in fact, I consider myself quite well acquainted."

"Oh, yes, Mr. Smith," happily replied the bride, "I suppose Harry has spoken to you about me quite often."

"He has," indeed, returned the senior partner, "and what is more, time and time again he has read me certain pretty extracts from the letters of his dear little Marie."

S. B. BALM
is highly recommended for all skin eruptions. Price 25c at Smith Bros. Drug Store. —Advertisement.

Scene from "Broken Threads United" at Fresno Photo Theater

Hiram Daniels lives in the country with his daughter, Chloe, a winsome little lass who is very fond of her dad. The rather a kindly simple-hearted old man, is called away to the city on business and he leaves his daughter at home.

Daniels, while walking down one of the city's fashionable streets sees a woman drop her purse as she is about to enter her automobile. He gallantly rescues it from the sidewalk and returns it to her. She smiles graciously, thanks him as she hands him her card. Daniels, struck with her beauty, gives her his card in return.

Ann Taylor arriving at her apartment tells her companions of the incident which amuses them very much. She also declares that he is an easy mark and if they will help her she will work him for all he is worth. At Ann's invitation Daniels calls on her several times, he becomes infatuated with her and proposes marriage, and secures a license. One of Ann's friends, disguised as a minister, goes through the marriage ceremony. Daniels brings his supposed wife to his home in the country. His daughter Chloe is broken-hearted and after denouncing the woman she leaves home with the determination of earning her own living in the city. When Daniels discovers that his daughter has gone, he goes for consolation to Jim Halliday, Chloe's sweetheart. Daniels and Jim leave in search of Chloe.

On arriving in the city Daniels secures the services of a detective and while showing him a picture of his daughter also shows him one of his wife. The detective recognizes her as one of a gang of vipers. Ann writes her friends that "the old fool has gone to the city and if anything happens to him I could let you have that \$5000. Her tools waylay the old man and entice him into a cafe where they "try" to poison him. The detective has followed him and reaches the cafe just in time to rescue him. The two crooks are arrested. In the meantime Jim has found Chloe and takes her to the hotel where she is overjoyed to see her father. The three, along with the detective take the

train home where they discover Ann and her real husband who have come to warn her to be ready to make their escape. They are taken to police headquarters. Father and daughter are together again. "Broken Threads United."

THE CHRISTIAN.
The Fresno Photo Theater announces a dramatic masterpiece for Sunday, September 29th, when the Kalem production, "The Christian" will be seen. Miss Alice Joyce and Mr. Tom Moore, the famous Kalem stars, portray the leading role in a strong story which tells of a young man's ambition and the help he is able to bring to a girl in her sorrow through a lesson he has learned from his mother. The mother's dying request was for the son "to be just and righteous; to lift up the fallen and help the weak." He brings happiness to the life of a young woman who, through adversity, is about to despair and agrees to become his brother. The young people find employment at a farm house and the man soon earns that a deeper feeling than friendship has entered his heart. But a sorrow comes into his own life when he discovers that he must abandon the hope of making her his wife and through a sacrifice he opens the way for her to be united with the man who first won her heart. When the Grim Reaper overtakes him, he leaves the comforting words, "Well-bone Thou Good and Faithful Servant."

SLANDERS TOQUE.
By the Edison Co., when the gaspings see poverty-stricken Sue returning from the city afflicted in the latest style the longed-for fairy crash. The town sport, not knowing that Sue's fiery comes as the result of her saving a baby's life, takes anew and sinister interest in her.

TWO GREAT COMEDIES.
This great program is concluded with two Biograph comedies, "The Lady in Black" and "Baby Indisposed." These two pictures will certainly make you forget your troubles.

SPECIAL NOTICE—HELEN GARDNER, COMING IN "THE WIFE OF CAIN." WATCH FOR THE DATE.

SOME DANGER OF LEPROSY SPREADING

The presence of leprosy here and there in the United States is held by some, to be of little consequence in comparison with the occurrence of other diseases, such as tuberculosis and typhoid fever. Nevertheless, it is a menace to the public health and deserves special consideration because of the possibility of the spread of the infection, the hopeless nature of the disease and the aversion of the public to persons afflicted. While the spread of leprosy in recent years has not been marked, it must be remembered that cases of the disease have developed since this time in American-born persons, some of whom have not been outside of the United States. Of 27 lepers reported in 1901, 145 were American-born, according to Surgeon-General Blue of the United States Public Service, who discusses this question in a recent issue of "The Journal of the American Medical Association." By reason of our interest in the Philippine Islands and other possessions, there is danger of the introduction of leprosy by returning American citizens. Large numbers of soldiers, sailors and civil employees spend prolonged periods abroad, particularly in the Philippine Islands, where there is a decided danger of contracting the infection. The disease may not manifest itself on these persons for years after their return. These facts taken into connection with our knowledge of the rise and fall of epidemics in the past suggest the possibility of a greater prevalence of the disease, fifty or one hundred years hence, unless appropriate preventative measures are instituted. Leprosy should not be regarded as of no importance, neither should it be an object of unreasonable aversion on the part of the public. Education is necessary to overcome this feeling. Public health officials and physicians should systematically teach the people the nature of the disease, the extent of its contractibility, and above all, the humane treatment that should be accorded lepers. Every case of leprosy should be promptly reported to the proper health authority and wherever necessary, by laws should be so amended and penalties provided for non-observance. All lepers should be isolated to prevent the spread of the disease, but this should be no done so as to promote the comfort and happiness of those so afflicted. On account of the difficulty of providing these conditions in towns, counties and states where single cases of leprosy occur, and because of consequent inadequate methods of control, there should be established under the United States

Public Health Service, a national leper home for the care and treatment of such cases as may be turned over by state and local health authorities for the purpose.

DON'T LOOK TOO HARD AT A POET

In the October "American Magazine," David Grayson, in the course of a sketch entitled "The Friendly Road," makes the following comment:
"The poet sings his song and goes his way. If we sought him out, how might we be disappointed. We might find him shaving, or eating sausage, or drinking a bottle of beer. We might find him shaggy and unkempt where we imagined him beautiful, weak where we thought him strong, dull where we thought him brilliant. Take then the vintage of his heart and let him go. As for me, I'm glad some mystery is left in this world."

Dr. A. L. Hunt cures kidney, liver and stomach troubles.

THE IDEA FOR THIS NOVEL & PRACTICAL DESIGN WAS ORIGINATED BY "WINIFRED WORTH"

Design in Embroidery for Chemise or Corset Cover

EYELET
STITCH

BUTTONHOLING

THERE is nothing which bespeaks refinement more forcibly than those little touches we note in woman's dainty underwear. Even the strictly tailored woman does not carry her ideas of simplicity to these sheer garments; but, most often, permits her fancy to revel in the choicest bits. Certainly you'll admire simplicity of this design since it is something you can make dainty at little cost. You will gain time by puncturing the eyelets over a cake of hard, white soap. Only one eyelet should be made at a time. Never knot the thread. Do not use a double thread, but embroider closely to give a compact form. You also gain time by outlining the long tendrils on the sewing machine using floss on the spool. The machine stitching is often used to outline the buttonhole extreme edge before applying the button. The ribbon eyelets may be enlarged if you desire. Many prefer the three-quarter inch ribbon eyelets since ribbons are a decorative feature, and the narrower varieties are not so durable as a better grade of wide ribbons. This pattern can be used on chemise, corset cover, nightgown and by eliminating the portion for holding the initial it could be used decoratively on the princess slip, petticoat and union suits.

Sincerely yours

Winifred Worth

TO TRANSFER THIS DESIGN.

Put some soap in a pint of hot water, stir and remove soap. Saturate design with mixture, then remove excess moisture by partially drying design. Place material on a hard, flat surface and lay the design, face down, upon the material. Cover with two folds of newspaper and with a table-spoon rub, pressing hard, until the design is entirely transferred.

PATENT PENDING.

World Color Printing Co., St. Louis, Mo.

ODDS AND ENDS

PUT a few drops of oil of lavender in bookcases to prevent mildew on the books.

OATMEAL, when soaked in water the night before only requires about one-half the time to cook.

IT is best not to have carpets on the bedroom floors; use rugs instead. These can easily be cleaned.

CELERY should lie at least half an hour in cold water or upon ice before serving in order to be firm and crisp.

STUFFED olives chopped fine, mixed with cream cheese and made into balls are delicious if served with a plain salad.

CHICKEN salad is delicious if mixed with small pieces of green pepper and mayonnaise. Press the meat into pepper cases.

IF you are baking anything and the oven gets too hot, put in a basin of cold water, instead of leaving the oven door open.

RICE balls are good for luncheon or supper. Boil a cupful of rice in water and add salt. While warm mix in quarter-pound of butter, two eggs well beaten, and tablespoonful of cinnamon. Make this into small balls and fry in deep fat.

POLITE CHILDREN

IT is all easy enough when you get children into the regular routine of discipline. The important thing is to begin early and have the lamp of patience forever filled and burning. Where the easy, well-bred deportment of children is concerned, the usual mother-tantrum brings dire results—fear, bashfulness, deceit. A look is enough to restrain any child in the home which pays strict attention to adult behavior as well. Small fry soon know how to find the notes in our own eyes.

To conclude, if a child is taught the

Drain and roll in currant jelly, then powdered sugar. Half of these amounts would do for a family of ordinary size.

STOCKINGS should not be washed in the same water which has been used in washing white clothes, as they are apt in that case to become covered with lint.

WHEN starching children's pinafores add a small piece of sugar to the boiling water for two or three minutes, drain, put into cold water and rub off the skins. Dry with a towel.

IT is not hard to blanch almonds. Shell almonds and cover them with boiling water for two or three minutes, drain, put into cold water and rub off the skins. Dry with a towel.

WHEN using stale bread for puddings always soak it in a cold liquid. Bread that has been soaked in cold milk or water is light and crumbly, whereas that soaked in hot liquids is heavy.

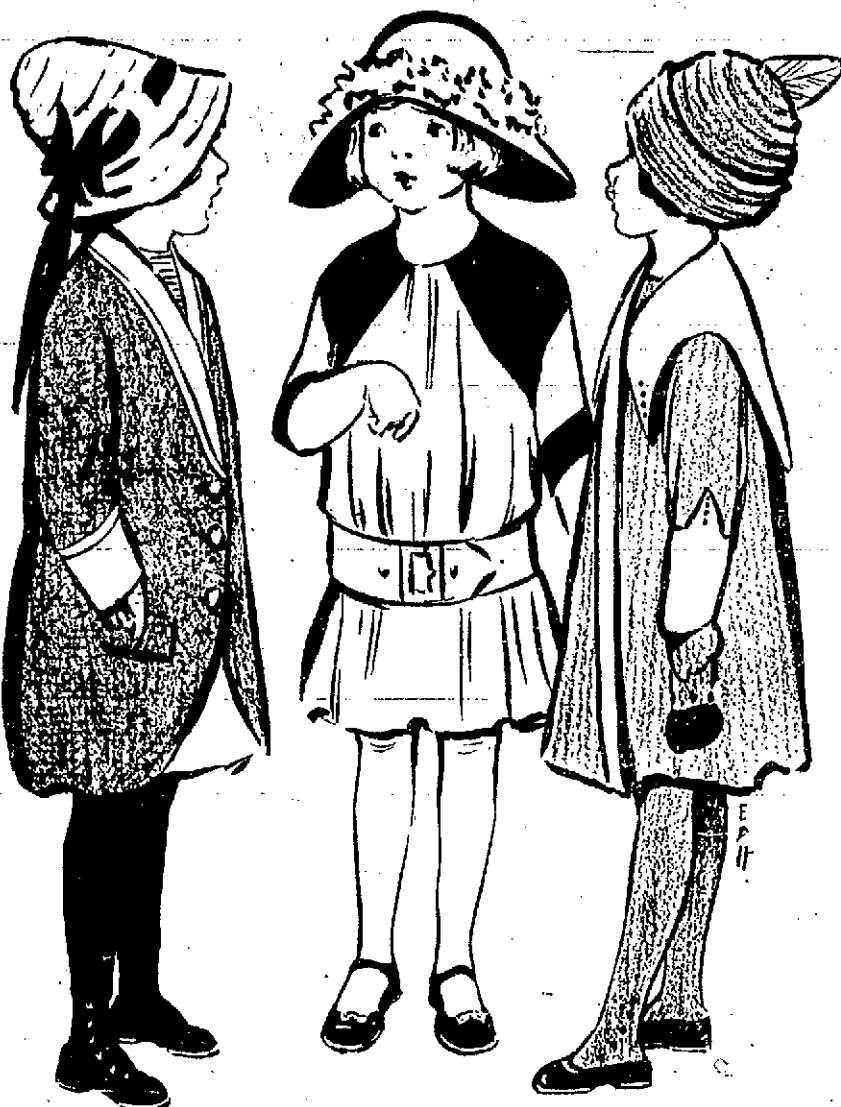

AN alarm clock kept in the kitchen may be set to ring at the time the vegetables should be put over the fire, or the hot bread or the cold or pudding is due to be done, and as a guide to time in many other matters.

Little amenities of social intercourse—taught at home how and how not to eat, how to stand up, how to sit down, how to do a gracious act and receive one—the first step is paved toward his worldly if not business success. But as to that good breeding is necessary, too, and the greatest man in after times may be put to shame for the want of it.

Merely to drink one's soup from the side of the spoon instead of from the point; to "eat" soup instead of "drinking" soup; to know that the napkin of the host's table must be folded instead of hung down any way, as in restaurants, are in themselves a preparation for meeting the great world on its own ground.

All things said and done, we live in a polite age.

YOUNG MISSES DRESSES FOR COOL NIGHTS

YOUR BOY'S ROOM

BY MRS. McCUNE

IF you have two rooms to turn over to the boys, I think they will prefer a den and a bedroom, the latter furnished with twin beds, two dressers or high shaving stands and one big chest of drawers. The den should contain a broad couch, without back, a large table with the shelving beneath partitioned off for reading matter, two large easy chairs—boys like Morris chairs better than rockers—a bookcase, preferably the sectional style, a splendid reading lamp and if possible an open fireplace.

As to color schemes, on the north walls use either a golden yellow and rich yellow-brown combination—the yellow in the bedroom, brown in the living room—or a red combination. Brown makes a splendid background for college trophies, paintings, banners, etc., and sporting prints, while yellow for the bedroom gives a good reflection for shaving, dressing, etc.

If you use red select a warm geranium pink for the bedroom and for the den a rich, deep red, which will be simply a deepening of the geranium pink. Or dry pinkish terra cotta for the bedroom and a very deep, warm terra cotta for the den. And always have a plain cartridge paper which you can get it in the right shades or a fine satin stripe paper which is in a soft two-tone effect.

If you use a border select for either the brown or terra cotta wall covering of the den a hunting or riding or skating design.

For rugs use as many skins as you can muster or the imitation rag carpet, which clean and shake splendidly. Have plain Marcellies or honey-comb counterpane and no shame. For bureau coverlets have plain hemmed strips of flannel. Boys hate lace fur-bows and ribbon bows.

I hear some mother of slender purse say that this is all right for the woman who can furnish a suite, but when you have only an attic room for the liddle what then?

And again I say—consult the boy. You'll be surprised at his resourcefulness. Here is what a mother and her boy living in a small New Jersey town have done. She told the liddle of 15 just how much money she could spend on his room when they moved into the new house. The attic was not plastered and the boy bought plain tan-colored building paper to cover ceiling and wall and make the room warmer.

This made a stunning background for his squirrel skins, high school banners, fishing outfit and all other boyish treasures that would "hang." He built a cozy corner of old boxes and burlap bags which his mother helped him to rip and dye a warm red. He painted his own floor, and he and his mother braided rugs at night. The girls gave him pillows for his cozy corner and after he had repaired and painted a huge porch chair they made more pillows for that.

That room is beloved by every boy on the liddle's list of friends, and a certain club of boys and girls meets there once a week, thus saving maternal parlors.

On his bed he has Great Grandmother Burrell's counterpane, crocheted in red and blue. He repainted the bureau and made a tie rack to hang on one side and a whisk-broom holder on the other, from burnt wood. He has a home-made bookcase and he and his chum are now building some real mission furniture to finish off the room.

Give the boy a chance to stamp his individuality upon his room and you will not have to ask an interior decorator how to furnish it.

DUSTING SET

THEY are charming, coquettish little things, and they sell in the shops for as little as 50 cents.

The set comprises, mop cap, sleeve protectors and an apron.

The whole set is made of three men's handkerchiefs, white, with a fancy border in color.

One handkerchief gathered up for the cap, by attaching around it in a large circle which almost touches the sides and leaves the four points, and drawing the thread up until the cap takes shape, and a most bewitching shape it is.

The apron is made of another hand-

kerchief, held diagonally and gathered in at the waist toward the top, the extra point above being used as a bib.

The other handkerchief is used for the cuffs and for a pocket on the apron.

Lavender and white, pink and white and blue and white are the colors to be had, although the set may be made at home, choosing any sort of handkerchief one wishes.

WHEN milk, soup or other liquid boils over on the stove and threatens to fill the place with unpleasant odors, cover the spot quickly with salt.

SPECIAL FEATURE PAGE

Mrs. Sultzer. A Heroine

Efforts of the Wife of New York's Impeached Governor To Shoulder the Blame of His Wall Street Operations the One Bright Spot in a Sordid Tale of Graft and Bossism.

OUT of a tale of greed and graft—fraught with criminality and recrimination—out of which grew the impeachment of William Sulzer, governor of New York, one bright spot looms and that, like a beacon on a storm-swept coast, focuses its rays upon Mrs. Sulzer, who so heroically endeavored to shoulder the blame for the acts which brought about her husband's political downfall.

When Charles F. Murphy, incensed at the unwillingness of Governor Sulzer to appoint Tammany men at the head of those bureaus which had the dispensation of millions of the State's funds, decreed that Sulzer must be removed from office, it was a foregone conclusion that, guilty or innocent, Sulzer was in dire danger. The ways of Tammany are wonderful strange, yet wonderfully effective when the machinery of this all-powerful organization is set in motion. Sulzer, at a critical moment in his career as governor, saw fit to defy Murphy and his minions. He came out openly and announced himself as "champion of the common people."

War Is Declared.

The final break came when Sulzer declined to appoint James J. O'Grady, a wealthy contractor who had been affiliated with Tammany Hall all his life, to the head of the State Highway Commission. In this bureau an appropriation of fifty million dollars had been made for immediate disbursement, and this was a plum that caused the Tammany Tiger to lick its chops every time it came within its vision. Sulzer resisted all efforts to make him see the error of his ways, and when the threat was made that Tammany would "put the skids under him" he snatched his fingers and appointed the man of his own choosing for the fat berth. He also named John Mitchell, he of coal strike fame, to head the State Labor Bureau, and this was another plum Tammany desired. The obvious course was pursued. When the Sulzer appointments came before the Senate for ratification

She Enjoys Making Favorite Dishes for her Husband and Superintending Affairs in the Kitchen

Latest Photograph of Mrs. William Sulzer

tion both were flatly turned down by the Tammanyized Senate.

Sulzer rallied. Tammany threatened. The breach was wide and deep, and although Murphy has since avowed that Sulzer came to him in the dead of night and on his knees pleaded for peace, offering any and everything Tammany wanted if he would be allowed to continue in the attitude of the "People's Champion," Murphy was obdurate and curtly ordered him to go his way.

When Tammany made its first move, an old case in which Sulzer had been mixed up many years ago was resurrected. Affidavits were dragged from dusty files, which sought to prove that Sulzer had been indicted in a New England State for questionable practices while acting as counsel for a client in a case where much money was involved. The newspapers stood loyally behind Sulzer in this attack, and he managed to emerge from the mire. Sulzer then made a counter move and opened the batteries of a vitriolic attack upon Murphy, his character and his methods. While this furnished favors of sensation with a pleasant day's reading, Tammany went quietly to work and ascertained that there was a young woman, Mignon Hopkins by name, who charged that Sulzer had trifled with her youthful affections and sued for damages, charging breach

I promise to marry. All the correspondence that passed between this young woman and Sulzer had found its way into Tammany's hands, and no time was lost in presenting those delectable morsels before a scandal-loving public.

The Wife Is Champion.

Staunch and true from first to last, Mrs. Sulzer stood loyally at her husband's side and aided him in his fight to weather this second storm which created even wider interest than the first attack.

The story goes that Sulzer has never denied it that an emissary of the wigwag then sought him and said: "Now you see what we can do to you if we want to. These two cases are but forerunners of worse to follow. You be good, play the game, and give us the appointments we want and we will call off our dogs. Refuse and we will put you out of business. Impeachment will be our next line of procedure, and don't think for a moment we can't do it."

One half hour before the New York Assembly cast its vote which indicted its governor, Mrs. Sulzer arose from a sick bed and sent for State Senator Palmer, a Sulzer adherent, and unfolded to him a tale that had it come

Wife Endorses His Checks.

"In the matter of finances my husband is and always has been a child," the hysterical wife exclaimed. "I have always managed his money affairs. I have made his bank deposits for him and I alone have had access to his bank book and his check book. I have always endorsed checks made to his order and deposited them in the bank. I have frequently signed his name to checks and the money was paid without question. When campaign contributions came to him and made out to his order I took them in charge and some of these I used to cover accounts he had with brokers so that they might lay something aside for a rainy day. I knew these amounts could be made good at a later date and in time for their proper accounting."

Mrs. Sulzer declared that her husband knew nothing of the check transactions until he had read the evidence that was presented before the Frawley Committee. She said that while many might condemn her for

Mrs. Sulzer receiving first parcel from New York via New Parcel Post

what she had done, she was ready and eager to appear before the Assembly and make the same statement on the stock deals that she had just confided to Senator Palmer.

"What I did was of my own volition, and I consulted no one before taking the step, although one man now in the camp of the enemy and, until a few weeks ago, supposedly my husband's best friend, was my confidant immediately afterwards, and he said what I had done was all right."

Mrs. Sulzer referred to Matthew T. Horgan, Deputy Commissioner of the Department of Economy and Efficiency, who bore close personal relations to the governor all during and prior to his campaign. Horgan and his wife were among the first to go to the People's House as guests of the Sulzers immediately following the governor's inauguration.

Mrs. Sulzer concluded her statement to Senator Palmer by saying that she had been advised in all financial transactions I have made for many months past by Mr. Horgan.

The Effect On The Assembly.

It is needless to say that such an announcement, when made on the floor of the Assembly in the wee small hours of the morning, when Tammany and anti-Tammany members were battling for their political lives, created intense excitement. Levy, the Tammany floor leader, cracked his whip. The opposition fought back with the desperation of drowning men, but the word had come from the boss and shortly after four o'clock in the morning Sulzer's impeachment

Making up the days

a member of Congress in 1907 he was seized with a serious illness and was removed to a New York hospital. It fell to the lot of Miss Clara Roddelheim, a Philadelphia girl and graduate nurse, to minister to his wants. It was some weeks before the Congressman was able to lift his head, but when his strength was sufficiently restored to permit him to lift his hand it is said that his first act was to beckon his nurse to his bedside and tell her how deeply grateful he was for the tender care she had lavished upon him. That friendship soon ripened into love, and when the Congressman left the hospital he had exacted a promise from his nurse to sever her connection with the institution as soon as possible that she might hasten the preparations for their approaching wedding.

Miss Roddelheim returned to her Philadelphia home and there the ceremony was performed on January 7, 1908, and those who know them best say that their honeymoon has not waned yet.

It has frequently been commented on that a person rarely sees one without the other. That, of course, was before the governor was called to Albany to take up the onerous duties connected with his high office, but even then he never lost an opportunity to snatch an afternoon or evening from state cares that he and Mrs. Sulzer might journey forth on some little excursion alone. They rarely made up parties for such outings, each preferring to be alone together.

The Sulzer Romance.

The romance of the Sulzers is but another story, where a strong man, stricken by illness, is tenderly cared for and restored to health by a nurse with whom he fell desperately in love and married as soon as such details could be arranged. When Sulzer was

Where Napoleon and Josephine Spent Their Happiest Days—Gardens Once Renowned Throughout Europe for Their Beauty—Priceless Art Treasures in the Chateau.

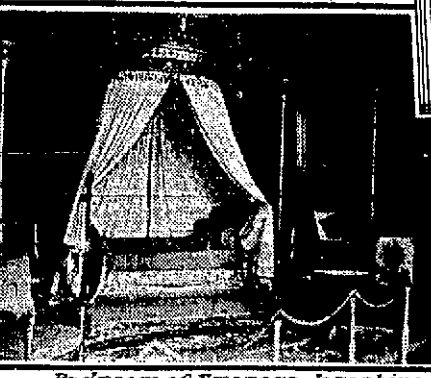

THIS chateau Malmalson, a few miles from Paris, near the village of Ruell, will always have a peculiar interest for the traveler, especially the traveler who is interested in French history, for this chateau was the favorite residence of Napoleon and Josephine. It was in this house that the greatest military genius the world has ever known spent his happiest days, and it was there that he sought a few days solitude commingling with tender memories of the past just before his banishment. It was there that the Empress Josephine died in the room she loved so well, and which held such fond recollections of her early married life with Napoleon.

Early History of Malmalson.

Although Malmalson dates back to the ninth century, it did not come into the hands of the Bonapartes until 1799, when the duMolays transferred it to Josephine Bonaparte. Josephine was well acquainted in this neighborhood for she resided several years at Croissy, nearby. She married Viscount de Beauharnais in 1779 and was the mother of two children. Her husband was sent to prison and executed during the French Revolution. She was also imprisoned for a time. After Robespierre had lost his power and had died she was released from prison and then became known as the Widow Beauharnais. Her son Eugene was at that time a boy of fifteen, and at her request he presented himself before General Napoleon Bonaparte at the house of a man named Barras and begged that the sword of his father, the late Viscount, be given to him. The mother came with her son and Bonaparte was at once smitten by her charms. His attachment grew with each succeeding meeting, and he was married to her on March 9th, 1796. From that day it was her dream to own Malmalson. Shortly after the purchase she moved in and soon gathered a number of friends around her. Her extravagance is well known. She had a benevolent disposition and was continually making presents to people of all classes, and while Napoleon often scolded her for spending so much money he was proud of her popularity, and once during a dinner party at Malmalson he left his seat at the table, going to where she sat, kissed

MALMAISON-The Almost Forgotten

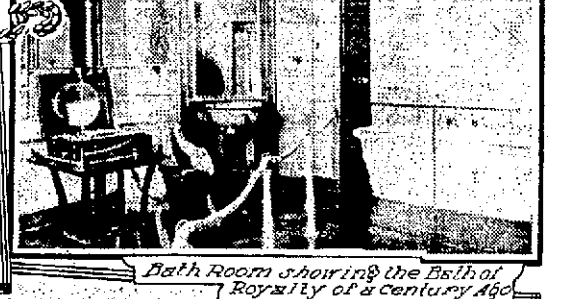

Home of Napoleon and Josephine

The chateau Malmalson where Napoleon and Josephine spent their happiest days

her tenderly, saying, "I can win battles, but you win hearts."

Gradually Josephine enlarged Malmalson and changed the rooms to suit her convenience, which required the expenditure of more money, but Napoleon yielded to her wishes and shared with her the enjoyment of living at this beautiful spot. The park was enlarged and Josephine, being especially fond of botany, had the most rare and expensive flowers and trees planted. The fame of the gardens at Malmalson spread to England, and on one occasion the English Government sent to this remarkable woman a load of rare seeds which had been captured by their men-of-war. Napoleon, too, loved the gardens and spent there with her all the time he could spare from his military campaigns. At one end there was a summer house which Josephine had erected for his comfort, and in this nook among the trees he spent many hours in study. It was in this lovely bower that he planned the battle of Marengo. It was there that he elaborated the Civil Code, and while sitting among the flowers of Malmalson he decided on the execution of the Duke d'Enghien.

Napoleon A True Lover.

At Malmalson Napoleon was the devoted husband always—the peaceful, beautiful surroundings suggesting and

Death of Josephine.

In 1809 Josephine returned to Malmalson, alone, to live in retirement. Only forty-seven years of age, she was

a derelict—the gay crowd which once swarmed about her having taken wings when the glamour of power and influence had faded. For a time she lived in courtly style, but the Empire was drawing to a close, and on March 23, 1814, she fled from her home to avoid the approaching enemy. After a time she returned and her chateau was regarded as neutral ground. Russian, English and German invaders came to the place to pay her court, and she strove to captivate them. She caught cold on May 14th, 1814, and neglected to take care of herself, pre-arranged, and on the twenty-fourth she opened a ball with the Emperor of Russia and afterward went out for a stroll in the garden in his company. She became quite ill and died on May 29th, 1814.

Napoleon Returns.

A year later Napoleon returned from Elba and made a pilgrimage to

The Chateau.

The chateau is now open to the public for a trifling admission, and one may wander at will through the rooms once occupied by one of the world's greatest men. To describe each room minutely would require pages of a newspaper, so only the most important can be mentioned. The drawing-room of the Empress is richly decorated with frescoes and paintings. The mantelpiece is of white marble and was given to Josephine by Pope Pius VII, at the time of her coronation. The carpet is a magnificent velvet one with a soft gray ground. The room is rather crowded with Sevres ornaments and small tables of various kinds. This room is by far the handsomest one in the chateau. In the music room the harp used by Josephine is the most prominent thing. A number of strings have snapped off, but it is still a handsome instrument. It is decorated with chased gilt bronze and has the Imperial Eagle at the top. The bathroom is interesting only because of the modern conveniences Josephine enjoyed so far ahead of the times. It is needless to add that the fitting up of this room cost a princely sum. The bedchamber of Napoleon is rather plain, but the grey silk hangings are unusually beautiful.

The Bedroom of Josephine.

The bedroom of the Empress is, perhaps, the most interesting of the rooms because of its associations, for it was in this room that Josephine passed from earth, her last words being "Napoleon—Elba!" It was there that Napoleon spent his last hours before leaving France forever. The walls and ceiling are hung in red satin ornamented with gilt embroidery of a scroll design. The bed in which the Empress died is of sculptured wood, the head being ornamented with two swans and the foot with two horns of plenty. The curtains are India muslin worked in gold. There is a magnificent fire screen which is said to have been the work of Josephine during the first year of her life at the chateau. A Sevres pitcher of the rarest pattern is in the lower part of a mahogany washstand beside the bed. The carpet is from the factory at Beauvais and is a very fine one. In the center is a swan on a blue ground. Statues and ornaments of various kinds and the historic apartment. There is a beautiful dining hall, a council chamber and various ante-rooms, all filled with relics of these two people—relics worth fortunes, carefully guarded and shown to the public.

The garden is as well kept as it was in the time of Josephine, even the trees which she herself planted still flourish. The little cabinet or summer house which she had built for Napoleon has been restored and is a never-ending source of interest to the visitor.

EDDYTORIAL

Totter day when we set down at our eddytorial desk and firmly grasped our eddytorial pen to dash off a eddytorial on some live subject of humming interest, we couldn't seem to think of enny live subject of humming interest or enny other kind of a subject for that matter.

As we set there in deep disgust cujelling our poor brain and ransacking it from one end to tother, as you might say, in the hope of finding in its deep recesses something to write a eddytorial about it seemed to us that there wasn't a subject in the unyverse nor anywheres else that we ain't already wrote about.

Then we throwd down our pen in disgust, clapped on our hat and went out to take a walk around through the sooburbs of Bingville, thinking that we might come across something that would suggest a subject, and sure enuff we did.

About half a mile north of town out in the apple orchard under the trees was Clem Wilkins, one of the most respected citizens of Bingville, making cider from the pure juice of the appel and barrelling up same and putting it away for fuchure consumption, as you might say.

After we drunk three of four tin dipperfull of the sweet cider it occord to us how much more inviggorating & rejoovenating them four tin dipperfull would of been if it had only been hard cider instid of fresh made. Then we decided to write a eddytorial on hard cider, which is one of the most important commodities of Bingville, being as when winter sets in hereabouts most every respected citizen has a harl of cider stored away which he will not disturb until it becomes hard and contains considerable kick.

ever, we maintain that hard cider took in moderate doses is beneficial & very exhilarating. A glass or two of hard cider on a cold winter's eve, or on a hot summer's day makes the world look a good deal brighter & cheerfuller than the world did before the hard cider was absorbed. Hard cider puts new life into a person and makes them at peace with all the world. We know what we be talkin' about becuz we have tried it when we was crushed in heart & spirits, whereas after a little hard cider for our stummick's & spirit's sake we felt gay, joyous & very exhooborant.

You will notice that Clem Wilkins, who suggested the subject of this eddytorial, has a advertisement in another column of this wks. Boogie to the effect that after he gets his cider made he will use his cider press to make cider for others who desire to have it made.

There is also others in our midst who could do a big business with their cider presses in making cider for folks hereabouts if they would only advertise in the Bugle.

Advertise to make cider in the Bugle—THE ONLY NEWSPAPER IN THIS END OF THE CO. WHO IS IN FAVOR OF HARD CIDER!

Personals

Mel Sampson has a hen who has stole off her nest somewhere. Mel can't find hide nor hair of the hen nor the nest either. Who ever heard of a hen stealing off her nest this time of year? All we have to say is she must be a fool hen.

Ed Simpson, who has been working on and off at painting his house, was tuk suddint with a awful stummick ache and had to knock off painting for a day or two. Doc Livermore was called, who pronounced it painters' colick.

Miss Sary Ann Whittacre is taking musick lessons on a old parlor organ that has been in the family moren 50 years. The neighbors are nearly drove wild with the noises Sary Ann makes on the organ and are talking some of making a complaint to the town selectmen on the ground of publick nuisance.

Mrs. Lige Green of this city took 3 doz. eggs and 5 lbs. of butter to the Co. seat to market last wk., being as eggs and butter is 2 cts. more per doz. & lb. there than at Hen Weathersby's store here. When Mrs. Lige got to the Co. seat she found all her eggs smashed, but the butter was still intact. Hen Weathersby was a good eal tickled when he heard about this, and calculated Mrs. Green would of come out better if she had patronized home trade.

Jabez Crum, who lives five miles out of Bingville, called at our office Thursday last and tuk up two hours of our valuable time in idle conversation. We wouldn't of listened to Jabe except that every minit we was expecting him to pull out a dollar or two and hand it to us on his back subscription which is nine years back. But at the end of the two hours Jabe departed without giving us a red cent. The next time Jabe calls we won't be so blamed polite to him.

These is about all of the personal brevetties which we can think of at the present writing. Perhaps if we would think harder we could think of a few more, but these is sufficient for the present issue.

OBE HANKINS TOO SHARP FOR HEN

There's Money in Eggs if You Know How to Go About It

Hen Weathersby informs us that Obe Hankins, who has always been regarded as one of our most respected and honest citizens, has been playing him purty sharp tricks of late.

For the last couple of wks. Hen has been selling eggs at 20 cts. per doz. in order to meet competition at Hardscrabble, where eggs is also being retailed at 20 cts. per doz. Well, one day last wk. Obe went into Hen's store and bought 7 doz. of eggs often Hen, which was all he had, at 20 cts. per doz. and paid Hen cash fer same. This was a good eal of a surprise to Hen. Hen wanted to know of Obe what in thunderashion he was a going to do with so many eggs. Obe he jest laffed, and said that his family at home was powerful big egg eaters. Obe told Hen that he would take all the eggs he could get at 20 cts. per doz.

So Hen he agreed amongst his customers to bring in their eggs, and in a few days more Obe he got 18 more dozens from Hen paying him cash fer same. This made Hen curious, so he begin to investigate, and to his consternashion he found that Obe had been buying eggs often him for 20 cts. per doz. and selling them at the Co. seat for 30 cts. per dozen. This made Hen powerful mad, and next time he seen Obe he told him hereafter he would haft to pay 30 cts. per doz. for eggs, but as for his other customers they would haft to pay only 20 cts. Obe said alright and went away.

But Hen continued to find a market for his eggs. He noticed that there was more of a demand for eggs among his customers than he had ever knowed, but he didn't think nothing strange till Lank Peterson come to Hen and informed him privately that Obe had been employing Hen's customers to buy eggs often him at 20 cts. per doz., who then turned them over to Obe at 21 cts. per doz., and that Obe had still been carting Hen's eggs to the Co. seat, where he was still getting 30 cts. per doz. for same and was getting rich at it.

Hen asked Lank how he knowed about this, and Lank said he knowed because he had been employed by Obe to buy eggs himself, but because there was 2 eggs in a doz. he bought from Hen that wasn't good, Obe said he would haft to deduct for them, and this made Lank mad, so he went and told Hen all about it.

When Hen found this out he was maddern ever, and put up a notice in his store reading as follers, "No Eggs Wanted By Me."

But Obe wasn't discouraged. He is now buying his eggs at Hardscrabble where they are selling for 20 cts. per doz. and hauling them from there to the Co. seat, where he continues to get 30 cts. per doz. Obe says it's farther to take them from Hardscrabble than it is from Bingville, but in spite of that he is making money in the egg business hand over fist.

As for Hen, he is considering the advisability of getting out a injunshion to restrain Obe from handling eggs, but Anne Hillver, our lawyer & legal light, also Seth Dewberry, our lionhearted town constable, both says that in their opinion Obe is acting within his rights, and that Hen can't prevent him from dealing in eggs if he so desires.

Obe Hankins is a cute one.

Country Correspondence

ZION CROSSROADS

Some fient in humming form went and told Eb Hoover of the Cross Roads that Injun Turnip which grows in the woods was a awful good thing for a cold. Eb who had a cold on his chest went and hunted up a Injun Turnip

and et it & it nearly burnt Eb's mouth often his face for him. Worst of it is, Eb can't rekolleckt who it was told him to try Injun Turnip—he says if he could he'd give him a tarnashion good drubbin.

Bill Hendricks made a speshial trip to Hardscrabble last wk to git his whiskers trimmed, being as he had let em git so long that they interfered with his eating. As a rule, Eb's wife trims his whiskers for him, but Mrs. Eb is away visiting relatives at present.

Miss Hildy Wade, the bell of the Cross Roads, had a tech of pneuraglia in her face last wk that left her face all sweld up on one side. This makes Hildy look more ridicluser than usual if anything.

Enos McCracken has a hull pup to sell. Any person desiring to purchase a hull pup see Enos. VERITAS.

SORROW HOLLOW

Hank Jones has a boil on his neck. Hank says he usually has his boils in the spring, but they're coming earlier on him this year.

Moze Hingham shot a woodchuck last wk, which he bet a dollar with Jake Hinsley would weigh 25 lbs. When it was weighed the woodchuck weighed only 13 lbs., and Moze lost, and owes Jake a dollar which Jake will probably never get.

Mrs. Jemina Hoff says some of the blueberries she canned is fermenting on her. She calculates she didn't use enuff sugar. This is probably true. UNO.

Honor for Jed

Jed Peters, our intelligent school teacher of the Bingville school, attended a spelling bee at Dist. 4 last Friday night, and the teacher of the school there asked Jed to give out the words to the two sides, which was quite a honor for Jed to be asked to do this. Jed complied to the best of his ability, but there was several big words which he was not able to perounce correctly, so he passed them by.

Stove no Good

Hen Weathersby, prop. of our general store, built a fire in his stove in the store for the first time last Tuesday eve. You will remember it was quite coolish that ev'g.

Well, the stove smoked so that it drove everybody outen the store. Hen then remembered that he hadn't took the packen outen the chimney and so he done so, but still the stove smoked. There is a big crack in the stove, and Hen is of the opinion that this is what causes the stove to smoke and, is afraid he will haft to get a new stove. This natcherly makes Hen feel bad who has had this stove for the past 15 yrs., and is just beginning to get attached to it. LATER—Hen says this old stove will haft to last out this winter anyhow, being as he can't afford to buy a new stove.

Plutarch's Leg Asleep

Last Friday ev'g. about 8 p. m., as Hen Weathersby, prop. of our general store, was closing the shutters of his store preparatory to closing up for the night, Plutarch Stone, who had been setting across a nail keg without no top in it for a couple of hours, got up to go home, and fell end over end with his face in the sawdust box.

Hez Watkins had noticed that Plutarch had been eating crackers outen the cracker harl, and thought he was choekin, so Hez begin to pound Plutarch in the back. Hen Weathersby said not to do that because in his opinion Plutarch had had a stroke. Jake

Ormsby thought Plutarch was having a fit and run outen the store to escape. But bye and bye Plutarch explained that his leg had only went to sleep on him, and that when he went to walk on it the leg wouldn't hold him up and so he fell down. Plutarch then desired to know who the dastard was who hit him in the back. Hez, who had hit him, declined to answer and everybody else denied it. Plutarch finally hobbled off home a good eal riled up.

Slippery Ellum

I have a lot of slippery-ellum on hand, which I gathered outen the woods. Some likes to chew slippery ellum and others don't. I will sell this slippery ellum at so much per lb., depending on how much I can get. A slippery ellum poultice is turrible good for some things. Yours for slippery ellum. HANK DEWBERRY, Bingville.

SAY

HOW ABOUT CIDER

This is to notify the inhabitants of Bingville & vicinity that as soon as I have finished making my regular yearly annual supply of cider from my crop of appels my cider press is at the disposal of ennybuddy in this community who desires to have cider made. I laid out \$50 dollars for this cider press two year ago and its just as good as new. Not only that; but it makes the best cider of any cider press I ever seen. Why go to the expense of buying a cider press to make a harl or 2 of cider when you can use my cider press?

All I charge for making cider is 3 cts. per gal, you, of course, to furnish the appels. Did you expect that I'd make your cider for 3 cts. per gal, and furnish the appels, too? Then you must think I'm a blamed fool! What is niser along in the winter or next harvest time than to have a nice cool harl of hard cider in the cellar? It will cheer up your drooping spirits and make you feel as if life is worth living. Besides, what's left will go to vinnager—but if it's good hard cider I don't kalkilate there will be enny left.

Bring on your appels, also a harl and I will make your cider for you while you wait—if you wait long enuff.

Yours for cider,
CLEM WILKINS,

Ciderist,
Bingville.

NORTHERN COUNTIES
REAL ESTATE

REAL ESTATE
1st CLASS IMPROVEMENTS AT
HALF COST—DANDY IRRIGATED
TRACT
 If you want a real home and first class
 lot, you can't afford to overlook this.
 Here is a fine, new, 8 room house,

stered basement; concrete foundation, neatly painted; good well, fine oak trees in yard; just right distance from rd; new barn 45x66, with hay fork and track and concrete foundation; dairy house and other outbuildings; fruit orchard; 8 acres alfalfa—the best that goes 10 tons per acre; 7 acres more in miscellaneous crops; 1

...the time oak timber; running water in
...ok; main irrigation canal touches
...ndary line; if you ever irrigated you
...ow what it means to have a big main
...h right where you can tap it. Soil
...h this tract 20 feet deep—a rich silt,
...ll grow anything. Here is an ideal
...ne at a price that cannot be dupli-
...ed in California. Adjoining uni-
...ed land worth \$250,000 to \$300,000 per

...treat with all these fine improve-
ments for \$250 an acre. Think of it!
Water for irrigation so abundant. It is
going to waste this year. The water
it and improvements alone are
worth the price of the land. This is
the thing for a dairy man—cows in
water fat payments without any cash
in. Small cash payment handles
